

STATE HEALTH SYSTEMS RESOURCE CENTRE KERALA

PIONEERING EXCELLENCE IN PUBLIC HEALTH STRATEGY AND IMPLEMENTATION

SHSRC KERALA LEADS TRANSFORMATIVE HEALTH INITIATIVES, FOCUSING ON RESEARCH, CAPACITY BUILDING, AND POLICY SUPPORT TO STRENGTHEN KERALA'S HEALTHCARE SYSTEM AND IMPROVE COMMUNITY WELL-BEING.

The State Health Systems Resource Centre, Kerala (SHSRC-K), was established in 2008-09 as a dedicated technical support organization under the Department of Health & Family Welfare, Government of Kerala. Modelled after the National Health Systems Resource Centre (NHSRC), New Delhi, SHSRC-K plays a pivotal role in strengthening the state's health systems by providing expert guidance on the formulation and implementation of effective health policies and strategies. Today, SHSRC-K serves as a trusted advisor to the government, fostering innovation and evidence-based approaches to improve public health outcomes across Kerala.

- ▶ **Public Health Expertise**

▶ **TRANSFORMING HEALTHCARE IN KERALA: INNOVATIONS AND INITIATIVES BY SHSRC**

SHSRC Kerala leads transformative health initiatives, focusing on research, capacity building, and policy support to strengthen Kerala's healthcare system and improve community well-being.

SHSRC-KERALA

► VISION

To emerge as a leading centre of excellence in Health Policy Systems Research and innovation, driving transformative change for strengthening health systems and improving the health and well-being of the people of Kerala's.

► MISSION

To strengthen Kerala's health systems by providing high-quality technical support, fostering evidence-based decision-making, and addressing on-the-ground challenges.

We aim to:

- Conduct cutting-edge research to inform and shape health policies and programs.
- Assess ground realities and identify challenges in program implementation to drive practical and effective solutions.
- Build the capacity of health systems at all levels to ensure efficient and equitable service delivery.
- Evaluate and monitor health interventions to measure their impact and effectiveness.
- Facilitate collaboration with academic institutions, research organizations, and other stakeholders to promote innovation and knowledge
- Leverage data, technology, and evidence-based approaches to improve health outcomes and ensure sustainable development.

► HEALTH POLICY & SYSTEMS RESEARCH

By conducting in-depth research on public health issues and analyzing health policies and systems

Public Health

► PUBLIC HEALTH ADVOCACY

Promoting health equity and influencing policy changes by raising awareness, engaging stakeholders, and advocating for healthier communities and environments.

► COLLABORATIONS & PARTNERSHIPS

Fostering strong relationships with academic institutions, government agencies, non-governmental organizations, and community groups through collaborative research projects, facilitating knowledge exchange and leveraging diverse expertise to address complex public health challenges

► POLICY & TECHNICAL ASSISTANCE

Facilitate technical assistance and capacity enhancement aimed at fortifying district health systems, while also serving as a resource for state health systems in the realms of strategic development, program planning and the promotion of innovation and change management.
