KERALA.HEALTH

PANDEMIC MANAGEMENT PLAN

KOZHIKODE DISTRICT

Message

Kerala Health has consistently recognised that pandemic preparedness is no longer a standalone activity limited to the health sector, but an essential component of public safety, governance resilience, and sustainable development. The experiences of NIPAH outbreaks, COVID-19 pandemic, emerging zoonotic threats, climate-sensitive diseases, and increasing global interconnectedness have clearly demonstrated that future public health emergencies require continuous preparedness, rapid response systems, and strong institutional coordination. In this context, the preparation of comprehensive Pandemic Preparedness Plans by the Department of Health and Family Welfare marks an important landmark towards strengthening Kerala's health security framework.

Today, pandemic management plans must be viewed through the broader lens of the One Health approach, which recognises the interconnectedness of human health, animal health, environmental systems, and ecological balance. Emerging infections are increasingly influenced by environmental degradation, climate variability, urbanisation, migration, and changing human-animal interactions. Therefore, effective preparedness requires coordinated action not only from the Health and Family Welfare Department, but also from departments including Animal Husbandry, Forests, Local Self Government, Disaster Management, Revenue, Education, Transport, Police, Water Resources, and Civil Supplies. Such interdepartmental convergence is critical for surveillance, risk communication, outbreak containment, logistics management, and continuity of essential services during emergencies.

Kerala has always demonstrated exemplary leadership in responding to public health challenges through timely action, scientific decision-making, community participation, and decentralised governance. The integration of pandemic management with disaster management systems further strengthens our capacity to respond to multiple emergencies simultaneously, including outbreaks occurring during floods, heat waves, or other natural disasters. The development of structured protocols, surveillance mechanisms, escalation frameworks, surge planning systems, infection prevention strategies, and institutional coordination models reflects the state's commitment to building a resilient and future-ready health system.

I am informed that Kerala is the only state where the pandemic preparedness plans have been prepared to such a depth right from the Panchayath level to District and at institutional level upto Medical Colleges. I place on record my sincere appreciation to all those who worked on this endeavour. The dedication, technical expertise, and coordinated efforts demonstrated by the state

Pandemic Management Plan

and district teams are truly commendable. I am confident that these plans will further strengthen Kerala's capacity to effectively prevent, detect, and respond to future public health emergencies while ensuring the safety and wellbeing of our people.

Shri. K Muraleedharan

Minister for Health and Family Welfare and Devasom,

Government of Kerala

Foreword

Kerala Health has been taking efforts to strengthen the ‘Health System’. The outbreak of diseases is common across the world. But the important thing that stands out is public awareness, their advisory-abiding behaviour, accessing hospital and getting diagnosed. That is the reason that outbreaks of Nipah or MPox are detected early and scientifically managed without any hassle.

Public health emergencies and pandemics remind us that health systems must remain prepared, responsive, and closely connected with the community. The recent experiences of the COVID-19 pandemic and various other communicable disease outbreaks especially involving newer pathogens have shown that timely preparedness, a coordinated response, and strong community participation are essential to the reduction of health risks and protection of lives. Kerala Health has managed COVID in exemplary ways with the involvement of people and all the line departments. Following the COVID pandemic, all international and national organizations have worked on preparedness and published guidelines, books and papers. But the most important question one should ask “Have we learned our lessons?” and “In what way these learning we have put to practice managing future health emergencies?”

It is with this thought process of “WHAT IS NEXT?”, a series of meetings were taken with Senior Medical Officers at the State level and district level of Directorate of Health Services. All officers of Medical Colleges and other stakeholders were also oriented to prepare the Pandemic Management Plans. Series of workshops were conducted in the districts to further follow up works done by the district teams.

The concept of ‘Learning by Doing’ was put to practice. NHM has deployed Epidemiologists in all Block FHCs. It was important to build their capacity to ensure day to day involvement in analysis and giving inputs for taking control and mitigation activities. Alappuzha district took the challenge and prepared a template. Dr Dileep and team took wholehearted efforts to work on this task. The prepared template was validated and sent to all concerned.

Later the district officers conducted series of capacity building meetings with all health as well as line departments functionaries. They submitted the first draft and conducted a workshop in which few plans of Panchayath, Block and major institutions in the Districts such as General Hospital, District Hospital and Medical Colleges were presented. Post discussions and getting feedback the district team fine-tuned the Plans. As Alappuzha district completed all Panchayaths and District Plans in depth, they were made into a ‘Learning Site’. Another concept of capacity building was put to practice. All the key officers of the respective districts were sent to Alappuzha in two batches to understand the method with which the Pandemic Preparedness Plans should be prepared. This exposure and interactions were very useful as most of the officers realised the importance of doing such planning.

The state level resource team comprising of Dr Mahesh N, Dr Ajan M J, Dr Harikumar S, Dr Bijoy E, Dr Dileepkumar S R and others supported the district teams and all the districts

Pandemic Management Plan

prepared the Pandemic Management Plans. Dr Vinay Goyal then SMD NHM and Mr Rahul Sharma present SMD NHM provided their leadership to facilitate plans preparations.

Simultaneously this initiative was discussed with Digital University of Kerala, and they were engaged to develop Kerala Pandemic Management System. This system envisages an end-to-end solution for pandemic management. This will make things easy for the field workers and all functionaries at the health institutions to update the information. As we go forward, it is envisaged that HOEC shall work as Hub and information flow will be from Kerala Pandemic Management System, IDSP, IHIP, SDMA and other information sources to HOEC at the time of any disaster/ health emergency.

It is noteworthy to mention here that after Alappuzha, Thrissur also prepared a comprehensive Pandemic management Plan and Festival management Plan. Unfortunately, during this year's Thrissur Pooram preparations, there was a massive fire accident, but the Thrissur MCH team put the Management Protocol in practice and in a short span of time within eight minutes, they took care of the fire disaster victims and provided exemplary services. While they were handling the incident, thanks to timely preparation and awareness, they were handling hundreds of emergencies not relating to the disaster during that period. This has clearly demonstrated to all that well-prepared planning and capacity building is the key to mitigating problems.

I would like to highlight here that these plans are not only at the state and district level but up to the Panchayath level. We first oriented and coordinated work on the Panchayath Pandemic Preparedness Plans. These plans were collated to make Block Plans. At the same time District teams worked on the District Pandemic Plans by taking the details from Panchayath Plans as well as the assets available at the district. This has made our Grama Panchayat/Municipality/Corporation equipped to effectively prevent, detect, and respond to public health emergencies.

The plan serves as a framework for coordinated action involving the Health Department and other line departments, organisations, volunteers and other stakeholders at the local self-government level. The plans follow a One Health approach, recognizing the close relationship between human health, animal health, and the environment in the emergence and spread of diseases. Strengthening disease surveillance, infection prevention and control measures, environmental sanitation, risk communication, and community awareness are all important components of local preparedness.

We incorporated surge preparedness plans which can be adopted quickly during a public health emergency. Particular attention was also given to vulnerable populations including the elderly, children, persons with disabilities, individuals with chronic illnesses, and socially disadvantaged groups who may face greater risks during emergencies. Early reporting, community engagement, and coordinated interdepartmental action are critical for minimizing the impact of outbreaks and ensuring continuity of essential health services.

Kerala Health has taken this initiative for the last six months; there are hundreds of officers involved in preparing and completing such a huge task. Therefore, the design of the book is also done in a different way. It was decided that the officers who hands on worked on this

Pandemic Management Plan

project should be mentioned prominently. As this is a unique milestone achieved by Kerala Health, the sincerely working officers' names are put on the cover itself.

These tasks would not have been possible without the support of the state resource officers' team of Dr Vinay Goyal, Mr Rahul Sharma, Dr Mahesh, Dr Ajan, Dr Dileepkumar, Dr Harikumar, Dr Ravindran, and many others. I appreciate their untiring efforts and patience for agreeing to do additional things which I pushed to them in the last minutes.

I sincerely appreciate the efforts of one and all and I am confident that Kerala Health team is having capability and will to take up any challenge and excel in their endeavours.

Dr Rajan Khobragade IAS

Addl Chief Secretary

Health and Family Welfare Dept.

Pandemic Management Plan

Message

When we look at public health through an operational lens, it becomes clear that managing a crisis is as much about robust architecture as it is about public health interventions. A successful response relies on the strength of our systems: seamless data flows, efficient resource deployment and reliable communication networks.

The COVID-19 pandemic was an inflexion point for public health systems worldwide. It exposed vulnerabilities, tested our capacity to respond under pressure, and reinforced the irreplaceable value of preparedness. As we move forward, it is imperative that the lessons we learned from that experience are institutionalised and embedded into the very fabric of how our districts plan, coordinate, and respond to health emergencies.

This District Pandemic Preparedness Plan represents a significant milestone in our collective journey toward building resilient and responsive public health systems across the State. It is the outcome of sustained collaboration, ground-level insight, and an unwavering commitment shared by every member of our health team. From an administrative perspective, this plan is the blueprint that translates vital epidemiological data into actionable workflows on the ground. It ensures that our infrastructure, logistics, and human resources are perfectly synchronized, enabling our medical teams to deliver care without delay.

This Plan has been designed to serve as a practical, actionable guide for our health teams. It outlines clear roles and responsibilities, establishes robust surveillance and early warning mechanisms, streamlines supply chain and logistics frameworks, and ensures that our health workforce is trained, equipped, and supported to respond to emergencies. A preparedness plan is only as strong as the systems that sustain it, and this document reflects our shared commitment to building those systems with care and rigour.

I place on record my sincere appreciation for the district health team and all other stakeholders whose knowledge and commitment have shaped this framework. Their dedication to public health service is a source of great strength for us. I also call upon them to internalise this plan, champion its implementation, and treat preparedness not as a mandate from above, but as a professional and moral obligation to the communities we serve. Together, we have the capacity and the responsibility to ensure that no community in our State is caught unprepared.

Rahul Krishna Sharma IAS

State Mission Director

National Health Mission

Pandemic Management Plan

Message

At the heart of an effective public health response is a simple truth:- a strong healthcare system doesn't just react to a crisis—it anticipates and prepares for it. Our true readiness is measured by how quickly and empathetically we can turn complex medical strategies into organized care on the ground.

Our District Pandemic Preparedness plans serve as a clinical and tactical guide. They bridge the gap between public health data and reality, turning data into clear action plans for our frontline workers. This ensures that everyone from Family Health Centres to major hospitals operates with complete clarity and a shared purpose.

A pandemic requires a balance of science and human compassion. While we look at data, trends, and logistics to plan our resources, our ultimate focus remains on the people and families behind those numbers. Ensuring clinical readiness, securing medical supply chains, and maintaining unbroken communication networks are the pillars that allow our medical teams to respond to emergencies and save lives.

I want to express my deepest gratitude to our public health workforce; your dedication is the foundation of our resilience. In particular, I thank the DMO, DPM, district program officers, medical officers, public health staff, and every member of the health team who worked tirelessly to bring this plan to life. By embedding these strategies into our daily work, we are doing more than just preparing for a future crisis—we are actively safeguarding the health, dignity, and future of our communities.

Let us continue to lead with science, serve with empathy, and strengthen our collective resilience.

Director of Health Services

Date: 4/6/2026

PREFACE

The health and well-being of the citizens of Kozhikode remain our highest priority. In recent years, our district has stood at the forefront of unprecedented public health challenges. From the successful containment of the Nipah virus outbreaks to the resilient management of the COVID-19 pandemic, the people of Kozhikode, supported by a dedicated network of healthcare professionals and volunteers, have consistently demonstrated extraordinary courage and solidarity. However, these experiences have also taught us a critical lesson: preparedness is not a one-time effort, but a continuous process. As we move into 2026, the global health landscape continues to evolve with emerging infectious diseases and

Pandemic Management Plan

climate-sensitive health risks. This Pandemic Preparedness Plan serves as a strategic roadmap for our district to transition from a reactive emergency to a proactive, systematic readiness. This document outlines a multi-sectoral approach, integrating clinical management, surveillance, and community participation—the hallmarks of Kerala. It emphasizes: Strengthening Local Infrastructure: Upgrading our primary and secondary health centres to handle surges without disrupting routine care. One Health Integration: Recognizing the critical link between human, animal, and environmental health in preventing zoonotic spillovers. Technological Advancement: Utilizing real-time data and electronic health reporting for swifter decision-making. Decentralised Governance: Empowering Local Self-Government Institutions (LSGIs) to act as the first line of defence at the grassroots level. I extend my sincere gratitude to the State Health Department, the District Administration, and every healthcare worker whose insights have shaped this plan. While we hope never to see another pandemic, this plan ensures that if one arrives, the District Medical Office, Kozhikode, is fully equipped to protect every life in our care. Together, we remain vigilant, prepared, and committed to a healthier future.

Dr. Rajaram K K

INTRODUCTION

BACKGROUND OF THE PPP

Pandemics and large-scale outbreaks pose substantial threats to public health, livelihoods, and essential services. Experiences from the COVID-19 pandemic, recurrent outbreaks of Dengue, Hepatitis A, Malaria (indigenous), and the emergence of Nipah virus in Kozhikode have underscored the critical need for robust preparedness and response systems across the district. These events highlight the importance of early detection, rapid containment, and coordinated multi-sectoral action at all levels of governance.

Kozhikode district presents unique epidemiological and environmental challenges. Its diverse terrain—ranging from coastal areas to midlands and forest-fringed highlands—combined with heavy monsoon rainfall, dense population, and extensive water bodies, increases vulnerability to vector-borne, water-borne, and zoonotic diseases. The district's history of Nipah virus outbreaks, first reported in 2018, further emphasizes the need for sustained surveillance and a One Health approach integrating human, animal, and environmental health.

The public health system, including a network of primary, secondary, and tertiary care facilities, plays a crucial role in outbreak response. However, during pandemics, challenges such as surge in patient load, resource limitations, and the need for isolation and critical care capacity become pronounced.

This Pandemic Preparedness Plan for Kozhikode district is developed based on recent epidemiological trends, vulnerability assessment, and health system capacity. It outlines strategies for preparedness, response, and recovery, ensuring coordinated action among health departments, local self-governments, and allied sectors to strengthen resilience and safeguard public health.

DISTRICT AT A GLANCE

Kozhikode district, located along the northern coast of Kerala, is a densely populated and socio-economically diverse region with significant public health relevance. Spanning an area of 2,344 sq. km, the district has a projected population of 3.81 million, with a high population density of 1,627 persons per sq. km. Administratively, it comprises 78 Local Self Governments (70 Grama Panchayats, 7 Municipalities, and 1 Corporation), reflecting a mix of rural and urban settings that influence disease transmission dynamics and service delivery.

Topographically, Kozhikode is characterized by three distinct regions: the coastal belt, the midland lateritic plains, and the highland areas of the Western Ghats. This varied terrain, along with 43 rivers and over 9,200 water bodies, contributes to ecological diversity but also increases vulnerability to vector-borne diseases, flooding, and water-borne outbreaks. The presence of 363 flood-prone and 93 landslide-prone wards further elevates disaster and epidemic risks, particularly during monsoon seasons.

The district has a well-developed social infrastructure, including 3,726 educational institutions and 2,285 industries, which can both facilitate rapid disease spread and support awareness and response activities. Demographically, vulnerable populations constitute a significant proportion of the district. Children under five (4.56 lakh), adolescents (3.83 lakh), and elderly persons (over 5 lakh) require special attention during pandemics. Additionally, 2.97 lakh families fall below the poverty line, and over 17,000 are socio-economically deprived. Migrant populations (over 32,000 immigrants and 96,000 emigrants), along with fisherfolk, Scheduled Castes, and Scheduled Tribes, present unique challenges in terms of access, communication, and continuity of care.

From an epidemiological perspective, Kozhikode holds critical importance due to its history of emerging infectious diseases and outbreak response capacity. Notably, the first Nipah virus spillover in Kerala was

Pandemic Management Plan

reported in 2018 from Changaroth Panchayath in Kozhikode district, marking a significant zoonotic event with high case fatality. The district has since experienced recurrent Nipah alerts and has developed strong surveillance, contact tracing, and rapid response mechanisms. Its ecological interface—particularly human interaction with bat habitats in midland and highland regions—continues to pose a risk for zoonotic spillovers.

Overall, Kozhikode’s high population density, ecological diversity, disaster vulnerability, and epidemiological history necessitate a robust, multi-sectoral, and context-specific pandemic preparedness and response strategy.

Table 1: Taluk Division (as per 2011 census)

					Malaria-7		

- Risk stratification among LSGs in the context of Communicable diseases and hazards

Pandemic Management Plan

Among the 78 LSGI's, several LSGI's appear as hotspots across multiple disease categories, indicating a need for an integrated health approach. The Kozhikode Corporation represents the highest risk for Dengue (10 high-risk wards), and is a significant hotspot for Leptospirosis (4 wards), Hepatitis A (4 wards), and Malaria (4 wards). Also Panangad is at high risk for Dengue (7 wards), Leptospirosis (4 wards), and Hepatitis A (5 wards). The Koorachundu maintains a consistent risk profile with 5 wards for Dengue, 4 for Leptospirosis, and 4 for Hepatitis A.

Disease-Specific risk clusters

Dengue Fever: This is the most widespread threat, affecting 30 different LSGI's. Top priority areas after the Corporation include Maruthonkara (6 wards) and Unnikulam (4 wards).

Hepatitis A: Shows significant geographical spread with 35 LSGI's identified. The highest risks are concentrated in Chorode (6 wards) and Changaroth (6 wards).

Leptospirosis: Identified in 21 LSGI's. Primary concerns are Koorachundu, Panangad, and Kozhikode Corporation, each with 4 high-risk wards.

Scrub Typhus & Malaria: These show lower ward-level density but specific localized risks. Koyilandy Municipality and Kunnamangalam are the top risks for Scrub Typhus (2 wards each), while Kozhikode Corporation dominates Malaria risk.

Nipah: Wards 1 and 2 in Marithomkara, Wards 4, 5, 6, and 9 of Changaroth and Ward 9 of Chathamangalam were identified as Nipah hotspots. Eight LSGI's also have bat roosting sites.

The detailed hotspots maps are given below.

Table 3 : Back ground of LSG	
Description	Details
Name of district	Kozhikode
Number of LSGs	78 (70-Grama Panchayats, 7-Municipalities, 1-Corporation)
Total area (sq. km)	2344 sq. km
Population(Projected)	3814333
Population density	1627.28 persons/sq km
Terrain (coastal/low-lying/backwaters/foothills, etc.)	Topographically the district has three distinct regions – the sandy coastal belt, the lateritic midland and the rocky highlands formed by the hilly portions of the Western Ghats
Number of rivers passing through district	43
Number of water bodies in the district	9259
Number of educational institutions	3726
Factories / small-scale industries	2285
Flood-prone wards and LSGs	363
Landslide-prone wards and LSGs	93
Death Management and Disposal Facilities (mortuaries/crematorium, including electric)	91
Auditoriums/Marriage halls/convention centres/community halls	377

DEMOGRAPHIC AND VULNERABLE POPULATION

Understanding the demographic composition and vulnerable population groups is essential for pandemic preparedness. Children, elderly, economically deprived families, migrant workers, and socially vulnerable groups are at increased risk during public health emergencies due to higher exposure, limited access to services, and dependency on public systems.

Fisherfolk		17790
SC Community		121257
ST Community		7844

CLINICAL VULNERABILITY

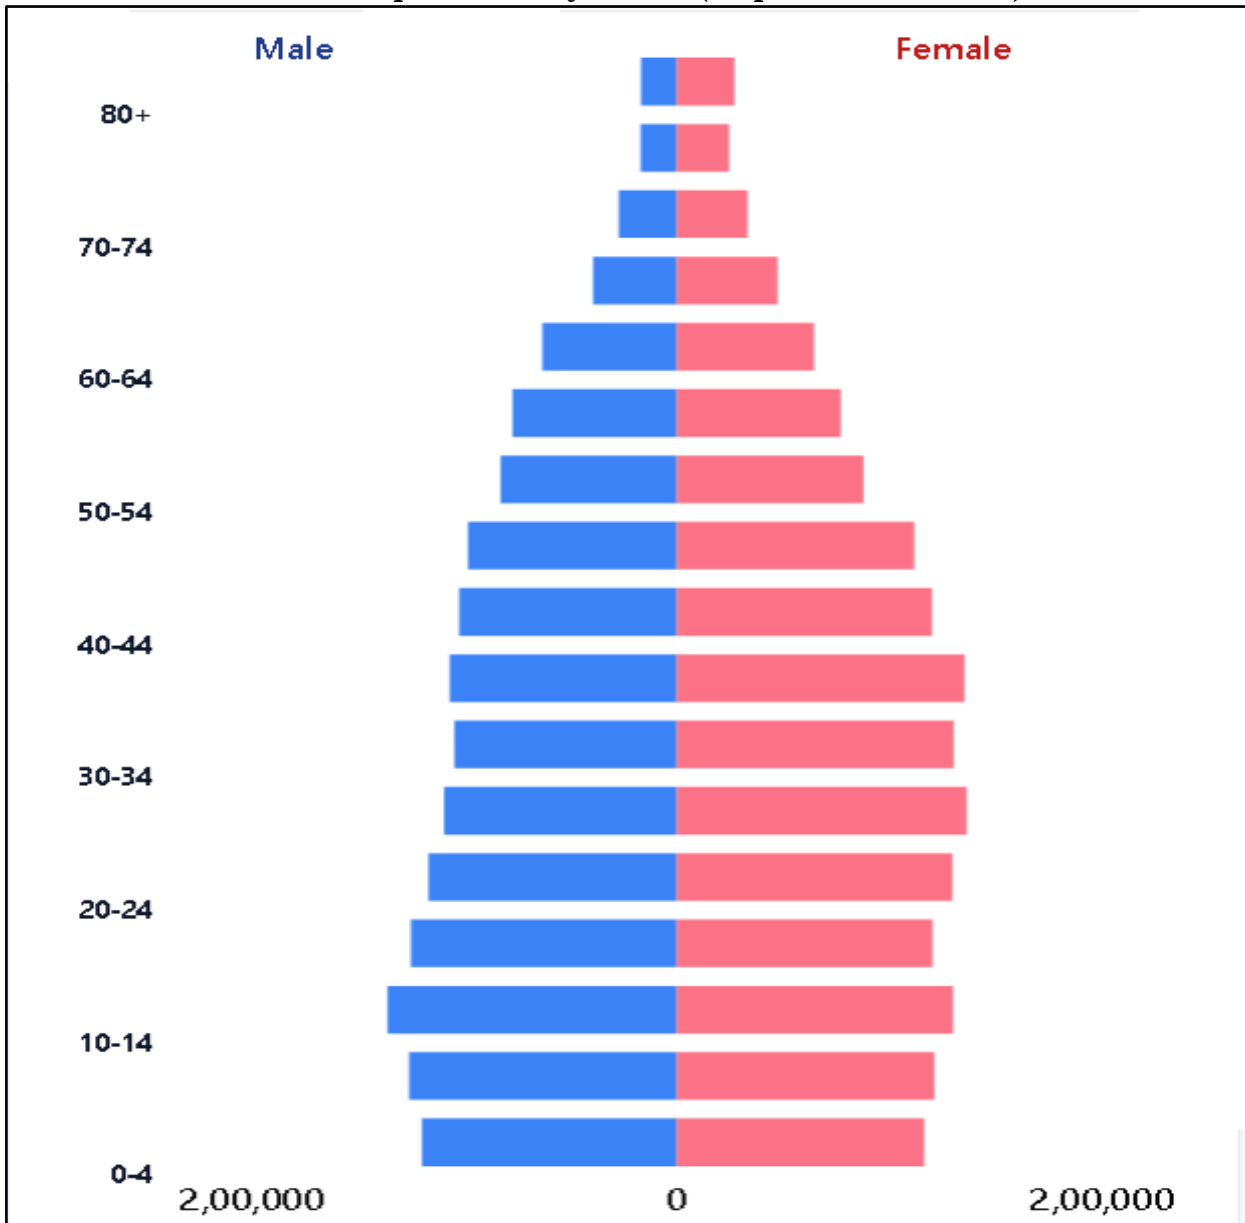

Certain population groups need priority healthcare & are at higher risk of severe illness, complications, and mortality during pandemics. Patients with chronic diseases, those requiring regular medical care, and individuals with mobility or functional limitations face challenges in accessing timely care during emergencies. Mapping these groups helps in prioritising continuity of treatment, medicine stock planning, oxygen support, referral transport, and targeted home-based care.

Table 5- Clinical vulnerability

Pandemic Management Plan

Table 5- Clinical vulnerability	
Description	Details in numbers
Pregnant women	20916
Lactating mothers	43460
Bedbound patients	9441
Patients under palliative care other than bedbound	21681
Patients on Haemodialysis	2569
Patients on CAPD	3378
Cancer patients (currently on treatment)	5061
Haemophilic patients	710
Mentally challenged	5978
Differently abled	14710
Diabetic patients	204815
Hypertensive patients	254136
TB patients	9867

INFRASTRUCTURE & RESOURCE INVENTORY

Roads & Railway

Kozhikode district boasts an extensive transport network featuring ~77 km of National Highways (NH 66) and over 1,200 km of total roads connecting key taluks like Vadakara and Koyilandy. Major rail lines connect Kozhikode to major cities (Kochi, Bangalore, Chennai) via the Southern Railway, with the main station (CLT) handling over 100 trains daily.

Road Network

- National Highways: The main artery is NH 66 (formerly NH 17), running parallel to the coast and connecting the major municipalities of Kozhikode, Koyilandy, and Vadakara.
- State Highways (SH): Key routes include:
 - SH 54: Connects Kozhikode city to Kalpetta (Wayanad).
 - SH 38: Connects Puthiyangadi to Chowa (Kannur).
 - SH 34: Links Koyilandy to Edavanna.
 - SH 68: Runs from Kappad to Adivaram

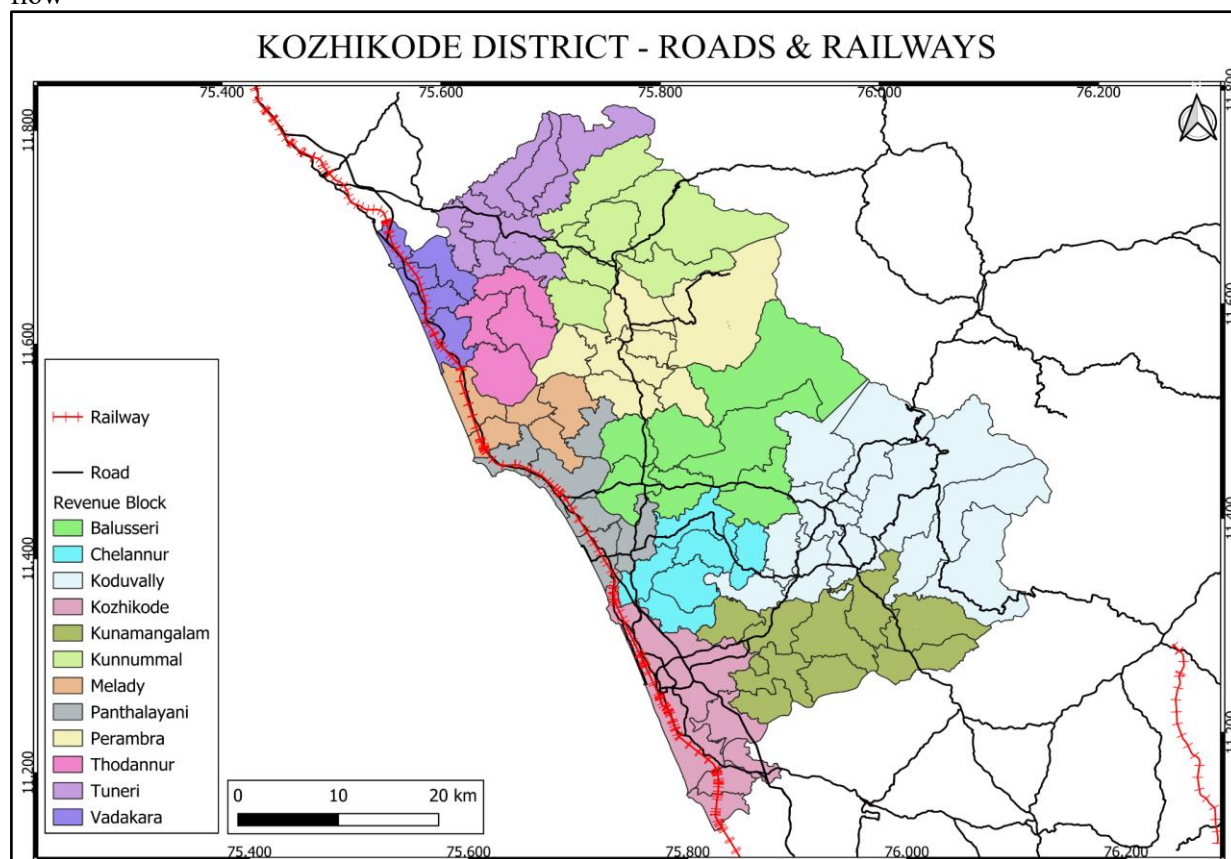

Figure 8- Roads

Rivers

Kozhikode is drained by several significant rivers, primarily the Chaliyar, Kuttiyadi, Mahe, Kadalundi, Kallayi, and Korapuzha. These rivers generally flow westward from the Western Ghats into the Arabian Sea.

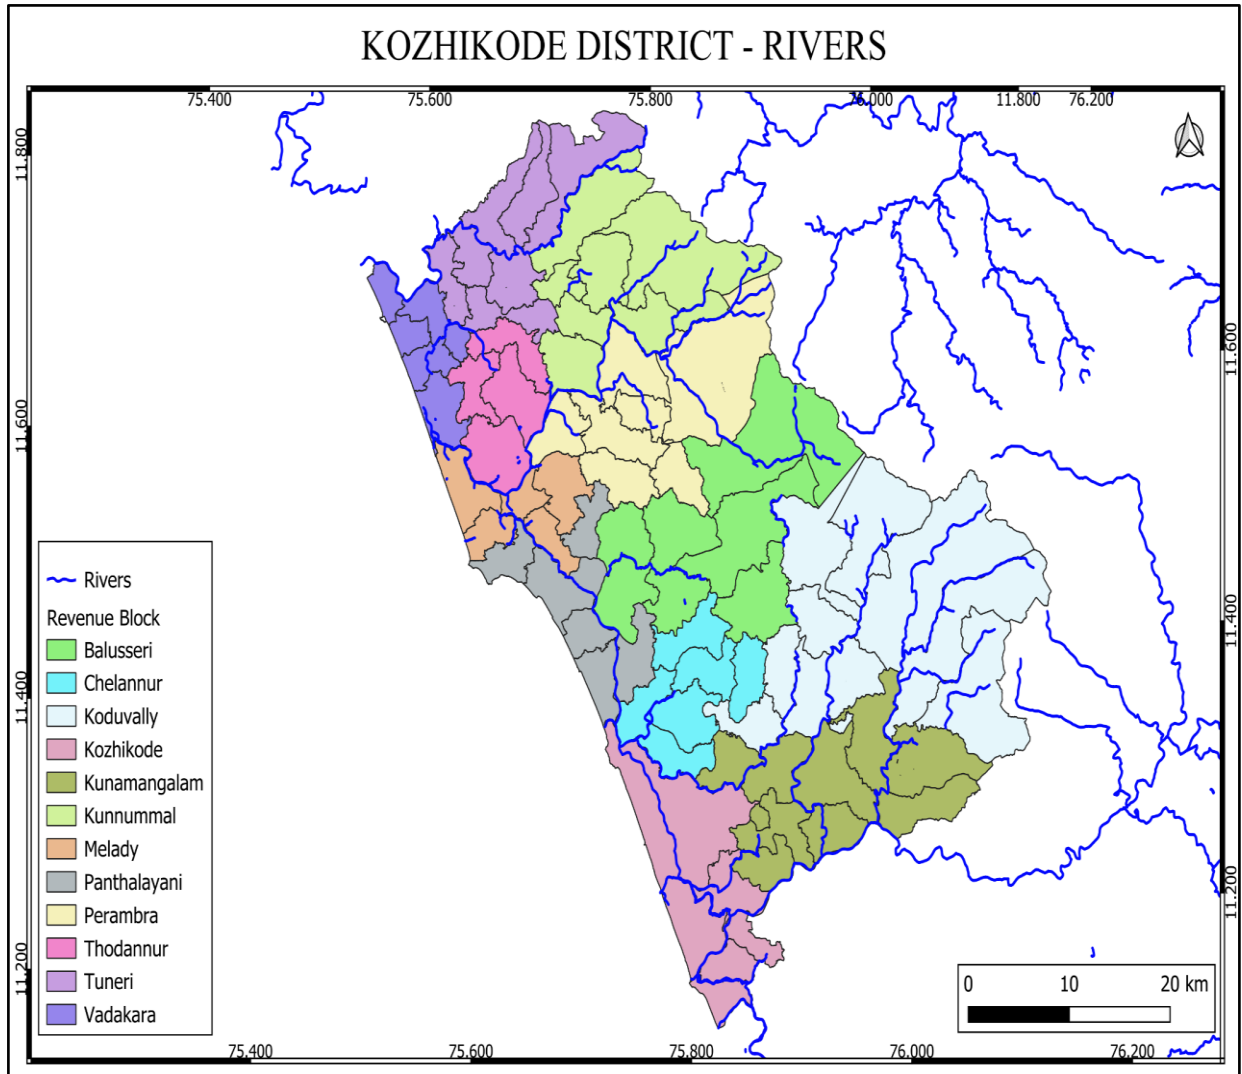

Figure 9- Rivers

Pandemic Management Plan

HEALTH FACILITY DIRECTORY & BASIC CAPACITY IN THE DISTRICT

This section provides an overview of the healthcare infrastructure available within the district area. It outlines the distribution and basic capacity of health facilities that form the backbone of service delivery during routine times and public health emergencies

Family Health Centres (FHCs) and Community Health Centres (CHCs) generally function as the first point of contact for the community, providing essential outpatient and inpatient services. General Hospitals (GH) and Medical College Hospitals (MCH), where accessible, serve as the main referral centres for advanced diagnostics, specialist care, and critical services during public health emergencies. This inventory helps identify existing strengths, gaps, and potential surge capacity that can be mobilised during a pandemic or disaster.

PRIVATE CLINICS

Private clinics are an essential part of pandemic preparedness, as they are often the first place people seek care when symptoms begin. In many communities, private clinics manage a significant share of outpatient visits and therefore play a critical role in early case detection, timely referrals, and disease surveillance. Having an up-to-date understanding of where these clinics are located, the services they provide, and how they are linked to the public health system helps ensure that no cases are missed during an outbreak. It also allows health authorities to engage private practitioners more effectively for reporting, risk communication, and coordinated response, strengthening the overall capacity of the health system to manage public health emergencies.

Healthcare Education & Training Institutions

This section tracks the educational infrastructure available, which is vital for human resource planning in the health sector.

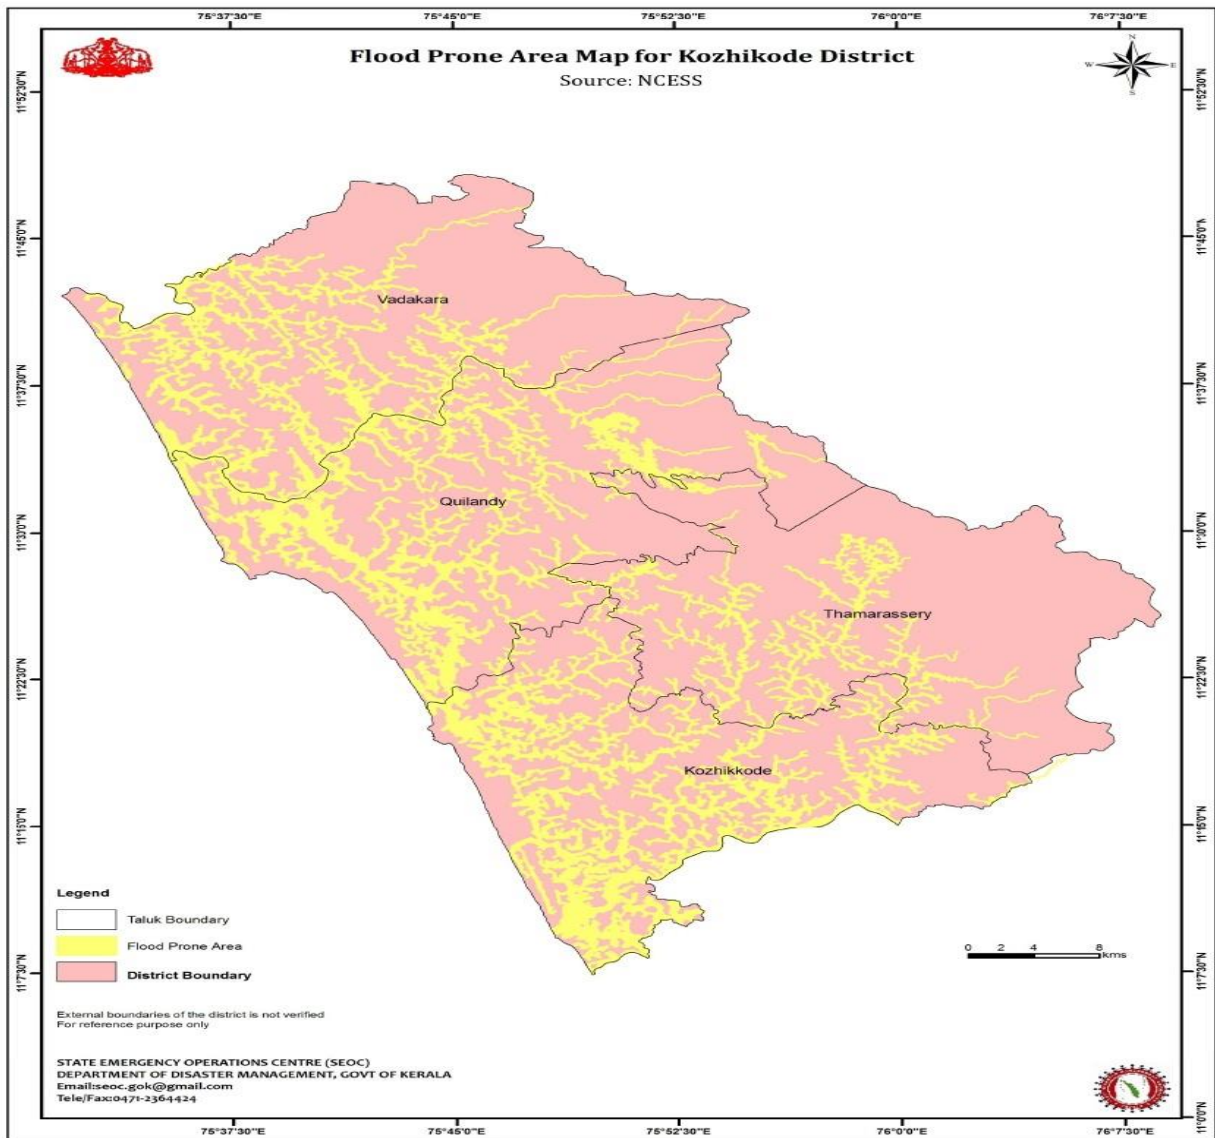

Table 9-educational infrastructure

Category of Institution	Govt	Private	AYUSH	Total
Medical Colleges	1	2	0	3
Nursing Colleges	2	12	0	14
Dental Colleges	1	4	0	5
Para-medical / Allied Health	1	11	0	12
Pharmacy Colleges	1	4	0	5

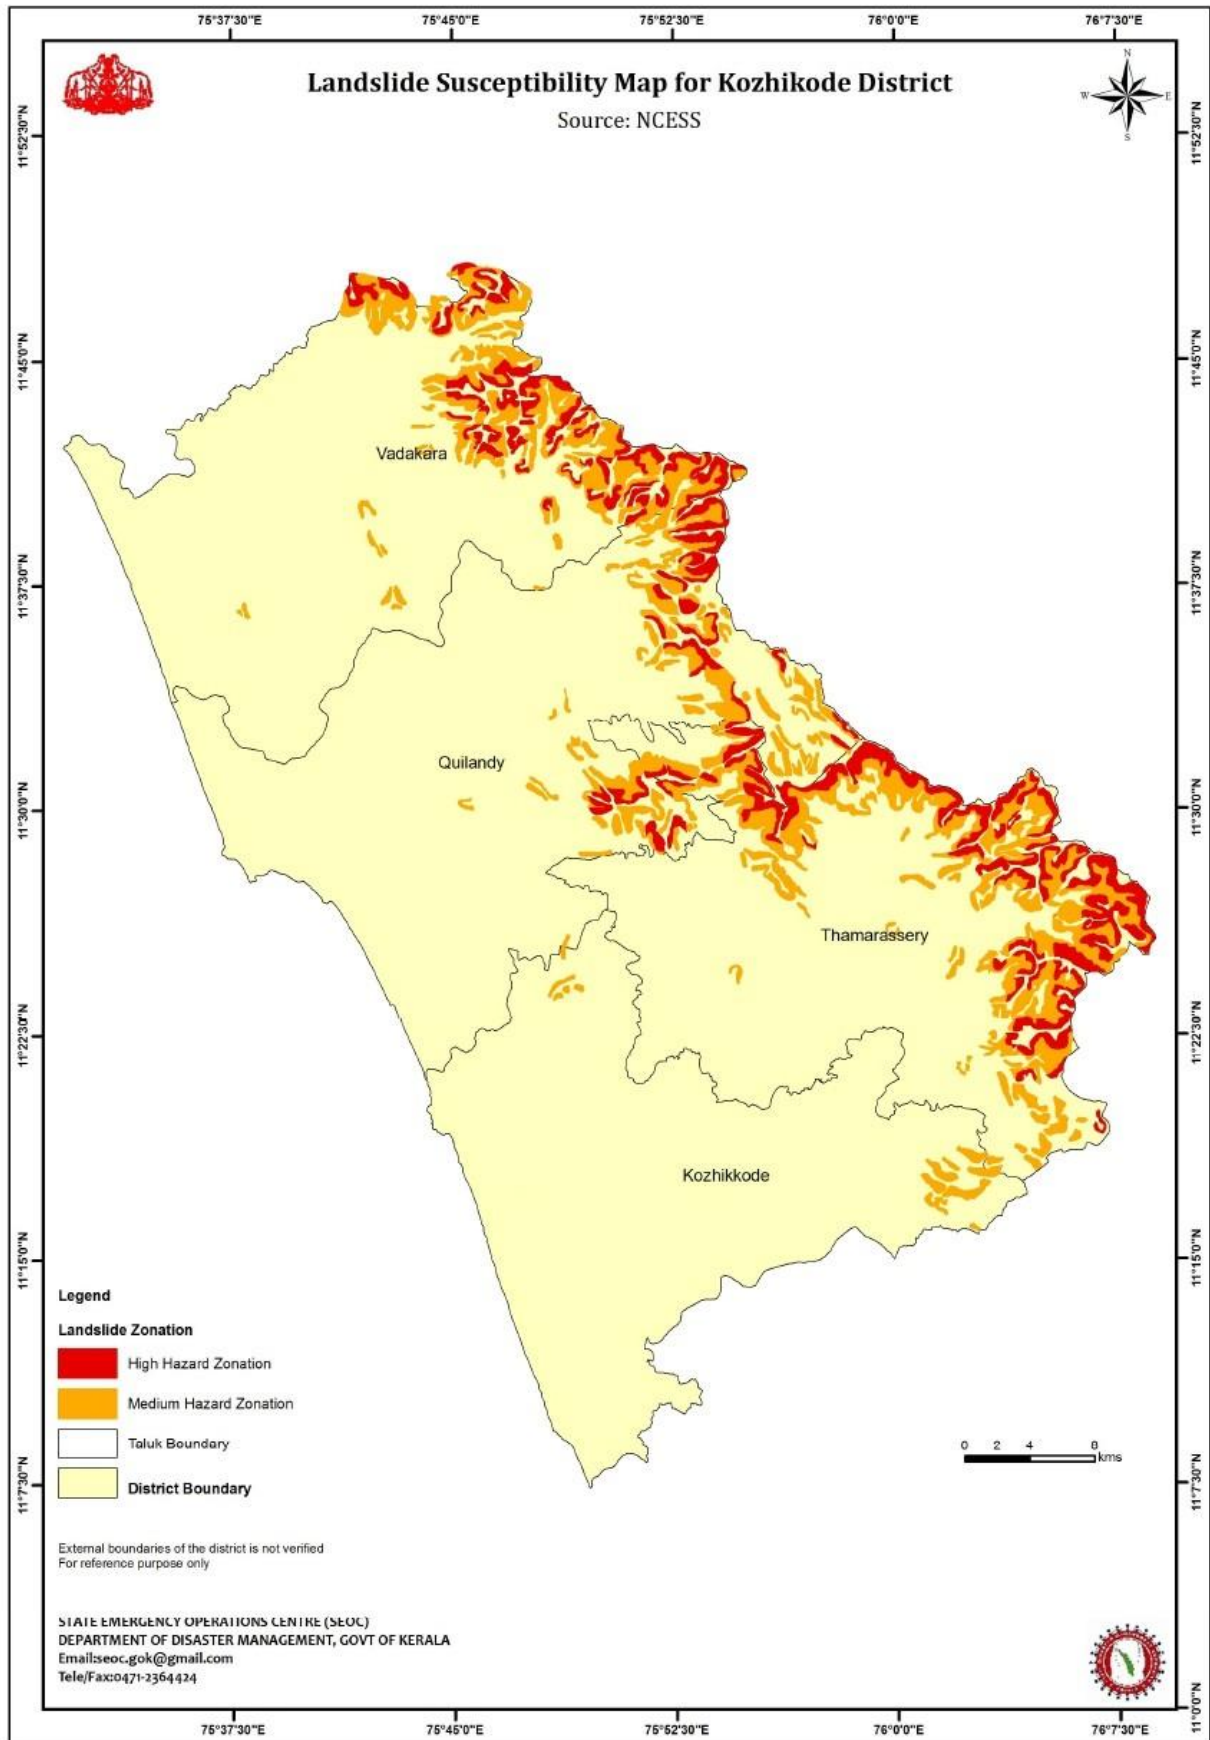

Pandemic Management Plan

SPECIALISED SERVICES & EMERGENCY INVENTORY

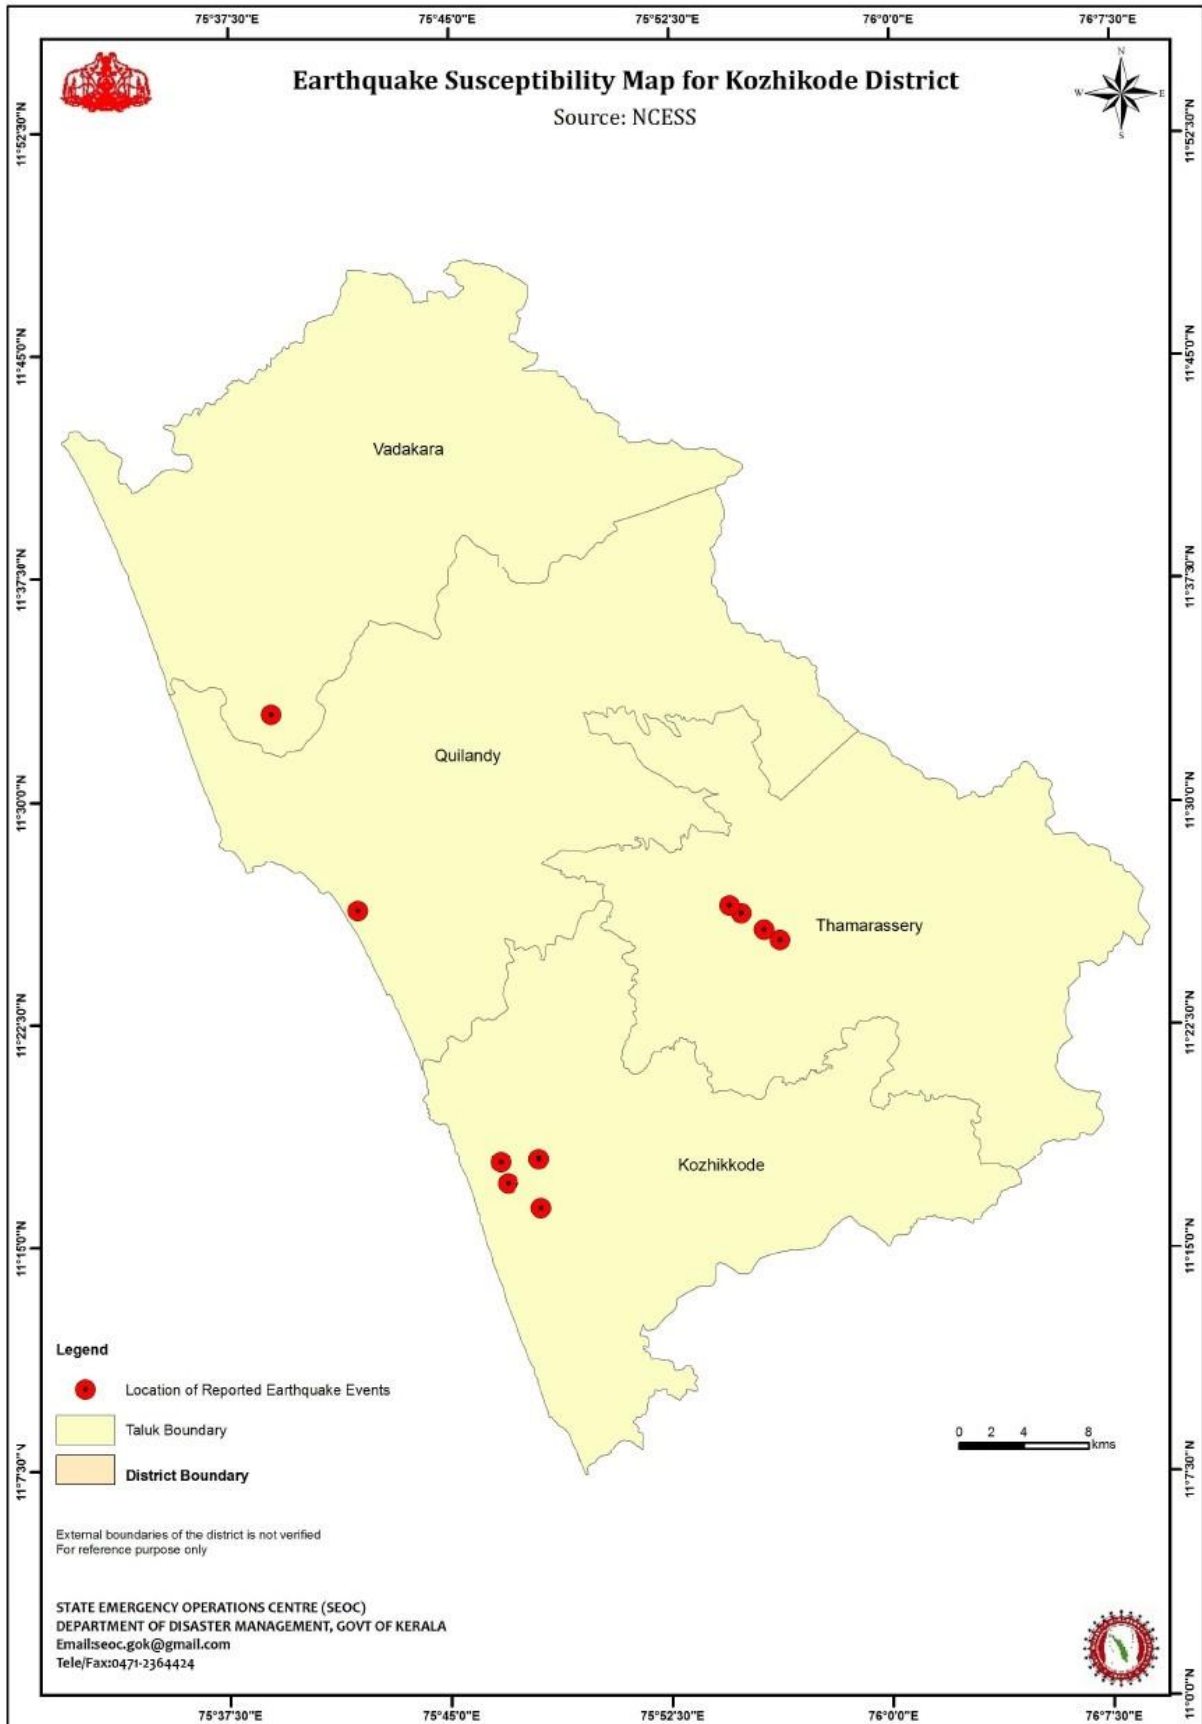

Different parts of the district are vulnerable to flood, landslides and earthquakes (maps given below). This section provides a detailed view of the specialized medical resources available to the community, focusing on emergency response and critical care capabilities. The following table tracks the vital assets required for managing severe illnesses and emergencies across the Government, Private, and AYUSH sectors.

Pandemic Management Plan

Pandemic Management Plan

Pandemic Management Plan

Item	Govt	Private	AYUSH	Total
Hospital beds	1326	5707	112	7143
Oxygen-generating systems(Y/N)	Yes	Yes	No	Yes

Dispensaries	57	93	75	224
Medical store	66	512	88	647

Pandemic Management Plan

OXYGEN & DIAGNOSTIC CAPACITY

Monitoring oxygen and diagnostic capacity is a critical component of public health preparedness, ensuring that the district can handle both chronic care and sudden surges in respiratory or infectious diseases.

DIAGNOSTICS FACILITY MAPPING AT THE DISTRICT LEVEL

The diagnostic capacity of Kozhikode district represents the "intelligence network" of our healthcare system. The speed and accuracy of disease identification depend entirely on the distribution and technical level of these facilities.

SOCIAL AND COMMUNITY INFRASTRUCTURE FOR THE SURGE PLAN

This table serves as our **logistics and shelter inventory**. By mapping these locations, we can quickly identify where to house displaced citizens, where to set up temporary medical clinics, and how to manage the deceased with dignity during a crisis.

Category	Total Count	Est. Capacity (Persons)
Educational Institutions		
Anganwadis	2622	28556
Schools	1735	252101
Colleges	116	38284
Healthcare Educational Institutions		
Medical colleges (Govt/Private)	3	250
Nursing colleges (Govt/Private)	11	1335
Dental colleges (Govt/Private)	3	200
Paramedical institutes (Govt/Private)	12	1950
Community Gathering Spaces		
Community halls	92	15155
Auditoriums	190	63475
Religious buildings	1820	56934
Vulnerable Group Support Facility		
Destitute homes	11	379
Elderly homes	35	1551
DISTRICT owned other buildings		

Pandemic Management Plan

Mass Fatality Management (MFM) Infrastructure		
Mortuary	4	11
Crematorium	72	143

*refer annexure 1 for contact details

HUMAN RESOURCES

This section focuses on the human capital available within the district. In any emergency—be it a pandemic, flood, or industrial accident—infrastructure is only as effective as the people operating it.

MEDICAL & CLINICAL PERSONNEL

This table tracks the "Frontline" providers responsible for diagnosis, treatment, and clinical management. The largest professional group by a significant margin is Nursing officers, with a total of 4,047 personnel, followed by 2,017 Doctors of Modern Medicine, which is the second-largest group overall serving as primary surge capacity. A detailed directory with the contact numbers of all workers is maintained (**Annexure in 1**).

Cadre	Govt (No.)	Private (No.)	Total
Doctors—Modern Medicine	417	1600	2017
Doctors – AYUSH	128	174	302
Doctors – Veterinary	80	4	84
Doctors – Dental	17	341	358
Nursing officers	492	3555	4047
Lab technicians	164	748	912
Optometrist	32	127	159
Pharmacists	174	714	888
Psychologists	5	57	62
Counsellors	16	50	66

PUBLIC HEALTH & FIELD-LEVEL WORKFORCE

The vast majority of the workforce is concentrated within Health Services. Several roles, including Health Supervisors, Health Inspectors, Jr Health Inspectors, Lady Health Supervisor, Lady Health Inspectors, Epidemiologists, Data Managers, PRO's and Mid-Level Service Providers, operate exclusively within this sector. These individuals are the backbone of surveillance, maternal-child health, and decentralized care.

Pandemic Management Plan

Cadre	Health services	Municipal common services	Total
HS (Health Supervisors)	13	4	17
HI (Health Inspectors)	71	34	105
LHS (Lady Health Supervisor)	14	0	14
LHI ()	62	0	62
JPHN (Jr Public Health Nurses)	344	4	348
JHI (Jr Health Inspectors)	330	29	359
MLSP (Mid-Level Service Providers)	380	0	380
Palliative Nurses	106	4	110
RBSK Nurses	96	0	96
PRO	25	0	25
Epidemiologist	12	0	12
Data Manager	14	0	14

Pandemic Management Plan

COMMUNITY & SUPPORT CADRE

This group represents the surge capacity of the district—people who can be called upon for logistics, rescue, and specialized support.

Cadre	Number
ASHA Workers	1911
AWW (Anganwadi Workers)	2856
Emergency Medical Volunteers (Trained)	3506
Kudumbashree	72866
MNREGS	179406
Purusha Swayam Sahaya Sangham	1627
Ex-Servicemen	4286
Retired Police Officers	2308
NCC/NSS Volunteers	10349
Red Cross volunteers	2134
One Health Community Volunteers	3457
One Health Community Mentors	451

COMMUNITY ORGANIZATIONS

This section details the presence of community-based organisations (CBOs), non-governmental organisations (NGOs), faith-based organisations (FBOs), Kudumbashree Self-Help Groups (SHGs), and Ayalkootams within the Local Self-Government Institution (DISTRICT). These groups enhance grassroots mobilization, resource distribution, and support networks crucial for pandemic response and community resilience.

Category	Total Count
NGOs	781
Religious based organizations	1080
Foreign based organizations	75
Sports Club/youth clubs	1069

Pandemic Management Plan

Category	Total Count
Kudumbashree SHGs	15990
Ayalkootams	15965
Political organizations	610
Residential organizations	1080

ADMINISTRATIVE & EMERGENCY SERVICES

This section outlines the availability of key non-health emergency support services and infrastructure within the district, which are essential for effective pandemic preparedness and response. These facilities support law enforcement, disaster response, water supply, logistics, mobility, and community-level interventions during public health emergencies.

Category	Total Count	Contact details
Police Stations	45	9497996989 (District Police Chief)
Fire & Rescue Stations	9	0495- 2321654 (District Fire office)
Water Pumping Points	961	0471 2738300 (Kerala Water Authority - Kozhikode)
Public Distribution System (PDS)	560	0495-2374798 (District Supply Office, Kozhikode)

Pandemic Management Plan

INFORMATION REGARDING RESOURCES

The availability of essential transport and support resources plays a quiet but critical role in saving lives. Equipment such as ambulances, mobile mortuaries, amphibian ambulances, and motorized boats ensures that patients, samples, and healthcare teams can move swiftly—even in flooded, remote, or difficult terrains. Heavy vehicles like JCBs, cranes, tractors, and torus lorries support logistics, waste management, emergency infrastructure, and rapid conversion of spaces into care or isolation facilities. Taxis, four-wheel-drive vehicles, and trucks help maintain continuity of essential services, reach vulnerable populations, and support home-based care and supply delivery.

Means of transportation	Total Count
JCB	488
Crane	101
Heavy Trucks	507
Tractor	131
Ambulances	265
Mobile mortuaries	31
Boats	1463
Taxi service	2920

Note: For specific details regarding vehicle owners and contact information, please refer to **Annexure [X]**.

Pandemic Management Plan

ONE HEALTH & ENVIRONMENTAL SURVEILLANCE

The One Health method integrates environmental, animal, and human health to enable proactive pandemic preparedness. Panchayat-level surveillance needs to be improved to detect and treat zoonotic and environmentally transmitted diseases early. Surveillance is strengthened through systematic assessment of animal populations, veterinary infrastructure, poultry and slaughter facilities, intersectoral coordination, and specialised tools, such as GIS-based avian influenza seasonality mapping from previous outbreaks to enable predictive alerts and ward-specific sampling to support effective pandemic preparedness.

Animal & Bird Population

Mapping animal and bird populations at the Panchayat level is essential for identifying and prioritising zoonotic disease hazards such as rabies, avian influenza (H5N1), leptospirosis, anthrax, and Nipah-like spillover events. Risk classification, targeted surveillance, vaccination planning, and early epidemic detection made feasible by comprehensive population mapping all enhance One Health-based pandemic preparedness.

Category	Item	Estimated Population	Wards
Animal Population	Livestock (Cattle/Goats/Buffalo)	66447	All LSGIs
	Pet Animals (Dogs/Cats)	92953	All LSGIs
	Stray Dog Population	20105	All LSGIs
	Pig Farms (Number of heads)	5377	Vanimal, Koorachundu, Chakkittappara, Narippatta, Kavilumpara, Thiruvambadi, Kattippara, Kodanchery, Puthuppady, Kodiyathoor
	Small Units (Sheep / Goats – clustered)	2731	Ulliyeri, Azhiyoor, Kayanna, Narikkuni, Thikkodi, Payyoli, Kavilumpara
Bird Population	Poultry Units (Birds)	41592	All LSGIs
	Poultry- (FOWL)	253206	All LSGIs
	Wild/Migratory Birds (Observed)	1981	Purameri, Thuneri, Balussery, Chakkittappara, Changaroth, Kayanna, Nanmanda, Thikkodi, Chemancheri, Moodadi, Koyilandy, Kayakkodi, Kuttiady, Kadalundi, Puduppady, Chathamangalam, Mavoor
	Crow Mortality Events (Reported)	10	Koyilandy, Kuttiady, Purameri

The main risk of zoonotic diseases is there in all the LSG as at least one of the animal population is present in all the LSGs. The stray dog population in market areas, fish landing sites, and bus stations remains a substantial challenge for rabies surveillance and bite prevention. There is a considerable risk of avian influenza introduction and amplification during November - December due to the seasonal presence of

Pandemic Management Plan

migratory and resident water birds near ponds/canals/rivers/backwaters/paddy fields. Clusters of pig farms and animal shelters vulnerable to flooding further raise the risk of leptospirosis and other zoonoses mediated by the environment, especially during monsoon floods.

VETERINARY INFRASTRUCTURE

Veterinary institutions are a core pillar of One Health surveillance, enabling early detection of zoonotic diseases through vaccination, investigation of unusual animal illnesses or deaths, sample collection, and timely outbreak reporting. A well-mapped and responsive veterinary network strengthens coordination with human health and district systems, ensuring rapid response during zoonotic events and pandemics.

Facility Type	Total No.
Veterinary Dispensary	74
Veterinary Hospital / Polyclinic	11
Private Veterinary Clinics	3
Mobile / Emergency Vet Service (incl. night services)	3
Pet Homes / Animal Shelters	70
Slaughterhouse-linked Veterinary Inspection Unit	1

VETERINARY DOCTORS & WORKFORCE

Early detection, diagnosis, reporting, and reaction to animal illness epidemics depend on the availability and accessibility of qualified veterinary specialists. By identifying unusual animal morbidity or mortality promptly, collecting samples promptly, and coordinating efficiently with human health and district systems—especially during zoonotic outbreaks and pandemic-prone situations—a clearly defined veterinary workforce enhances One Health surveillance.

Category	Number Available	Type (Govt/Pvt)
Government Veterinary Doctors	46	Govt
Private Veterinary Doctors	4	Pvt
Livestock Inspectors	55	Govt
Livestock Inspectors	1	Pvt
Para-veterinary Staff / Attenders	45	Govt
Para-veterinary Staff / Attenders	1	Pvt
Contract / On-call Veterinary Support (if any)	5	Govt

Pandemic Management Plan

HIGH-RISK INTERFACE POINTS (SURVEILLANCE SITES)

High-risk interface points for zoonotic disease surveillance in Kozhikode district include wetland–livestock–human contact zones, backyard poultry farms, cattle sheds near water bodies, fish markets, and areas of high human–animal interaction such as community slaughter points and migratory bird congregation sites. These are the primary surveillance sites where zoonotic spillover risks are elevated.

Type of Habitat	Type of High risk interface	Geographical vulnerability
Wetlands & Backwaters	Interaction between migratory birds, domestic animals, and humans; contamination of water with animal excreta	Low-lying, water-logged areas prone to flooding; seasonal congregation of migratory birds; poor drainage
Backyard Poultry Farms	Close human–poultry contact; exposure to poultry droppings; mixing of domestic and wild birds	Densely populated residential zones; minimal biosecurity; proximity to open water sources
Cattle Sheds near Water Bodies	Human–livestock contact; contamination of water with urine and feces; rodent presence	Sheds located along canals, ponds, or paddy fields; flooding during monsoon facilitates pathogen spread
Fish & Meat Markets	Handling of raw animal products; exposure to blood, viscera, and waste; high human crowding	Central market areas with inadequate sanitation and waste disposal; attracts rodents and stray animals
Community Slaughter Sites	Direct contact with animal blood and tissues; aerosolization during slaughter	Informal or unregulated slaughter points; lack of drainage; often near residential clusters
Migratory Bird Congregation Areas	Wild bird–environment–human interface; fecal contamination of land and water	Seasonal wetlands, paddy fields, and backwaters; peak risk during migratory season
Rodent-Infested Grain Storage	Rodent–human contact via contaminated food and surfaces; exposure to rodent urine	Poorly maintained storage facilities; humid conditions; proximity to fields and households

Pandemic Management Plan

Category	Total Count	Key Locations (LSGs)
Poultry Farms	351	Balusserly, Panangad, Unnikulum, Koorachundu, Naduvannur, Maniyur, Villiappally, Chelannur, Kakkur, Narikunni, Thurayur, Keezhariyur, Kayakkody, Kavalumpara, Kunnummal, Kozhikode Corporation, Ramanattukara Municipality, Kadalundi, Chakkittapara, Kayanna, Nochad, Thiruvambadi, Kattippara, Kodanchery, Puduppady, Koodaranhi, Madavoor, Omassery, Thamarassery, Chemanchery, Atholi, Kunnamangalam, Chathamangalam, Karassery, Kodyathur, Mavoor, Mukkam Municipality
Backyard / Clustered Poultry Units	8955	Panangad, Unnikulum, Koorachundu, Narikunni, Payyoli, Kuttiadi, Purameri, Olavanna, Kadalundi, Chakkittapara, Changaroth, Thiruvambadi, Puduppady, Koodaranhi, Arikkulam, Koyilandy Municipality
Duck Rearing Units (open water access)	220	Maniyur, Thurayur, Keezhariyur, Changaroth, Puduppady, Arikkulam, Kunnamangalam, Karassery

Live Bird Sale Points	147	Kottur, Thiruvallur, Ayancheri, Maniyur, Villiappally, Narikunni, Thalikulathur, Payyoli Municipality, Thurayur, Kayakkody, Kuttiadi, Kadalundi, Eramala, Onchiyam, Changaroth, Puduppady, Omassery, Thamarassery, Kizhakkoth, Koduvally, Moodadi, Chemanchery, Arikkulam, Kunnamangalam, Karassery, Mukkam
Cattle Markets / Weekly Animal Fairs	4	Panangad, Eramala, Perambra, Koduvally

Pandemic Management Plan

Pet Shops / Breeders	60	Balussery, Panangad, Unnikulum, Naduvannur, Kottur, Maniyur, Kakkodi, Nanminda, Narikunni, Payyoli Municipality, Kayakkody, Kuttiadi, Kunnummal, Kozhikode Corporation, Ramanattukara Municipality, Kadalundi, Eramala, Onchiyam, Changaroth, Perambra, Kattippara, Kodanchery, Puduppady, Omassery, Thamarassery, Koduvally Municipality, Chemanchery, Arikkulam, Kunnamangalam, Chathamangalam
Animal Shelters / Pet Homes	55	Balussery, Kakkodi, Kavilumpara, Kozhikode Corporation, Chemachery
Waste Disposal Sites near Animal Units	0	

ENVIRONMENTAL RISK MAPPING

Environmental risk mapping identifies monsoon- and flood-prone hotspots for vector-borne (dengue, chikungunya) and waterborne (leptospirosis, diarrhoea) diseases, as well as zoonotic diseases, in Kerala's wetlands. Systematic surveillance supports early warnings, targeted interventions, and Panchayat pandemic preparedness.

Waterborne exposure: Flood-prone areas and stagnant water bodies facilitate *leptospira survival*, raising leptospirosis risk.

Traditional practices: Informal slaughter and fish markets lack standardized hygiene, creating *spillover opportunities*.

Pandemic Management Plan

Risk Factor	High-Risk Location	Risk Level
Flood-prone areas	Ayancheri, Kozhikode Corporation, Madavoor, Omassery, Narippatta, Kavilumpara, Kayanna, Koothali	High
Water bodies/wetlands	Naduvannur Grama Panchayat, Kozhikode Corporation	High
Solid waste accumulation	Kozhikode Corporation	High
Animal waste disposal issues	NA	High
Rodent infestation zones	Kozhikode Corporation	High
Industrial effluent discharge	Kattippara Grama Panchayat	High
Construction sites / abandoned buildings	Panangad Grama Panchayat	High
Poor drainage/blocked canals	Kozhikode Corporation, Kayakkody	High
Drinking water source contamination risk	Kayakkody Grama Panchayat	High

DISEASE SEASONALITY MAPPING

- 1, Flooding & waterlogging → amplifies leptospirosis, malaria, diarrheal diseases.
- 2, Migratory bird influx (Nov–Feb) → avian influenza risk.
- 3, Mosquito breeding cycles → vector-borne disease peaks in monsoon.
- 4, Agricultural practices → close human–animal contact in paddy fields.

Disease	Peak Risk Season	Key Drivers	High-Risk Locations	Surveillance Focus
Avian Influenza	November to March	Migratory Birds, Poultry density	Wetlands, live bird markets, backyard poultry farms Eg: Cherandathoor, Mundakkara, Anjolimukku, Kadalundi bird sanctuary..	Poultry mortality, migratory bird die-offs, influenza-like illness in handlers
Leptospirosis	Monsoon and Post Monsoon	Flooding, rodent contamination, poor sanitation	Waterlogged areas, paddy fields, slums Eg: Elayidam, Vevam, Punoor, Manipuram, Ayanchery, Kurunthody,	Acute febrile illness, jaundice cases, high-risk occupational exposure

Pandemic Management Plan

Disease	Peak Risk Season	Key Drivers	High-Risk Locations	Surveillance Focus
			Narikkunni, Kakkodi, Kinaloor, Kavumthara, Chorod, Kurukkilad, Payyoli, Narakkode, Kappumala, Chathanparambu, Cherukad, Nochad, Koyilothumpadi, Kaduppini	
Dengue/Chikungunya	Monsoon and Post Monsoon	Stagnant water, urbanization, vector breeding	Urban areas, construction sites, water storage containers Eg: Chekkiad, Thuneri, Chembukadav, Poovara estate, Ayancheri, Narikkuni, Iyyad, Kakkayam, Eramara, Kunnummakkara, Kozhipuram, Peringattil, Palliyath, Kavilumpara, Chakkittappara, Moodadi	Fever with rash/joint pain, clustering of cases, vector indices
Acute Diarrheal Diseases	Summer and Monsoon	Unsafe water, poor sanitation, food contamination	Slums, flood-affected areas, mass gatherings, beach areas, festivals. Eg: Vanimal, Elayidam, Thondimmal, Madavoor, Maniyad, Thikkodi beach areas, Kuttiady, Perambra	Diarrhea clusters, dehydration cases, water quality monitoring
Rabies	Year round	Stray dog population	Areas with high stray dog density, Near slaughter houses, market areas, bus stands, construction sites.	Animal bite cases, post-exposure prophylaxis, suspected rabies deaths
Anthrax (rare)	Dry season	Contact with infected animals, contaminated soil/products	Grazing fields, livestock handling areas	Sudden animal deaths, cutaneous lesions, occupational exposure

VULNERABILITY MAPPING

Vulnerability mapping pinpoints high-risk populations, occupations, and areas exposed via environment, livelihoods, socio-economics, and poor service access. Paired with environmental/seasonality mapping, it enables risk-based surveillance, targeted actions, and optimal resource use in One Health and pandemic planning.

Pandemic Management Plan

Vulnerability Factor	High-Risk LSGs	Other Key Groups / Locations	Risk Level
Flood-Prone Households	Ayancheri, Panangad, Kozhikode Corporation, Chakkittapara, Kayanna, Koothali	Tharoppoyil, Mukkadathum Vayal, Tharoppoyil, Thiruthiyadu, Aviyil Parambu, Thottolipadam, Thonichira, Mankunipadam, Karuvanavayal, Vellilavayal, Chelavoor, Thazhathuvayal, Chembra, Manikilukki	High
Wetland-Adjacent Communities	Panangad, Chakkittapara	Thazhathuvayal, Wards 17-19,12,13	High
Backyard Poultry / Duck Rearing Households	Panangad	All Wards – (Poultry Farmers)	High
Slaughterhouse & Meat Market Workers	Narikunni	Meat Stalls; Local Slaughter Points; Butchers	High
Fisherfolk & Fish Market Workers	Narikunni, Kadalundi	Coastal/Riverine Fishing Communities; Fish Landing Centers; Fish Markets (Wards 1,2)	High
Sanitation Workers	Thalakuathur Narikunni	Waste Handlers; Drain Cleaners; Septic Tank Workers; Municipal Sanitation Staff	High
Daily Wage/Migrant Workers	Narikunni	Construction, Informal Labor Clusters	
Elderly & Chronically Ill Populations	Thalakuathur Narikunni Nanminda	Home-Based Vulnerable Population Bedridden Elderly; Ncd Patients (Dm, Ht); Palliative Care Patients	High
Pregnant Women	Thalakuathur Narikunni	Anc Registered Women Registered Anc Mothers; High-Risk Pregnancy Cases	High
Children (Schools, Anganwadis)	Nanminda Chakkittapara	Educational Institutions & Icdis Centers Muthukad	High
Limited Access To Safe Water & Sanitation	Chakkittapara	Muthukad,Alampara,Kulathumthar	High

Pandemic Management Plan

EPIDEMIOLOGICAL TRENDS (2021–2025)

Disease surveillance is the systematic collection, analysis, and interpretation of health data for planning, implementation, and evaluation of public health practice. This section presents the disease surveillance profile of the DISTRICT based on routine reporting systems and outbreak investigations to identify priority diseases, seasonal patterns, and emerging public health threats.

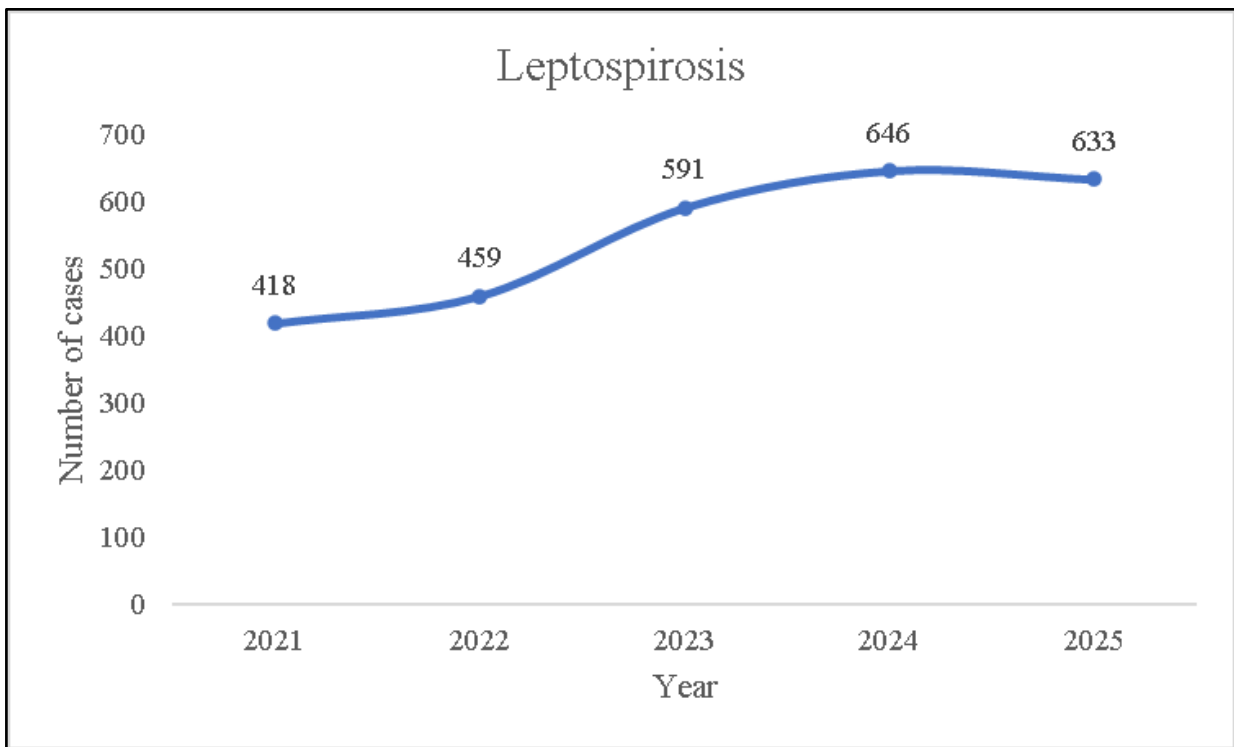

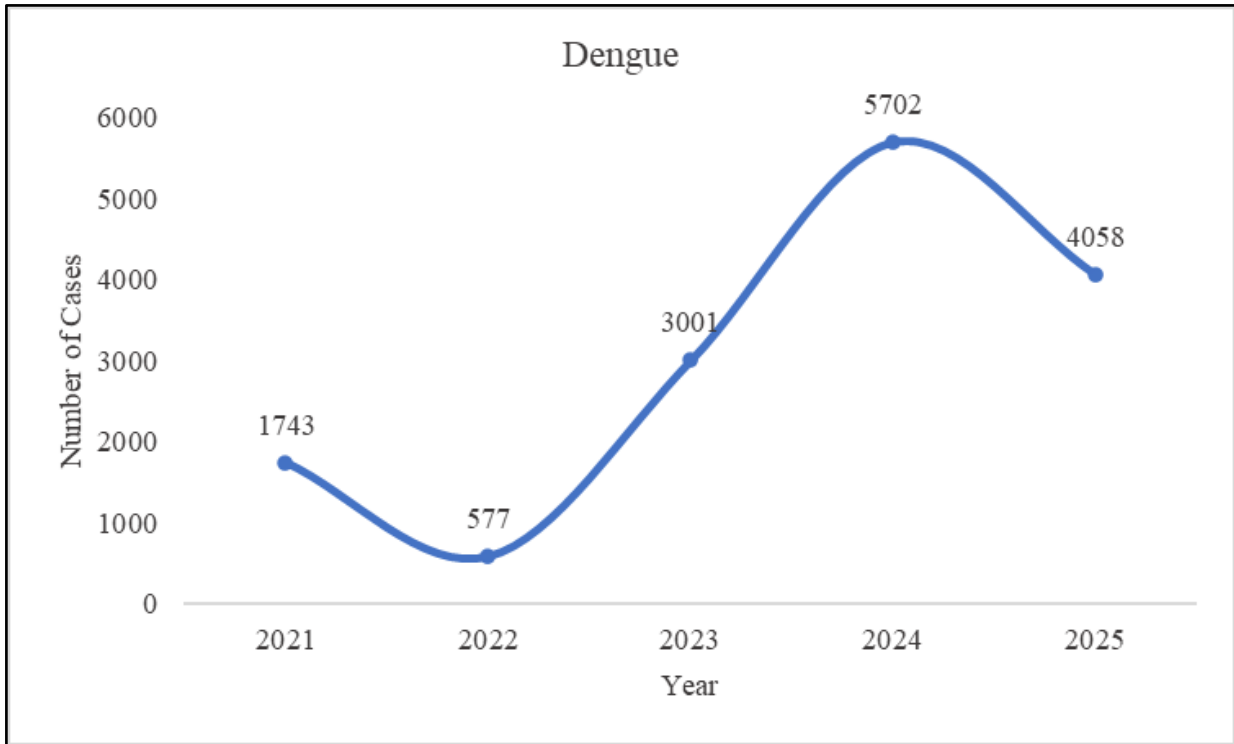

DISEASE BURDEN AMONG HUMAN BEINGS(LAST 5 YEARS)

Analysis of disease-wise data for the last five years helps identify persistent public health problems, emerging diseases, and changes in disease burden. This information supports prioritisation of prevention, preparedness, and response activities at the Panchayat level. Over the five years, most communicable diseases like dengue, leptospirosis, Hepatitis A, Malaria etc show an increasing trend.

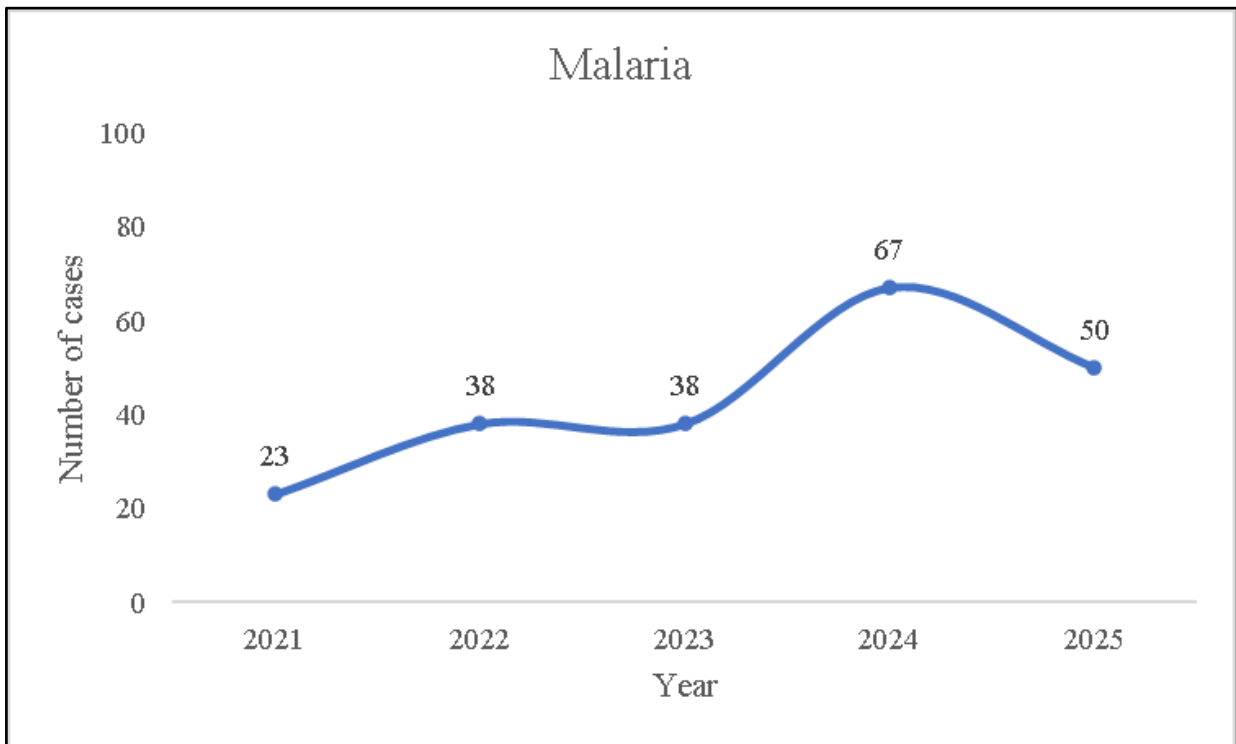

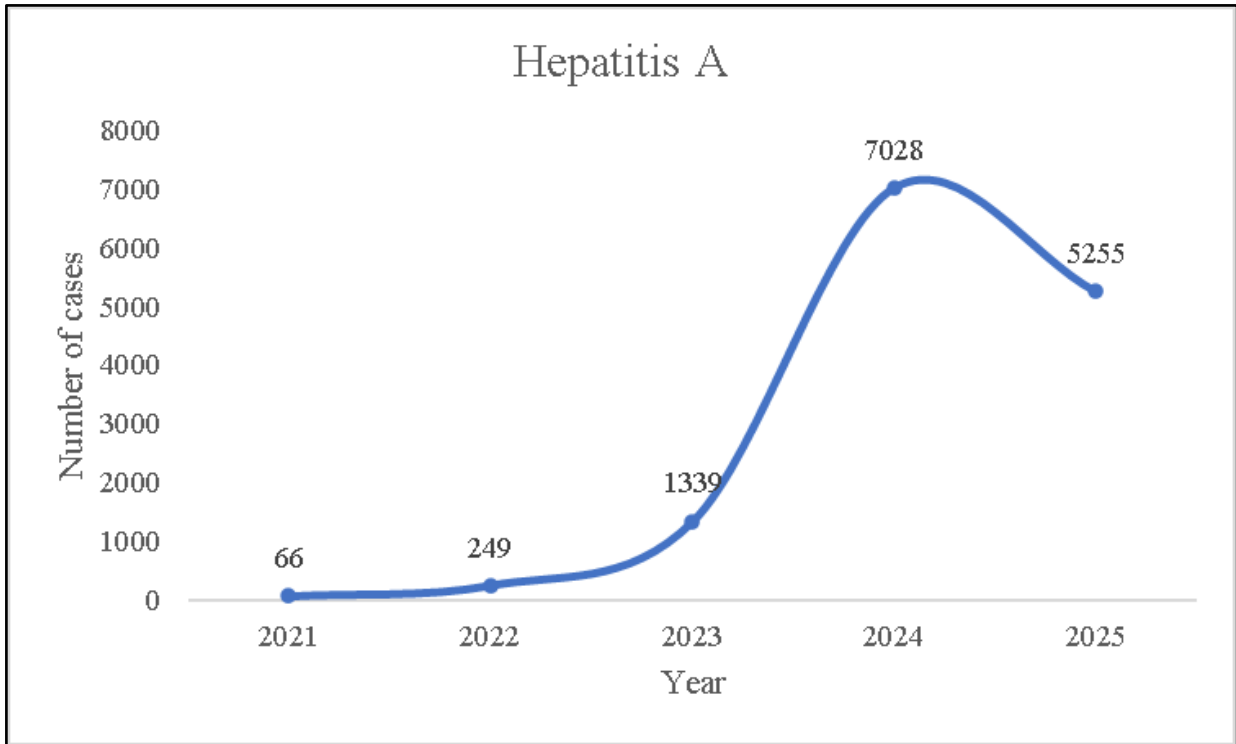

Disease	2021	2022	2023	2024	2025	Trend(Increasing/Stable/Decreasing)
Dengue	1743	577	3001	5702	4058	Increasing
Leptospirosis	418	459	591	646	633	Increasing
Hepatitis A	66	249	1339	7028	5255	Increasing
Malaria	23	38	38	67	50	Increasing
Scrub Typhus	23	53	60	36	53	Stable
Typhoid	10	53	75	258	175	Increasing
H1N1	5	43	217	242	77	Decreasing
H3N2					20	
ADD	22114	46882	53968	53968	47954	Increasing
Mumps	11	24	41	12284	3210	Decreasing
Measles	1	1	84	96	6	Decreasing
Hepatitis B	56	63	49	59	392	Increasing
Hepatitis C	29	30	35	36	119	Increasing
Tuberculosis	2260	2447	2182	2107	1998	Stable
Leprosy	32	56	46	36	49	Stable
COVID-19	472909	127619	3553	179	131	Decreasing

The following graph shows the year wise trend of major communicable diseases. Cases of Dengue fever, leptospirosis, Hepatitis A and Malaria were highest in 2024.

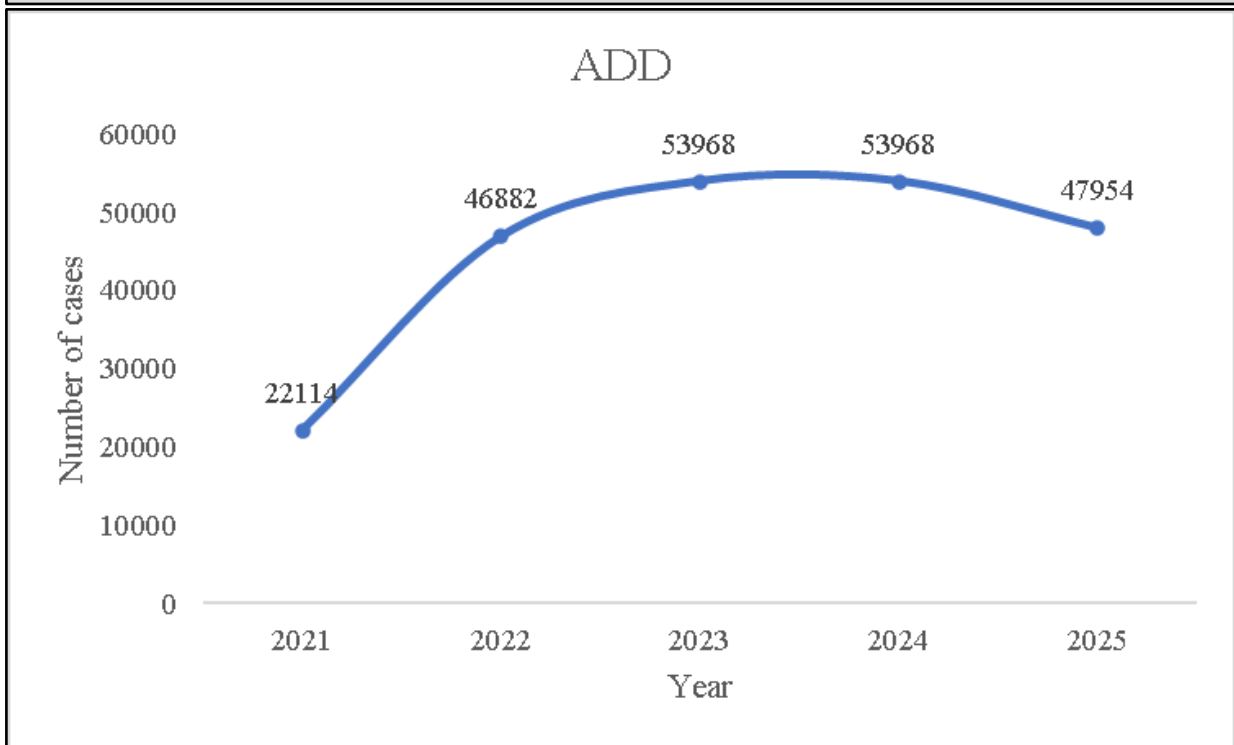

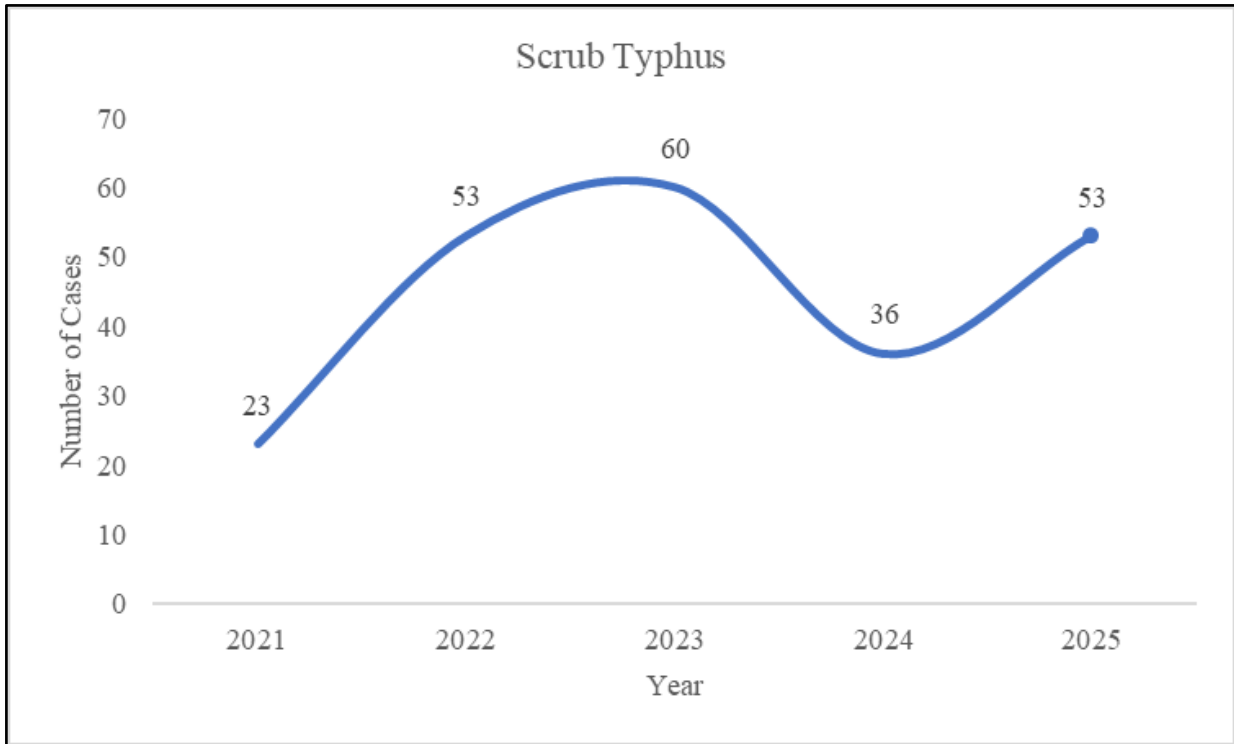

Pandemic Management Plan

Pandemic Management Plan

Pandemic Management Plan

SEASONAL TREND ANALYSIS

Seasonal analysis helps anticipate surges (e.g. dengue in monsoon, leptospirosis after floods, influenza in cooler months) and plan pre-emptive vector control, stockpiling of IV fluids, and awareness campaigns at Panchayat level.

DENGUE

Dengue is a major seasonal vector-borne disease strongly associated with rainfall, water stagnation, and increased mosquito breeding during the monsoon period.

Peak: July–November

DENGUE – LSG-WISE YEARLY DISTRIBUTION (2021–2025)

OUTCOME-BASED TREND ANALYSIS- 2025

Dengue Cases spiked dramatically in the second quarter, reaching a yearly high of 875 cases in June, Leptospirosis cases shows a sustained increase began in May (27 cases) and climbed steadily through August, likely corresponding with periods of high rainfall or flooding, unlike other seasonal diseases, Hepatitis A started the year with high numbers, maintaining over 500 cases monthly from January through March.

Pandemic Management Plan

TRANSMISSION TREND- 2025

For effective management of public health issues, it is important to track the trend of disease transmission mode. It helps identify the population or place at high risk that can be used to predict outbreaks and implement targeted interventions as quickly as possible. Understanding these kinds of trends enables authorities to allocate resources efficiently and change the strategies adequately based on the trend that follows.

Pandemic Management Plan

Mode of Transmission	No. of cases	No. of Deaths
Vector Borne Diseases	4109	1

ASSESSING CORE CAPACITIES

Key Points:

- **Core Capacities:**

1. Surveillance- We have a total of 682 health facilities (471 health subcenter, 16 community health centers, 82 PHC's and 4 tertiary care hospitals) linked to IHIP. That enables real time data entry & monitoring, early identification of early warning signals which improves overall efficiency in surveillance and outbreak reporting.

2. Laboratory access- For early diagnosis and confirmation of cases we have two major govt. labs in the district - VRDL, Kozhikode and RPHL. That would help to confirm clinical diagnosis without any delay.

3. Clinical surge (beds, oxygen, ventilators, triage)- We have a total of 7143 beds ,2566 oxygen supported beds , 576 ventilator beds and 655 ICU beds in case of any pandemic surge. We also have an oxygen plant in General Hospital Kozhikode (capacity 1000 liter/minute) ensuring continuous supply of oxygen in case of pandemic surge. All the eight tertiary care hospitals (private and public) have established standardized triage systems at entry points. These triage areas ensure early screening, risk categorisation (mild, moderate, severe), and appropriate referral or admission, thereby enabling effective utilization of critical care resources such as ICU beds and ventilators.

4. Supply chain- The supply chain managed by Kerala Medical Services Corporation Limited (KMSCL) in Kozhikode operates through a centralized district hub that feeds into the city's vast network of government hospitals and health centres. While headquartered in Thiruvananthapuram, KMSCL maintains a dedicated local infrastructure to ensure the 24/7 availability of life-saving medicines and equipment across the district. The backbone of the local supply chain is the District Drug Warehouse (DDW), which is located at Karuvannur P.O., Naduvannur. This scientific warehouse is equipped with walk-in cold rooms (2-8 C), temperature-controlled rooms, and high-value stores to manage everything from vaccines to oncology drugs.

5. Risk communication- It is managed through a dedicated District Control Room (often based at the Government Guest House, West Hill). To prevent misinformation, all media communication is routed through a single Media Management Team under the leadership of District Mass Media team. The health department will release a daily "Health Bulletin" (typically by 4:00 PM - 5:00 PM) that freezes data at a specific time to ensure consistency across state and local reports. 24/7 Call Centers will be established in the control room that acts as the primary public interface, answering medical, logistical, and administrative queries.

6. Logistics

- a. Medical Supply Chain & Inventory

The KMSCL manages the procurement, but the district level handles the "last-mile" delivery.

- b. Containment Zones

Micro-Containment: Instead of district-wide shutdowns, the administration uses containment zone-level lockdowns. Logistics for food and essential medicine delivery within these zones are managed by Rapid Response Teams (RRT) consisting of ASHA, JHI/JPHN and local volunteers (Kudumbashree).

- c. Laboratory & Diagnostic Logistics

Pandemic Management Plan

Mobile BSL-3 Labs: During high-risk viral outbreaks, the district coordinates with the ICMR to deploy Mobile Biosafety Level-3 laboratories. This eliminates the logistical delay of sending samples to Pune or Manipal. For sample transportation, established Hub and Spoke chains are there for the rapid transport of high-risk biological samples from all the areas to GMC Kozhikode.

d. Transportation & Human Resources

Patient Transport: A dedicated fleet of 108 Ambulances via a centralized GPS-tracked dispatch system in the District Control Room.

Workforce Deployment: Using the available HR, the district uses an emergency workforce mobilization plan to move personnel to FLTCs/ CFLTCs in case of surge

7. Social support (volunteers, NGOs, welfare schemes)- We have an extensive social safety net, characterised by a high volume of neighbourhood-level organisations. The most significant social assets are the Kudumbashree SHGs (15,990) and Ayalkootams (15,965), which provide a massive framework for community outreach and home-based support. Robust support is also available via 1,080 Religious-based organizations, 1,069 Youth/Sports clubs, and 781 NGOs. Over 1,600 political and residential organizations further bolster the district's ability to mobilize resources during crises.

MAPPING OF EXISTING PLANS AND COMMITTEES

Mapping existing plans, committees, and coordination platforms during a pandemic is a fundamental step in preparedness that ensures a cohesive, rapid, and efficient response. As part of strengthening district pandemic preparedness, the District Emergency Operations Centre (EOC) will be activated. It is the physical and digital location where raw data meets executive decision-making, transforming epidemiological surveillance into actionable logistics.

Committee Harmonization:

Structure of the District Emergency Operations Centre (EOC)

SI No	EOC Position	Designation	Key Responsibilities
1	EOC Director	District Collector / District Magistrate	Overall command and supervision of pandemic response
2	EOC Operations Coordinator	District Disaster Management Officer	Coordination of field operations and response teams
3	Health Lead	District Medical Officer	Overall district coordination, policy direction, resource allocation
4	Surveillance Operations Lead	District Surveillance Officer	Surveillance, data management, analysis & reporting

Pandemic Management Plan

5	Logistics & Supply Coordinator	Deputy Collector / SVO/ Drugs controller	Procurement and distribution of -medicines and equipment
6	Communication Lead	DMO/ District Education & Media Officer	Media briefing, risk communication
7	Law & Order Coordinator	Superintendent of Police Representative	Enforcement of containment zones and movement restrictions
8	Volunteer & Community Support Coordinator	Kudumbashree / NGO Representative	Volunteer mobilisation and community assistance
9	Essential Services Coordinator	Civil Supplies Department	Food distribution, essential commodity supply
10	Coordination Lead	JD- LSGD	activation of local response mechanisms, and coordination with the District Disaster Management Authority (DDMA)

Local Self-Government Disaster Management Committee (LDMC)

The Local Self-Government Disaster Management Committee (LDMC) plays a crucial role in implementing pandemic preparedness and response measures at the grassroots level. Below given is the mapping of the members of the LSG Disaster Management Committee (LDMC) to their specific roles in the Pandemic Task Force.

Structure of the LSG Disaster Management Committee (LDMC)

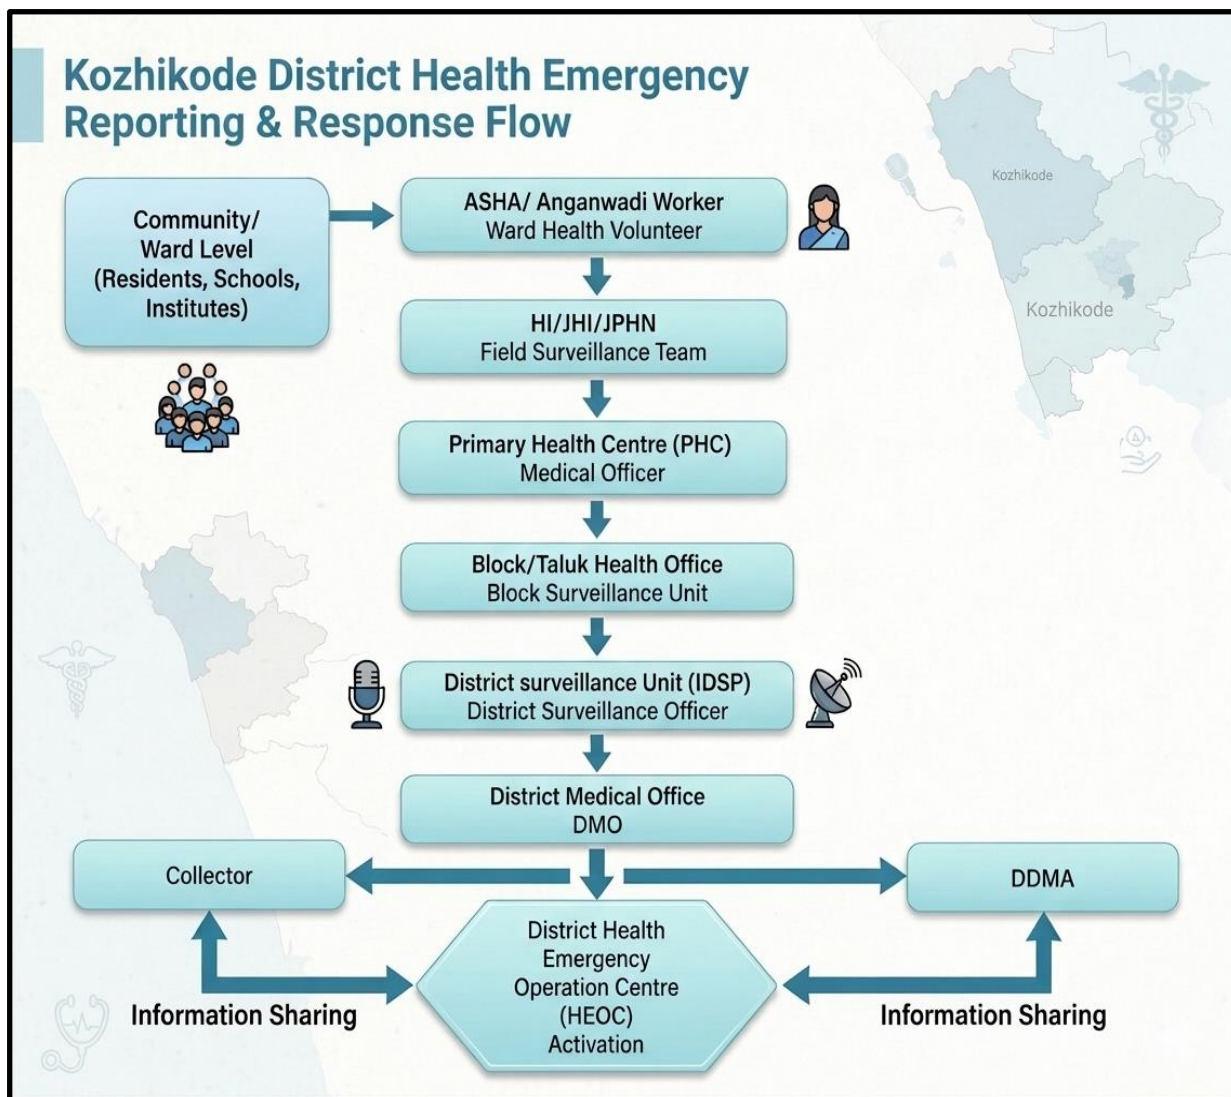

SL No	Designation	Role	Responsibility
1	LSG President / Municipal Chairperson / Mayor	Chairperson - Pandemic Task Force	Overall leadership, activation of local response mechanisms, and coordination with the District Disaster Management Authority (DDMA)
2	Vice President / Standing Committee Chair (Health)	Vice Chairperson	Oversight of response implementation, support to the Chairperson
3	Secretary, Local Self-Government Institution	Incident Coordinator	Administrative coordination, reporting to the District Administration and Health Department
4	Medical Officer (PHC/CHC/Taluk Hospital)	Technical Lead – Public Health	Clinical management, epidemiological surveillance, outbreak investigation

Pandemic Management Plan

5	Health Inspector / Public Health Officer	Surveillance & Field Operations Lead	Disease surveillance, contact tracing, quarantine monitoring
6	Junior Health Inspector / Junior Public Health Nurse	Field Surveillance & Community Monitoring	Household surveillance, health education, and reporting suspected cases
7	ICDS Supervisor	Vulnerable Population Coordinator	Monitoring of pregnant women, children, and nutrition programs
8	Kudumbashree CDS Chairperson	Community Mobilisation Lead	Mobilisation of volunteers, support for home isolation families
9	Ward Members / Councillors	Ward-Level Pandemic Response Coordinators	Local monitoring, awareness generation, and community reporting
10	Police Station Representative	Enforcement & Security Coordinator	Enforcement of containment measures, crowd control
11	Education Department Representative	Institutional Surveillance Coordinator	Monitoring schools and educational institutions
12	Veterinary Officer	Zoonotic Disease Monitoring Lead	Monitoring animal-related disease threats
13	Civil Supplies / Supply Officer	Essential Supply Chain Coordinator	Ensuring an uninterrupted supply of food and essential commodities
14	Water Authority / Sanitation Officer	WASH (Water, Sanitation & Hygiene) Coordinator	Ensuring safe water supply and sanitation measures
15	Social Welfare Officer	Social Protection Coordinator	Support for elderly, disabled, and vulnerable populations
16	NGO / Voluntary Organisation Representative	Volunteer Coordination Lead	Coordination of relief volunteers and community support services
17	Red Cross / NSS / NCC Representative	Emergency Support & Logistics	Assistance in awareness campaigns, relief distribution, and logistics

HEOC Integration

The following flow-chart illustrates the integration from a local, Ward-level signal up to the activation of the District Health Emergency Operations Centre (DHEOC) in Kozhikode. It details the five key stages, from initial community detection to the multi-sectoral response from the DHEOC command. Information flows systematically from Community → PHC → Block / Taluk Health Office → District Surveillance Unit → HEOC, enabling efficient monitoring and decision-making. IDSP Liaison: From each health institution, the concerned Medical officer is responsible for sending daily data to the Integrated Disease Surveillance Programme.

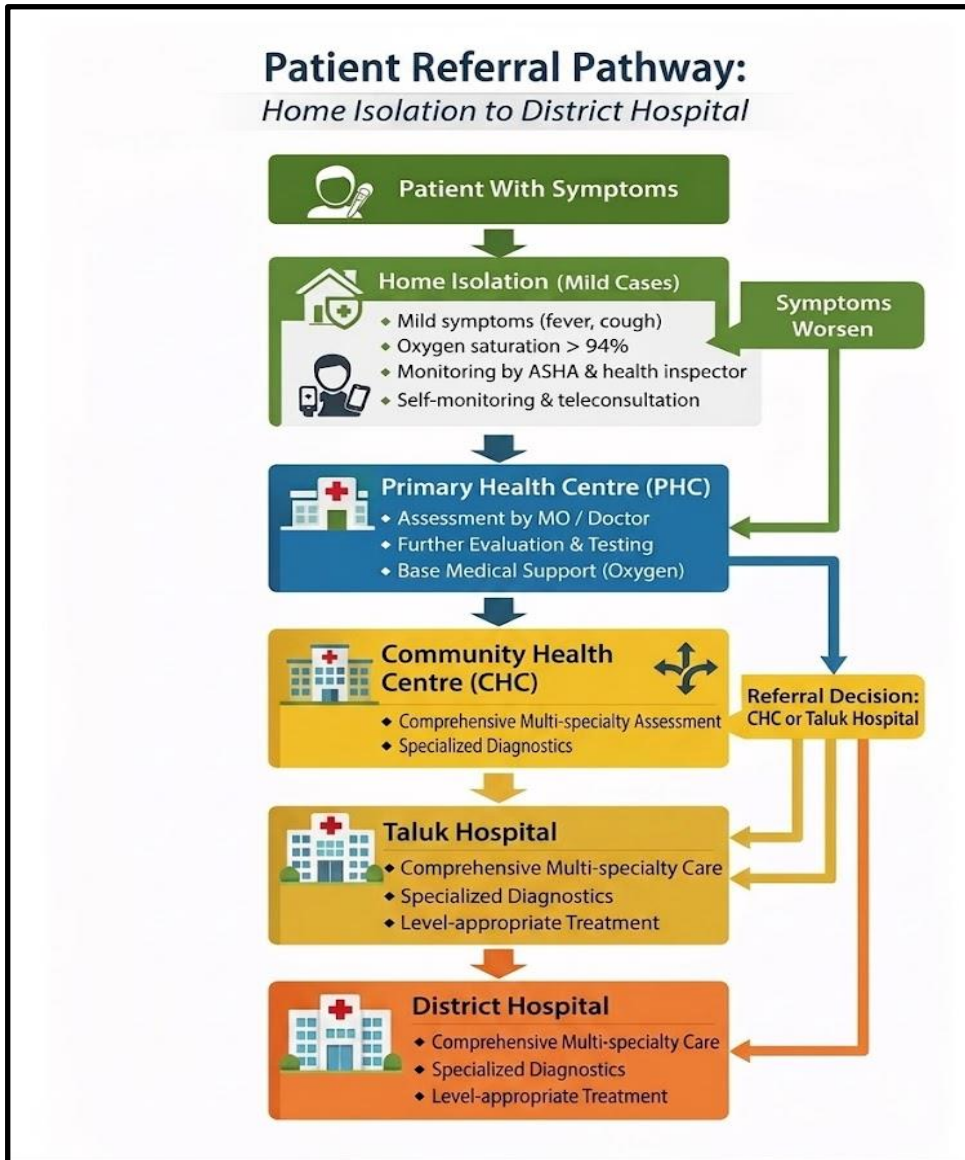

SOP Adaptation: A list of COVID-19 protocols (e.g., dead body management, quarantine rules) that have been formally adopted and simplified for local language use.

Resource Sharing Agreements: Guidelines for effective utilization of ambulance services for the COVID-19 containment is in place.

ASSESSMENT OF CORE CAPACITIES

Clinical Triage Plan: A mapped pathway for how a patient moves from "Home Isolation" to a "Primary Health Centre" to a "District Hospital."

Pandemic Management Plan

Oxygen & Life Support Log: A verified list of local oxygen cylinder suppliers, refilling stations, and the number of oxygen-supported beds available are given below.

Sl No	Name of oxygen supplier agency	Address
1	G&F Surgicals	Hotel Renaissance Building, Behind Malabar Gold, Ram Mohan Road, Chinthavalappu, Kozhikode-673004, Kerala Contact no: 8401570804
2	United Pharma Marketing	Calicut Town, Palayam, Kozhikode-673001, Kerala Contact no: 7942692344
3	Kairali Oxygen Supply	Kairali Gases, Periyambalam, Kozhikode Road, Ramanattukara, Kozhikode-673633, Kerala

Pandemic Management Plan

		Contact no: 7947413543
4	Lifein Medicines	Al Hind Rhazes Building, Opposite New Tops Bakery, Kovoov Medical College Road, Kovoov, Kozhikode-673008, Kerala Contact no: 7942679346
5	Dawa Mahal Medical Center	Naadi Building, Near Mahindra Finance, Wayanad Road, Chungam, Thamarassery, Kozhikode-673573, Kerala Contact no: 7942682549
6	Mancraft Surgicals	P03, Mancraft Surgicals, Near Grama Panchayat Koothali, Perambra, Koothaly, Kozhikode-673525, Kerala Contact No: 7947144184

Sl No	Hospital	ICU beds	Oxygen Supported Beds	No. Of Ventilator Support Beds	No. Of Ambulance s
1	Medical College	309	684	141	3
2	General Hospital	31	359	26	3

32	Afiya River View	4	10	0	1
33	Carewell Hospital	0	5	0	1
34	Jubilee Health Centre	0	10	0	0

Laboratory Logistics

During a pandemic, laboratory logistics shifts from a routine support service to a high-pressure tactical operation. The goal changes from "efficient processing" to "maximum throughput with zero contamination". The "Hub and Spoke" Model for sample transportation is already in place in Kozhikode. The two Hubs are DH Vatakara and GH Kozhikode.

Pandemic Management Plan

Supply Chain Buffer: A 30-day "Minimum Stock Level" (MSL) defined for essential medicines, masks, and sanitizers. The MSL is the standard benchmark used by the KMSCL and district health authorities to trigger replenishment orders before a "stock-out" occurs. The buffer targets (MSL) of Essential Medicines is 30 days, Masks - 45 days and Sanitizers / PPE is 30 days. During active outbreaks (like Nipah or COVID-19), the DMO often raises the MSL to 60 or 90 days for high-priority items. The KMSCL District Drug Warehouse (DDWH) in Kozhikode acts as the primary reserve. It follows FEFO (First-Expiry-First-Out) norms to ensure the buffer stock doesn't expire. If a PHC or Taluk hospital hits its 30-

day MSL and the central warehouse is delayed, the facility can use NHM funds for local emergency procurement to bridge the gap.

Volunteer Force (Kudumbashree/Arogyasena/NDRF): A registered database of "Trained Volunteers" categorized by skill (e.g., nursing, food preparation, data entry, driving) is maintained at each LSGI. In addition to that "Compassionate Kozhikode" - District Collector's Internship Program also has a list of registered interns who are capable of data entry and IT management.

GOVERNANCE & STRUCTURE

An effective pandemic response depends on a clearly defined governance framework with well-delineated roles and responsibilities at every administrative level. In Kerala's decentralised system, strong coordination among district authorities, the health department, LSGIs, and community networks is crucial for timely decision-making and effective implementation of public health measures.

The governance structure for pandemic preparedness operates from the district level down to block, LSGI, ward, and community levels, ensuring coordinated action, efficient resource use, and accountability across the system.

Governance Structure from District to Ward Level

1. District Level: The Command Center

- At the top, the District Magistrate (District Collector) serves as the Chairperson of the District Disaster Management Authority (DDMA).
- District Medical Office (DMO): Led by the DMO(H), this office oversees all health-related interventions.
- District Surveillance Unit (DSU/IDSP): Managed by the DSO, this unit tracks disease patterns and identifies hotspots using spatial analysis (QGIS).
- District HEOC : A 24/7 hub that coordinates bed management, oxygen logistics, and the 30-day Minimum Stock Level (MSL) for the entire district.

2. Taluk & Block Level: The Intermediate Link

This level acts as a bridge, translating district-wide policies into regional actions.

- Tehsildar: administrative and legal enforcement (such as containment zone restrictions).
- Block Medical Officer (BMO): Supervises a group of Primary Health Centres (PHCs). They are responsible for the logistical movement of vaccines and lab samples between the PHCs and the District Lab.

3. Panchayath / Municipality Level: Local Governance

The LSGI plays a pivotal role in resource mobilization.

- Panchayath President / Chairperson: Heads the local steering committee.
- Health Inspector (HI): Ensures sanitation, monitors quarantine compliance, and manages local data entry into the state health portals.
- PHC / FHC (Family Health Centre): The first point of professional medical contact. The Medical Officer here manages the Patient care pathway for their specific local population

4. Ward Level: The Grassroots Force

This is where policies meet the people. Governance here is highly personalized.

- Ward Member: The elected representative who is a member of the Ward Health Sanitation and Nutrition Committee (WHSNC).
- Rapid Response Team (RRT): A group of local volunteers who assist in food delivery for isolated families and monitor symptom progression.

Pandemic Management Plan

- ASHA / JPHN / JHI: The core field staff. They conduct daily "House-to-House" surveillance, identify vulnerable groups (elderly/comorbid), and refer patients from Home Isolation to the PHC.

Level	Primary Authority	Health Lead	Key Responsibility
District	District Collector	DMO	Strategy, Logistics & Funding, overall management
Taluk / Block	Tehsildar	BMO	Regional Coordination & Logistics
Panchayath	President / Secretary	Medical Officer	Local PHC Operations & Triage
Ward	Ward Member	ASHA / Health Inspector	Surveillance & Home-Level Support

- **District Level:**
 - Public Health Emergency & Pandemic Task Force under DDMA
Under the Disaster Management Act of 2005, the DDMA activates a specialized Pandemic Task Force (often referred to as the District Level Crisis Management Committee) to coordinate between civil administration, the health department, and law enforcement.

Role	Official Responsible	Key Function
Chairperson	District Collector	Overall command, emergency funding, and legal orders (Sec 144, Curfews).
Co- Chairperson	District Medical Officer (DMO)	Technical head for hospital management, clinical protocols, and vaccination.
Member Secretary	ADM (Additional District Magistrate)	Chief Executive Officer of the DDMA; handles inter-departmental files.
Surveillance Lead	Additional DMO	Managing the IDSP, hotspot mapping, and data analysis.
Security Lead	District Police Chief (City & Rural)	Enforcement of containment zones and public order.
Logistics Lead	KMSCL District Manager	Maintaining the 30-day Minimum Stock Level (MSL) of essential drugs.
Member	District Panchayat President	Resource mobilization at the local self-government (LSG) level.
Member	District animal husbandry	One Health surveillance, data analysis

Pandemic Management Plan

	officer	One Health surveillance, data analysis
Member	Principal Agricultural Officer (PAO)	

Nodal departments for various hazards

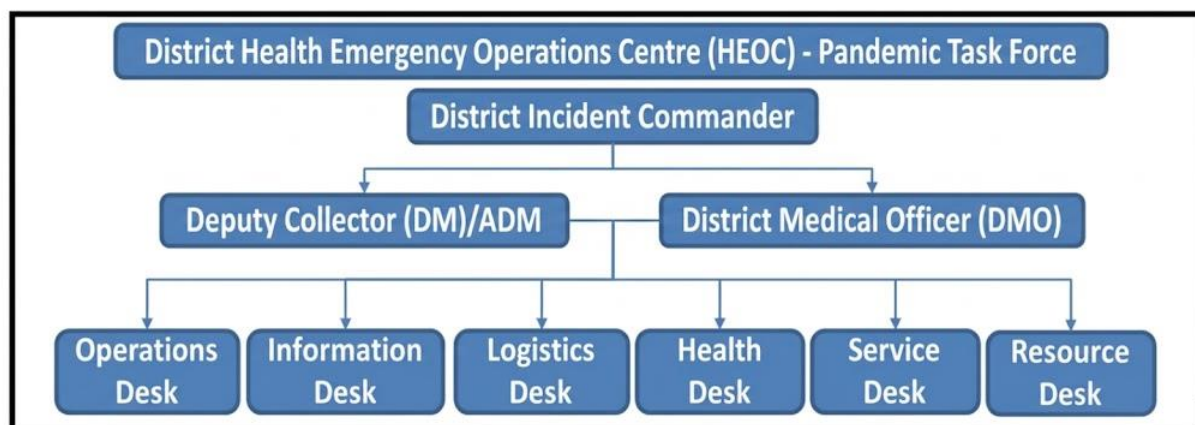

- Revenue & Disaster Management: Hydro-meteorological & geological disasters
- Transport: Road & rail accidents
- Health & Family Welfare: Chemical, biological, radiological & nuclear disasters
- Factories & Boilers Dept, Dept. of Industries and the industry: Industrial accidents
- Agriculture: Pest attacks
- Animal Husbandry: Cattle epidemics
- Water resources: Dam break
- Public Works: Building collapse
- Forests: Forest Fire
- Airport: Air accidents

When a pandemic is declared or a significant outbreak (like Nipah) occurs, the structure shifts into an Incident Response System (IRS):

- Trigger: The DSU identifies a cluster.
- Activation: The District Collector convenes the Task Force at the District Emergency Operations Centre (DEOC).
- Decentralization: Orders are passed to Taluk/Block levels, where Tehsildars and Block Medical Officers implement the localized response.
- Feedback Loop: Real-time data from the Ward-level RRTs flows back to the DDMA to adjust the strategy (e.g., increasing oxygen buffer stocks or shifting containment boundaries).

Flow chart of Incident Command System (ICS)

Under the District collector (District Incident Commander), the Pandemic task force unit is functioning. The ICS flow chart is given below.

- a. Operations Desk
 - SEOC – Dedicated & trained staff; DEOC - Police and Fire & Rescue
 - Monitoring field level rescue and evacuation operations
 - Monitoring salvage operations

Pandemic Management Plan

- Requisition of accommodation, transport and other necessary equipment for relief groups Maintain law and order
 - Regular updates to the EOC regarding relief operations
- b. Information Desk
SEOC – Dedicated & trained staff; DEOC – Land Revenue
- Communication of weather reports and warnings and subsequent updates
 - Dissemination of information
 - Keep contingency plans along with all necessary maps in ready to use condition Maintenance of important telephone numbers, database on available resources, list of key persons
 - Send and receive messages and maintain records of the messages
 - Maintain information of damage, materials sent and ongoing activities for immediate sharing with Emergency Operation Centre
- c. Logistics Desk
SEOC – Dedicated & trained staff; DEOC – Transport Department
- Assess the need in terms of manpower and resources and ensure regular supply
 - Ensure proper storage and transport facilities for relief materials
 - Maintain adequate supply of necessary transport and equipment
 - Coordinate with private transport associations and boat association for emergency requirement
- d. Health Desk
SEOC – Dedicated & trained staff & the State Level Nodal Officer of Health Department; DEOC – Health Department
- Organize treatment of injured and sick, disposal of carcasses
 - Preventive Medicine and anti-epidemic measures are taken
 - Maintain record of all activities
 - Assess and ensure setting up medical relief camps
 - Maintain adequate supply of medicines, equipment and personnel
 - Monitor maintenance of health measures in all camps and provision of safe drinking water
 - Organize transportation for rescue party, evacuated people medical terms and injured or sick people
- e. Service Desk
SEOC – Dedicated & trained staff; DEOC – Land Revenue
- Overall coordination of rescue and relief operations
 - Assessing the relief, search and rescue and cash compensation requirements
 - Organize and co-ordinate setting up of relief camps
 - Ensure adequate supplies to the camps
 - Coordinate identified NGO activities to ensure community participation
 - Reporting the procurement and disbursement of relief material received from all sources Organize construction of temporary shelters, school buildings, medical facilities etc. Maintenance of cash and disbursements receipts, issue of relief materials, T.A & D.A of relief duty staff, daily wages, cash and credit vouchers, gratuitous and compensation paid, etc.
 - Issuing of all cash and material receipts Reimbursement of all expenses approved Issue of cash vouchers for petrol and diesel

Pandemic Management Plan

f. Resource Desk

This desk shall be handled by the respective department as per the ESF Plan.

- **Panchayat Level**

The Arogya Jagratha Samithis (Health Vigilance Committees) are the backbone of the decentralized public health model. They function as a bridge between the formal health department and the community, primarily focusing on the prevention and control of communicable diseases.

In a district like Kozhikode, these committees are essential for early signal detection and ensuring that the Patient Care Pathway is followed at the grass-roots level.

a. Structure & Governance - the committees operate at multiple tiers to ensure total geographic coverage:

- Panchayat/Municipal Level: Chaired by the local body President/Chairperson, with the Medical Officer of the PHC/FHC serving as the Member secretary, Other members as FSO, animal husbandry, Medical officer- ayurveda and Homoeo, and agriculture departments.
- Ward Level: This is the most active unit. It is chaired by the Ward Member and includes the ASHA worker, Anganwadi worker, Kudumbashree representatives, and local volunteers.

b. Core Responsibilities

- Environmental Sanitation: Coordinating "Dry Day" campaigns to eliminate mosquito breeding sites (crucial for Dengue and Zika control), IEC.
- Surveillance: Identifying unusual clusters of fever or respiratory illness and reporting them immediately to the Health Inspector or the District Surveillance Unit.
- Reverse Quarantine Support: Monitoring vulnerable groups (the elderly and those with comorbidities) to ensure they are protected during outbreaks.
- Waste management: Ensuring that public spaces and households adhere to proper waste disposal to prevent leptospirosis and water-borne diseases.
- IRS- ensure home isolation and quarantine

- Responsibility matrix for panchayat committees

Designation	Role	Responsibilities
Panchayath president	Chairperson	Mobilizing local funds and volunteers for sanitation drives; chairing weekly review meetings
Medical officer- FHC/PHC	Member secretary	coordinating community-level health activities, implementing communicable disease control measures, and overseeing preventive health actions

Pandemic Management Plan

Medical officer- Allopathy	Member	Surveillance, cross notification of cases, IEC
Medical officer- Homoeo	Member	Surveillance, cross notification of cases, IEC
Panchayath secretary	Member	administrative bridge between the local government, the health department, and the community to prevent disease outbreaks and manage public health. The secretary ensures the committee functions effectively, documents activities, and implements decisions on the ground.
Animal husbandry	Member	One health surveillance, IEC
Food Safety Officer	Member	ensuring the safety and quality of food and water, thereby reducing foodborne illnesses. They bridge the gap between food safety regulations and community-level action, acting as the technical authority on the committee
Agriculture	Member	Disease surveillance in farming areas, IEC, PPE provision

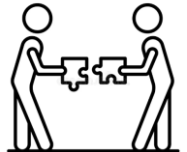

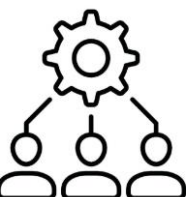

PLANNING PRINCIPLES & LEGAL CONSIDERATION

Effective pandemic planning requires a multidisciplinary approach combining public health strategy with ethical and legal considerations to ensure compliance, safety, and equity.

- **Principles**

Principle	Description	Icon
Equity as a Cornerstone	Pandemic response must focus on equitable access to vaccines, diagnostics, therapeutics, and personal protective equipment (PPE). Equity is defined as "the goal, principle and outcome of prevention, preparedness and response," striving to remove unfair, avoidable differences among individuals and countries.	
Gender-Responsive Planning	Pandemics are gendered; they exacerbate existing inequalities, disproportionately impacting women in the healthcare workforce and creating greater vulnerability to violence and economic insecurity. Planning must include sex- and gender-disaggregated data to ensure policies	

Pandemic Management Plan

	address the specific needs of women, men, and non-binary individuals.	
Human Rights & Inclusiveness	Responses must be rooted in human rights—universality, non-discrimination, and accountability. Inclusive laws and plans must consider marginalized populations, including refugees, people with disabilities, and the elderly.	
Coherence and Solidarity	National, regional, and international responses should align to prevent fragmented approaches. Solidarity is crucial for equitable sharing of benefits and knowledge (e.g., vaccine technology transfer).	
Transparency	Open, timely sharing of data—including pathogen sequences—is required for risk assessment, while ensuring compliance with privacy laws.	
Balancing Rights	There is a necessary tension between individual liberty (freedom of movement) and the public good (protection from harm). Legal frameworks must prioritize rights that protect the most vulnerable during emergencies.	
Equitable Resource Allocation	Scarce resources (vaccines, ventilators) should not be allocated on a first-come, first-served basis, but rather by focusing on saving lives, prioritizing front-line health workers, and those most vulnerable to severe outcomes.	

- **Legal/Policy:**

- Legislative frameworks for health emergency preparedness

Legislative frameworks for health emergency preparedness in Kozhikode, Kerala, are anchored in a combination of state-specific acts, central laws invoked during disasters, and tailored management plans. Recent legislative developments, including the Kerala Public Health Act, 2023, have modernized the legal response, replacing older, region-specific colonial laws.

- i. The Kerala Public Health Act, 2023: This is the primary legislation replacing the Madras Public Health Act, 1939 (formerly applicable to the

Pandemic Management Plan

Malabar region, including Kozhikode) and the Travancore-Cochin Public Health Act, 1955. It focuses on:

Notifiable Diseases: Mandating the reporting of communicable diseases (including Nipah and COVID-19) to local authorities.

Emergency Powers: Allowing local authorities to restrict gatherings, inspect premises, and enforce quarantine, with penal action (up to ₹25,000 fine or imprisonment) for violations.

ii. Kerala Epidemic Diseases Act, 2021 (Act 4 of 2021): Replaced the colonial-era Epidemic Diseases Act, 1897, to give the government explicit powers to take measures like quarantine and inspection of travelers. Violations of orders made under the Act are punishable under the penalty provisions specified in the ordinance (imprisonment up to 2 years and/or fine up to ₹10,000).

iii. Kerala Essential Services Maintenance Act, 1994: Used to ensure the continuity of essential health services during lockdowns.

iv. Disaster Management Act, 2005 (DMA): Invoked during COVID-19 to activate the National and State Disaster Response Funds (SDRF). The District Disaster Management Authority (DDMA), headed by the District Collector in Kozhikode, acts as the primary agency for implementing strategies under this act.

Penalties and Fines

- ★ Section 51(b): Punishment for refusal to comply with directions/orders (up to 1 year imprisonment or fine/both).
- ★ Section 51(b) (leads to death): Imprisonment up to 2 years.
- ★ Section 52: Punishment for making false claims to obtain relief/benefits (up to 2 years imprisonment + fine).
- ★ Section 54: Punishment for spreading false warnings/alarms, causing panic (up to 1 year imprisonment or fine).
- ★ Section 56: Failure of an officer to perform duties or connivance at contravention (up to 1 year imprisonment or fine).
- ★ Section 188 of the IPC: Often invoked alongside DMA for disobeying orders from public servants

- Roles and responsibilities (including technical advisory groups)

The governance structure is organized into three tiers—State, District, and Local—each with defined legal mandates.

Designation	Role	Legal authority
District Collector	Chairperson, DDMA	Under Section 26 of the Disaster Management Act, 2005, the Collector has the legal authority to: <ul style="list-style-type: none"> ● Requisition resources, including buildings (e.g., converting apartments into treatment centers). ● Prohibit community gatherings and enforce evacuations.

Pandemic Management Plan

		<ul style="list-style-type: none"> • Exercise all powers of the District Authority during an emergency, subject to ex post facto ratification.
District Medical Officer	District Public Health Authority	Managing communicable disease control (isolation, quarantine), environmental sanitation, food safety, and overseeing medical/field staff, often authorized to act as an executive authority in public health matters under state-specific laws
Medical Officer of a local health institution	Local Public Health Officer	<ul style="list-style-type: none"> • Legally bound to identify and report notifiable diseases to higher authorities • Take immediate action to stop the spread of epidemics, including isolating infected individuals and arranging for emergency hospital transfers, • Contact Tracing & Surveillance: Investigate and trace contacts of patients with communicable diseases (e.g., TB, Malaria, COVID-19) to prevent further spread • Vector Control: Direct and supervise activities to eliminate vector breeding sites (larval control) for diseases like malaria, dengue, and chikungunya
Technical Advisory Groups (TAGs)	provide the scientific basis for administrative action	<ul style="list-style-type: none"> • Ad hoc Public Health Advisory Committees: Under Section 7(8) of the Kerala Public Health Act, 2023, the State Public Health Officer can constitute these committees to assist in managing emergencies and preparing expert recommendations. • Hospital Disaster Management Committee (HDMC): Mandatory under the Hospital Disaster Management Plan (HDMP) for Kozhikode, this group prepares site-specific protocols for emergency medical care and resource management. • Central & State Expert Teams : During outbreaks, multi-disciplinary teams from the

Pandemic Management Plan

		NCDC and NIV Pune provide the legal technical guidance for Case Definitions and Infection Control Practices
--	--	---

- Data sharing, research, and innovation policies

Pandemic data sharing follows a top-down mandate to ensure real-time surveillance and public safety.

- **Mandatory Disclosure:** Under Section 7 of the Kerala Public Health Act, 2023, the Director of Health Services (State Public Health Authority) has the legal power to seek data from both public and private healthcare establishments on all public health matters.
- **State Data Exchange (KSDP 2025):** The Kerala State Data Policy 2025 classifies government-held data as "Public," "Internal," or "Confidential" to facilitate secure, access-controlled sharing between departments and external stakeholders.

Research during a pandemic -GMC Kozhikode serves as the primary tertiary care center and the hub for clinical research activities. The Microbiology department at GMC Kozhikode hosts advanced facilities, including a Mobile BSL-3 (MBSL-3) laboratory deployed by ICMR-NIV. This allows researchers to conduct on-site diagnosis and genomic sequencing, reducing turnaround times. In addition, Kerala One Health Centre for Nipah Research, which operates in close collaboration with the Government Medical College (GMC) Kozhikode also provides technical support to research related activities.

PLAN DEVELOPMENT & APPROACH

In Kozhikode, the Plan Development & Approach for pandemic preparedness is operationalised through a structured, multi-sectoral framework. This system ensures that high-level policy is translated into block and ward-level action.

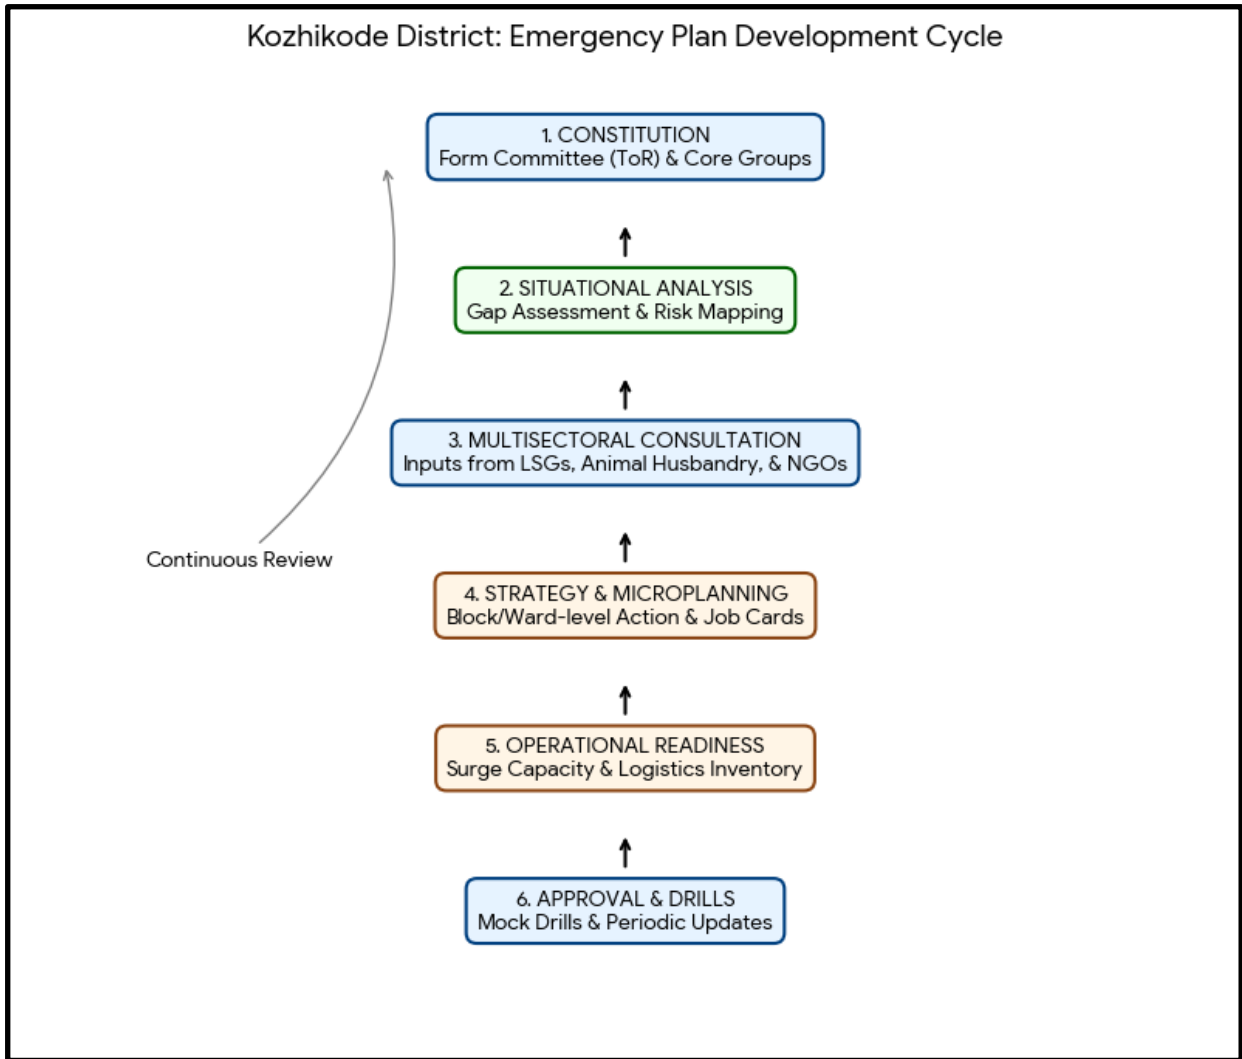

- ❖ **Planning Committee: Terms of Reference (ToR)**
 - The District Planning Committee, often integrated with the DDMA, provides the strategic backbone for response.
 - **Guidance & Analysis:** Conducts situational analysis to identify high-risk zones (e.g., Nipah-prone areas like Perambra).
 - **Microplanning:** Oversees the development of ward-level microplans, ensuring every local health volunteer knows their specific duty.
 - **Resource Oversight:** Manages the Health Resource Inventory, including surge capacity for beds, oxygen, and manpower at GMC Kozhikode and peripheral hospitals.
 - **Corrective Action:** Reviews surveillance data weekly to pivot strategies based on real-time outbreak reports.
- ❖ **Multisector & Multilevel Consultations**
 - **Horizontal Coordination:** Engages the Departments of Animal Husbandry (One Health), Forest, and Water Authority (WASH) to address zoonotic and environmental triggers.
 - **Vertical Feedback:** Consultations at the Panchayat/Ward level use local inputs to identify field-level gaps, such as "dead zones" in communication or transport for referrals.

Pandemic Management Plan

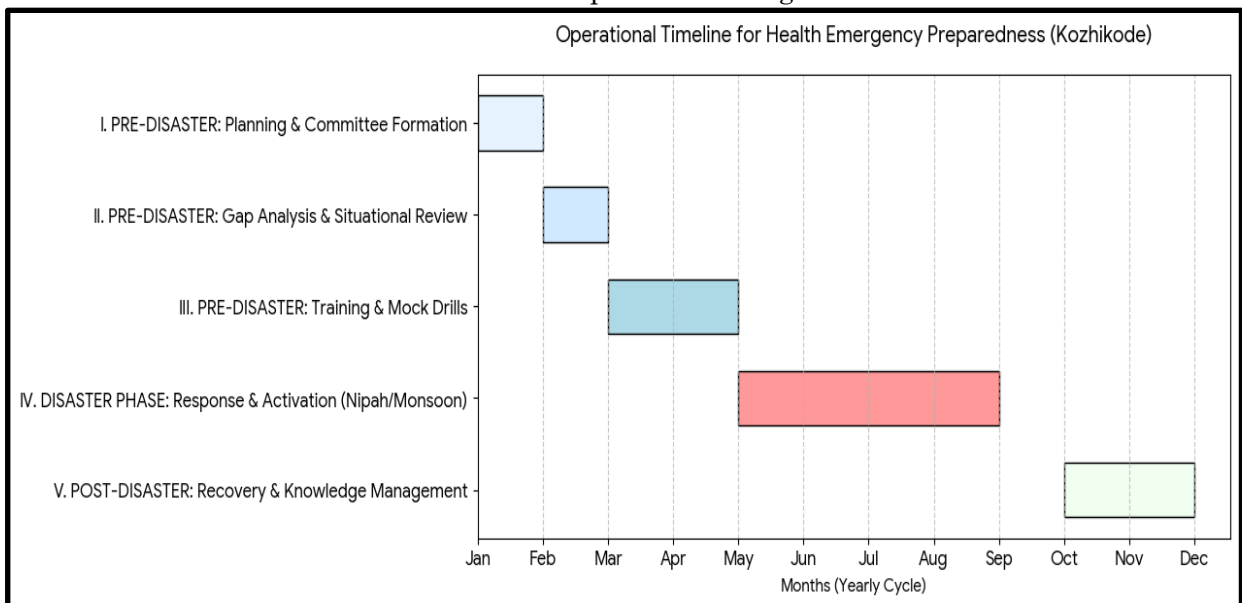

- Convergence: Aligns ongoing programs (like the Aardram Mission) with emergency needs to prevent service duplication.
- ❖ Analysis of Existing Systems
 - Before an outbreak hits, the district evaluates its baseline readiness:
 - Infrastructure Audit: Mapping health facilities and categorizing them into Primary, Secondary, and Tertiary care.
 - Gap Identification: Assessing the quality of data reporting from private labs and hospitals to ensure no "silent" transmission occurs.
 - Referral Systems: Testing the efficiency of the 108 Ambulance service and specialized "Green Corridors" for infectious patient transport.
- ❖ Strategic Approach
 - Needs-based: Uses epidemiological data to prioritize vulnerable groups, such as elderly populations in high-density urban wards or forest-fringe communities.
 - Scalable & Integrated: Employs a "Modular Response"—starting with localized containment (e.g., a 3 km radius containment zone) and scaling district-wide if the R-naught (R0) increases.
 - Regularly Updated: Plans are "living documents" updated after every outbreak (e.g., post-Nipah 2023) to incorporate new ICMR guidelines or technological innovations like Mobile BSL-3 labs.
- ❖ Indicators & Operational Stages
 - Preparedness -100% mapping of high-risk zones and updated official contact directory.
 - Operational- Surge capacity (beds/manpower) activated within 24 hours of a "Level II" alert.
 - Surveillance- Zero-lag reporting from all designated "Sentinel Sites."
 - Communication- IEC (Information, Education, Communication) materials disseminated in local Malayalam dialects within 12 hours.

Flow diagram of plan development steps

Pandemic Management Plan

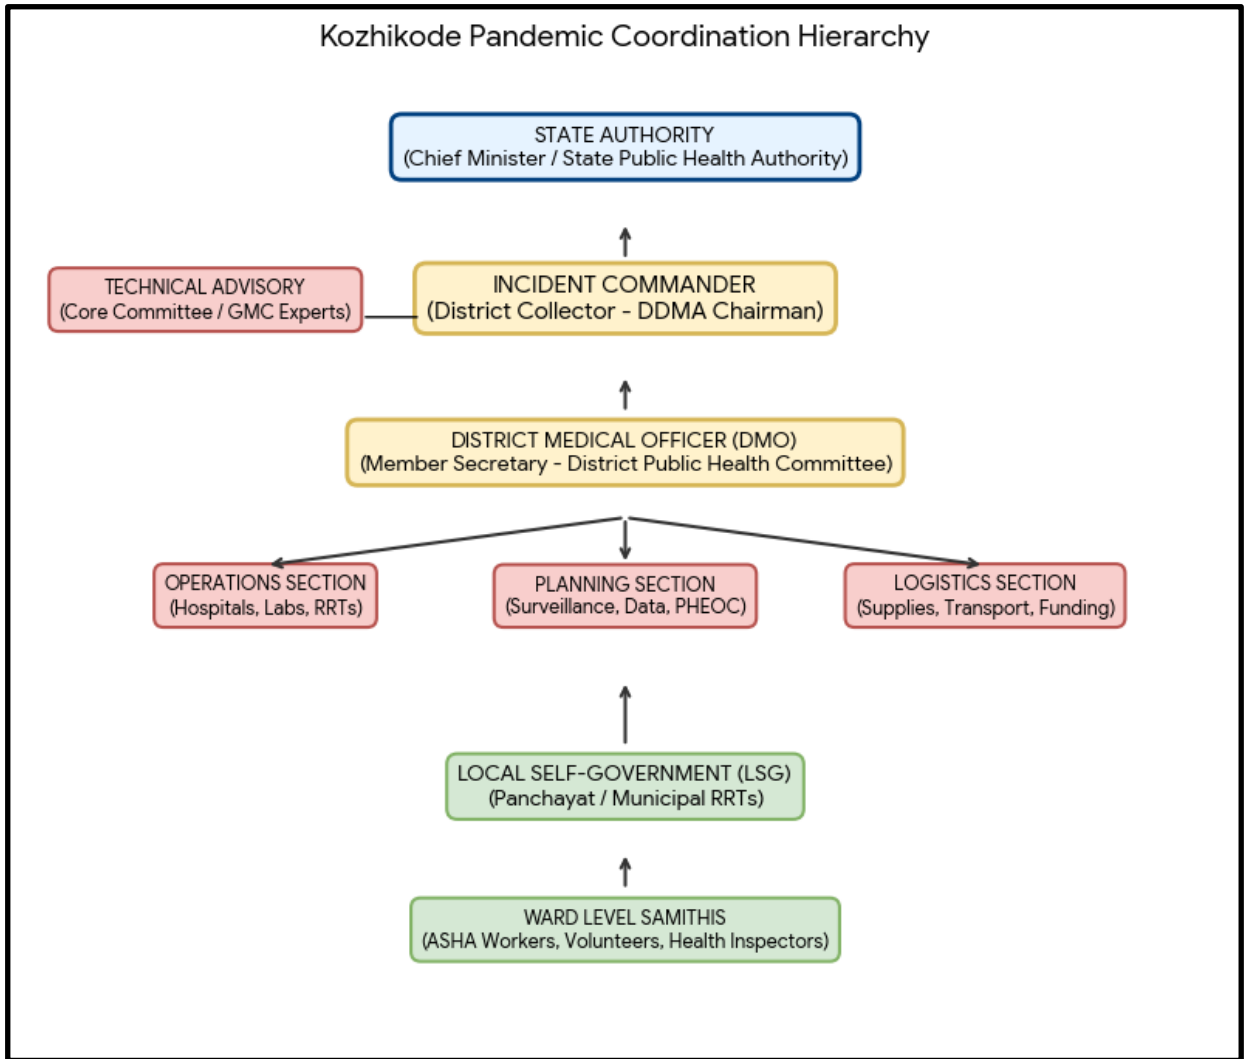

- Timeline or Gantt chart for operational stages

Pandemic Management Plan

- **Emergency Coordination:**
 - Integration with Other Plans: The Nipah Management Plan for Kozhikode serves as a specialized template integrated into the broader District Disaster Management Plan (DDMP). It aligns with seasonal "monsoon preparedness" to address concurrent risks like dengue or leptospirosis.
 - Command-and-Control: The District Collector (as Chairman of DDMA) and the District Medical Officer (DMO) lead the structure. A 24/7 control room operates under a "Nipah Cell" or "Covid Cell" model, where authorized teams manage specific logs, review meetings, and media updates.
 - Multi-Agency Coordination: High-level committees include representatives from the Revenue, Police, Fire & Rescue, and Health departments. Local Self-Governments (LSGs) and Rapid Response Teams (RRTs) at the ward level manage house visits, contact tracing, and community kitchens.
 - Funding Mechanisms: Activation of the State Disaster Response Fund (SDRF) occurs when a disease is notified as a disaster by the state government. District Collectors are typically allocated immediate funds (e.g., ₹50 lakh) for outbreak control, supplemented by the Chief Minister's Distress Relief Fund (CMDRF) for welfare measures.
- **Exercises & HR Surge:**
 - The DMO has the power to appoint additional health staff and temporary medical staff during emergencies. A periodic training for all the staff including the HR pool staff is ongoing.
- Organizational chart for emergency coordination

Pandemic Management Plan

- **HR surge strategies**

HR surge capacity planning is structured to handle sudden spikes in hiring demand (due to pandemic) without causing staff burnout or compromising quality. A comprehensive strategy involves a tiered approach, organized as conventional (Plan A), contingency (Plan B), and crisis (Plan C) measures.

Projected HR for various scenarios	Doctor	Staff nurse	Grade 2 attender	Paramedic al	Cleaning staff
For 100 patients	30	100	100	30	52
PLAN A 200 patients	60	200	200	60	104
PLAN B 1000 patients	300	1000	1000	300	520

Pandemic Management Plan

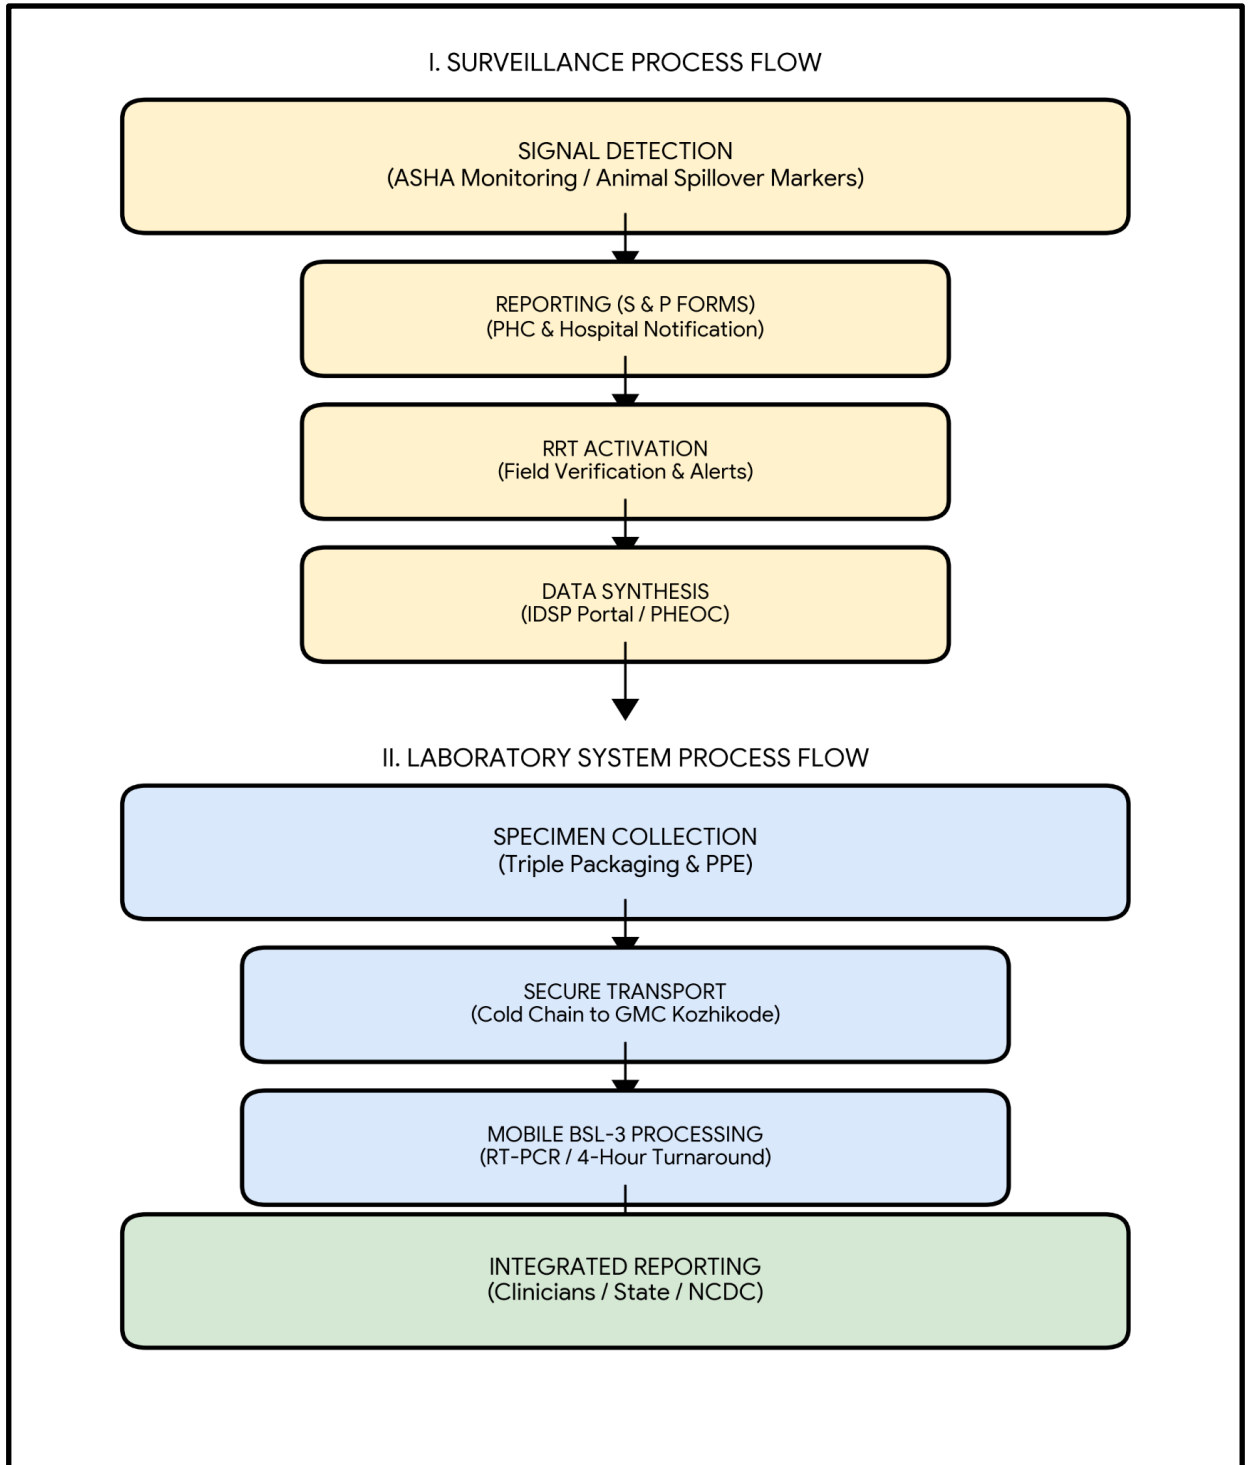

PLAN C 2000 patients	600	2000	2000	600	1040
----------------------	-----	------	------	-----	------

Total Available HR in the District	Doctor	Staff nurse	Grade 2 attender and cleaning staff
GOVT	1961	1473	1118
PVT	1865	4679	3367
Total	3826	6152	4485

SURVEILLANCE & LABORATORY SYSTEMS

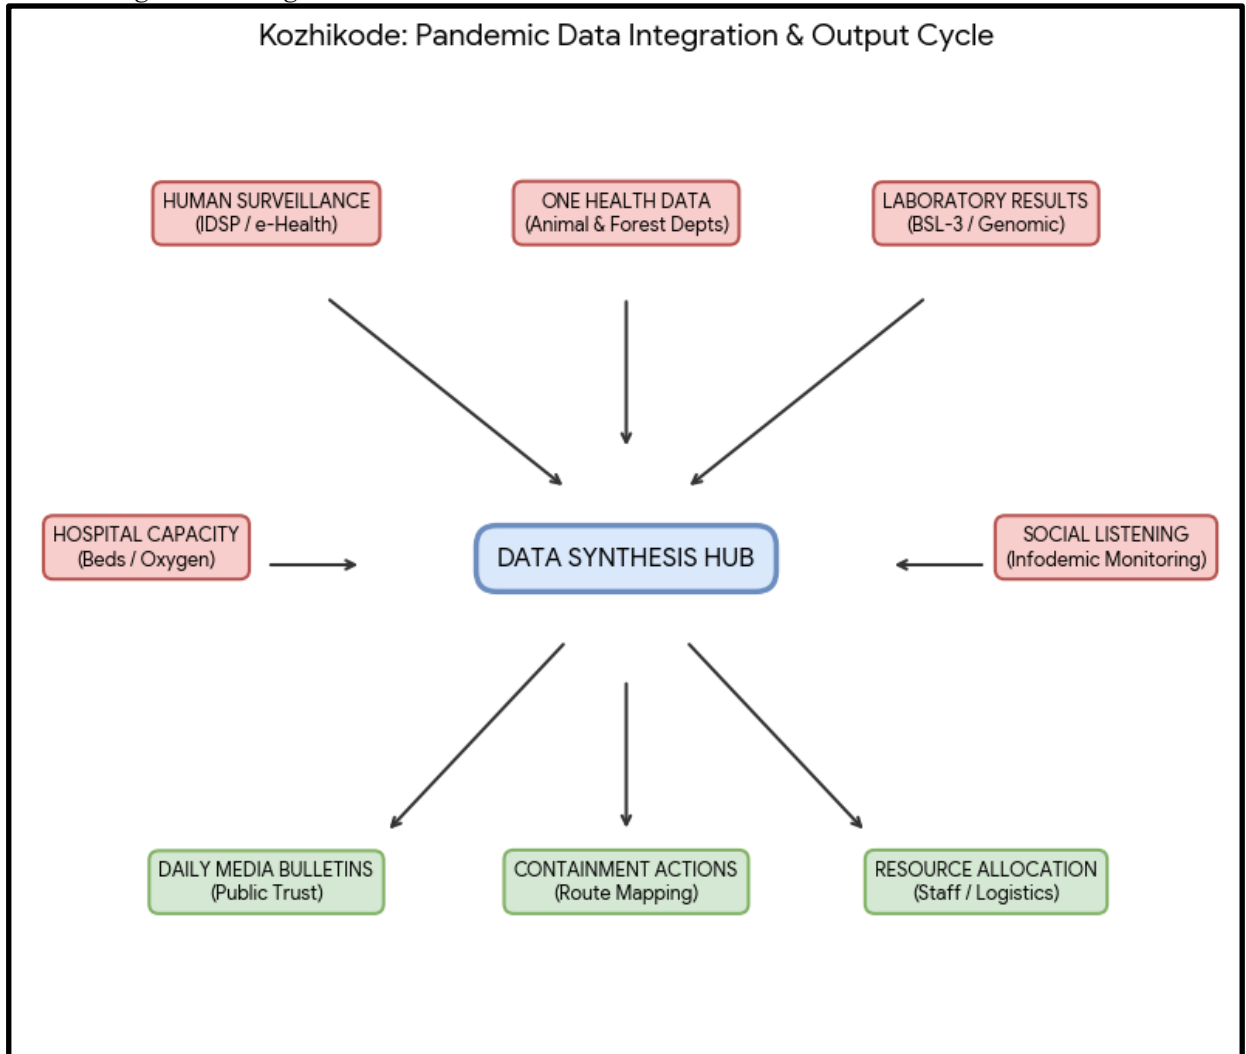

- **Collaborative Surveillance:**
 - Collaborative surveillance of health, animal husbandry, forest, and wildlife departments together allows monitoring of spill over risks. The RRT and community volunteers (trained mentors and ward-level volunteers) act as an early warning system, capturing signals of unusual events or cluster illnesses.
- **Laboratory Access:**
 - During outbreaks, a Mobile BSL-3 lab is deployed at Government Medical College (GMC) Kozhikode. This indigenously developed unit provides a 4-hour turnaround time for Nipah diagnosis. A permanent Regional Virus Research and Diagnostic Laboratory (VRDL) is already established at GMC Kozhikode to detect high-risk pathogens.
 - Specimen Transport & Biosafety: Specimens are handled using a triple packaging method to ensure zero environmental exposure and transported to the designated laboratories using the hub and spoke model detailed above.
- Process flow for surveillance and lab systems

Pandemic Management Plan

Pandemic Management Plan

- Data integration diagram

COMMUNITY PROTECTION & COMMUNICATION

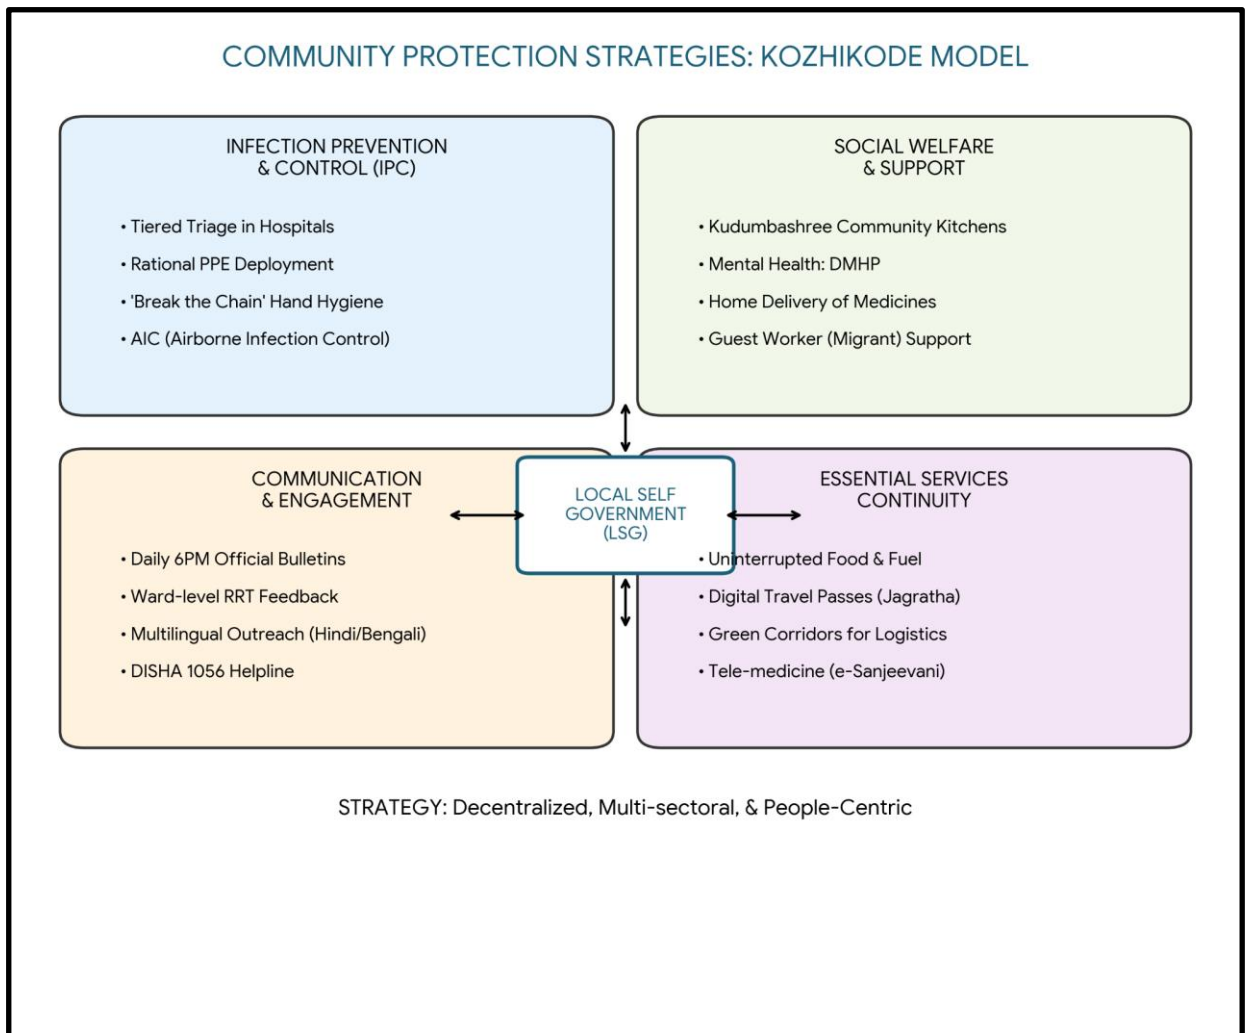

Key Points:

- **Protection Mechanisms:**
 - Rational PPE Use: Protective gear is allocated based on risk levels. High-risk settings (ICUs/aerosol procedures) require a full complement of PPE, while moderate-risk areas (registration, help desks) mandate N95 masks and gloves.
 - Airborne Infection Control (AIC): Hospitals, including GMC Kozhikode, are required to maintain dedicated Cough Corners and AIC help desks to screen symptomatic patients and provide masks immediately upon arrival.
 - Standard Precautions: Implementation of "Break the Chain" campaigns and strict respiratory hygiene, including floor markings for 6-foot distancing and adequate natural cross-ventilation in public facilities
 - Yellow Fever Centre: GMC Kozhikode serves as a key node for specialized vaccinations, often operating on specific days (Tuesdays)
 - Targeted Strategies: Special arrangements are mandated for Reverse Quarantine, prioritising vaccination for the elderly and people with disabilities.

Pandemic Management Plan

- Community Kitchens: Coordinated by Local Self-Governments (LSGs) and Kudumbashree, these ensure an uninterrupted supply of food for quarantined persons, guest workers, and the destitute
- Psychosocial Support: DMHP, dedicated toll-free helpline (08046110007) and the DISHA Helpline (1056) offer 24/7 medical and mental health support
- **Communication:**
 - Daily press conferences by the District Collector (at 6:00 PM) became a trusted "single window" for reliable data, effectively countering conflicting reports. A unit under the mass media wing monitors social media to identify rumors and releases prompt "Alerts and Clarifications" to maintain public trust. The Mass media wing provides information in multiple languages, including Bengali, Oriya, Assamese, and Hindi. Core messages are adapted into local Malayalam dialects and simplified into visual infographics to bridge the health literacy gap.
- **Travel & Trade:**
 - In-flight/On-board Briefings: Mandatory announcements are made on international flights and long-distance trains regarding current health protocols and precautionary measures, such as the use of masks. Thermal screening is conducted for all incoming passengers at the airport. Only asymptomatic travellers are allowed to proceed to their destination. Any passenger flagged with a fever or respiratory symptoms is immediately shifted to an isolation facility near the airport or the Government Medical College, Kozhikode for secondary evaluation and testing.

Pandemic Management Plan

CLINICAL CARE & ESSENTIAL SERVICES

Clinical care management during a pandemic requires a comprehensive approach focused on rapid triage, effective isolation, and optimized supportive care to prevent health system collapse. The phases are depicted in the below table.

Phase	Action Item	Protocol Details	Responsible Party
Triage & Screening	Epidemiological Screening	Check for fever, encephalitis, or ARDS + contact with bats, raw date palm sap, or sick livestock (14-day window).	Triage Nurse / MO
	Physical Separation	Immediate placement in a designated isolation area away from general outpatient/emergency flow.	Facility Admin
Immediate Isolation	PPE Implementation	Strict adherence to Contact + Droplet +	All HCWs

Pandemic Management Plan

Phase	Action Item	Protocol Details	Responsible Party
		Airborne precautions (N95, goggles, double gloves, fluid-resistant gown).	
	Environmental Controls	Negative pressure room (if available) or well-ventilated single room with dedicated equipment.	Infection Control Team
Diagnostics & Testing	Sample Collection	Triple-packaged transport of throat swabs, urine, and blood for RT-PCR. Notify the lab of high-risk status.	Trained Lab Tech
	Laboratory Notification	Alert state/national labs and public health surveillance units immediately.	Hospital Superintendent
Clinical Management	Neurological/Respiratory Support	Intensive supportive care for ARDS and encephalitic symptoms. Avoid aerosol-generating procedures.	Critical Care Team
	Fluid & Seizure Management	Management of cerebral edema and administration of IV anti-epileptics for seizures.	Neurologist/Intensivist
Discharge Pathway	Recovery Criteria	Patients must be afebrile for >48h and have two consecutive negative RT-PCR tests (24h apart).	Infectious Disease Specialist
	Post-Discharge Monitoring	21-day home quarantine with active surveillance by local health authorities.	Concerned MO
Dead Body Management	Decontamination	Leak-proof body bag (double-bagged) wiped with 1% sodium hypochlorite. Do not	Mortuary Staff

Pandemic Management Plan

Phase	Action Item	Protocol Details	Responsible Party
		embalm or autopsy.	
	Safe Burial/Cremation	Dignified but restricted handling. No bathing or kissing the body. Minimal family presence with PPE.	Health Inspector / Family

ACCESS TO COUNTERMEASURES

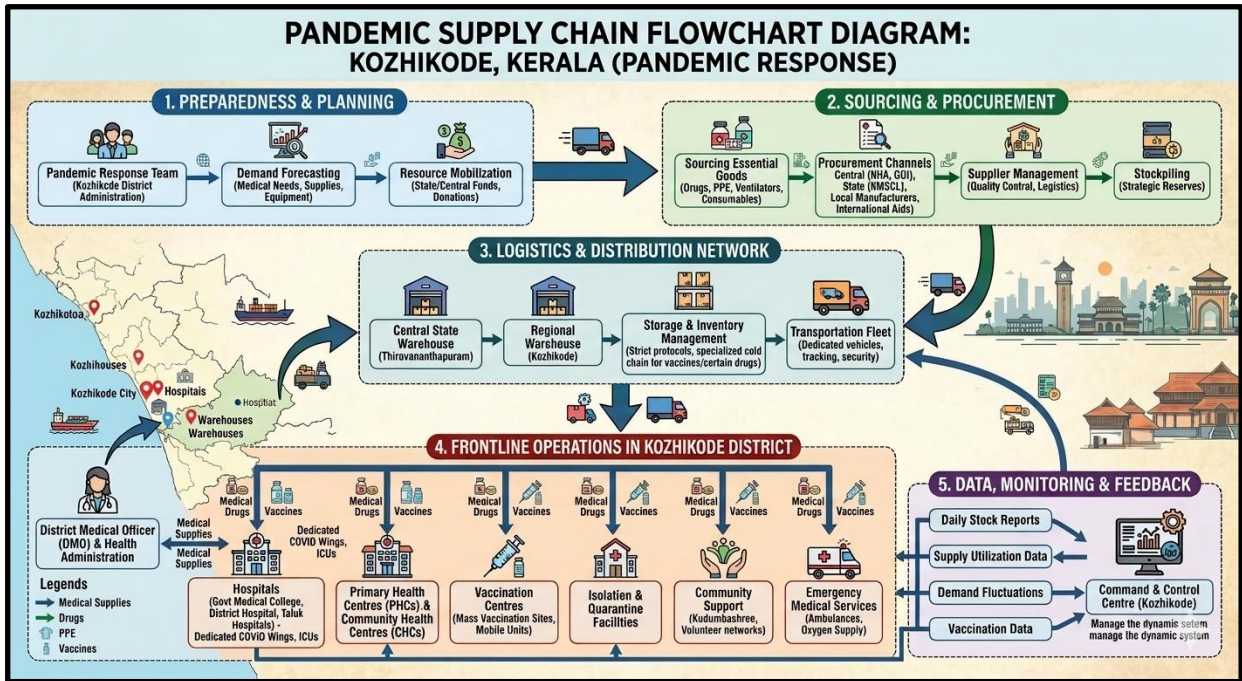

- **Supplies & Stockpiles:**

Clinical Care and supply management for pandemics are governed by the Kerala State Disaster Management Authority (KSDMA) and the KMSCL, which oversees the centralized procurement and stockpiling for the state.

- **Regulatory & Supply Chains:**

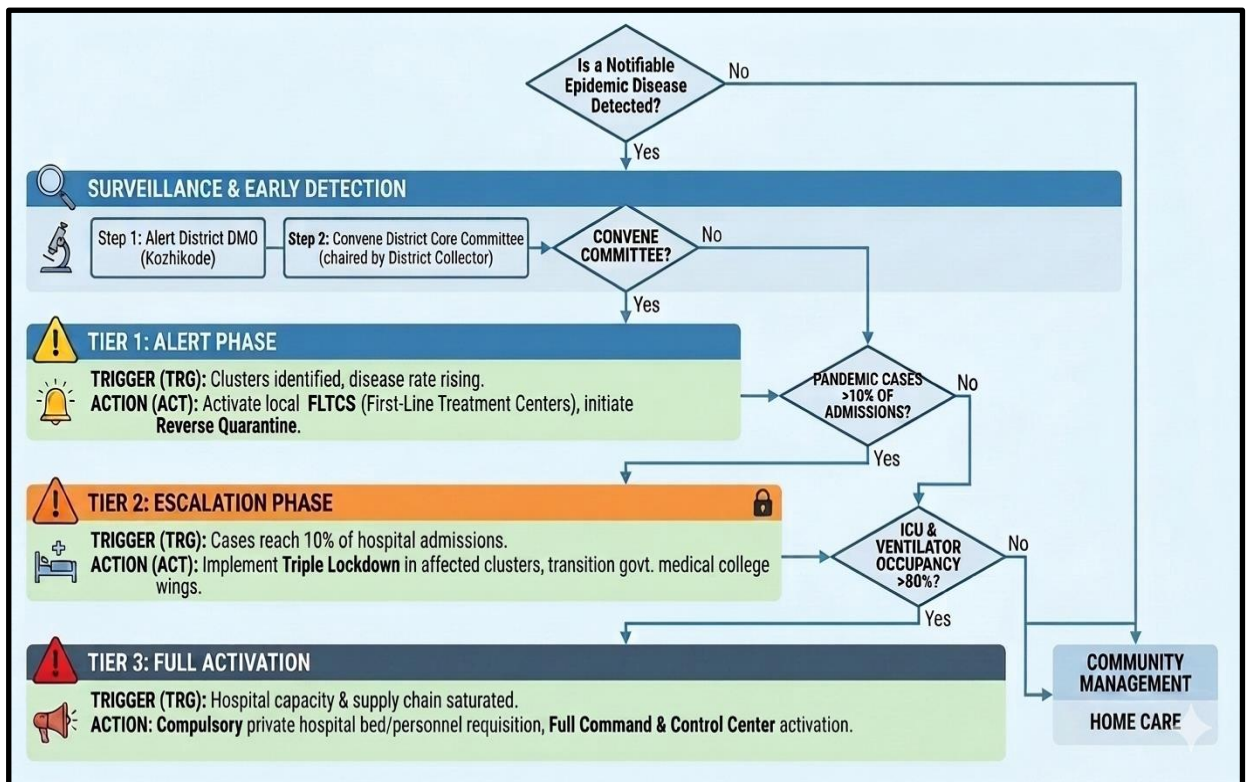

- Upstream (Procurement): KMSCL utilizes national-level e-tenders to achieve economies of scale for generic drugs and consumables.
- Downstream (Distribution): Supply to hospitals like the Government Medical College, Kozhikode, is managed through the Drug Distribution Management System (DDMS).
- Critical Commodities: To ensure resilience, hospitals and medical institutions are prioritized, receiving 100% of their actual requirements for essential services like medical oxygen and electricity even during supply crises.

Pandemic Management Plan

PLAN ACTIVATION & OPERATIONAL TRIGGERS

Activating a clinical care plan during a pandemic follows a tiered decision-making process based on the Kerala Threshold-Trigger-Action Point Matrix. Activation is not a single event but a progressive escalation triggered by specific epidemiological and system capacity milestones.

- Timeline for operational stages.

Pandemic Management Plan

Operational stages for clinical care management are structured into four key phases, moving from preparedness to post-surge recovery.

Stage	Timing / Trigger	Key Operational Actions	Department
Stage 1: Preparedness	Ongoing / Pre-Surge	Formulate grassroots response plans; Stockpile essential drugs via KMSCL; Conduct staff up-skilling.	KMSCL, District Warehouse
Stage 2: Alert Phase	First Detectio ns / Cluster Identific ation	Activate outbreak response committees; Mobilize DISHA-1056 helplines; Initiate aggressive contact tracing.	District Medical Office (DMO)
Stage 3: Escalation Phase	Rising Surge / Cases >10% of Hospital Admissi ons	Transition Govt Medical College wings to pandemic units; Activate FLTCs; Implement localized Triple Lockdowns.	Govt Medical College, Kozhikode
Stage 4: Post-Peak	Sustain ed Case Decline	Evaluate resource utilization; Launch post-pandemic health campaigns; Update annual inventory and forecasting models.	LSG Community

HEALTH SYSTEM SURGE

Gap analysis for beds, oxygen, critical care, paediatric/obstetric care, and referral transport; pre-plan “expansion beds” using existing infrastructure.

- Specialized Care Audit: Specific number of functional neonatal ventilators, pediatric ICU beds, and labor rooms that can be isolated for infectious obstetric cases.

Hospital	Total neonat al	Isolat ed for infecti ous	Total pediatric ICU beds	Isolate d for infecti ous	Total labor room beds	Isolated for infectio us

Pandemic Management Plan

	ventila tors	obstet ric cases		obstetr ic cases		obstetri c cases
DH Vadakara			10	2	24	5
W&C Kozhikode			10	2	19	4
GH Kozhikode			10	2	6	2
TH Thamarassery			10	2	5	2
TH Nadapuram					2	1
TH Kuttiyadi					2	1
THQH Koilandy			10	2	2	1
TH Perambra					2	1

- **Oxygen Autonomy Calculation:**

We have an oxygen plant in General Hospital Kozhikode (capacity 1000 liter/minute). With a 1000 LPM plant, if 5% of active cases require oxygen (assuming an average of 15 LPM per patient), the hospital can provide continuous oxygen to approximately 67 patients, which provides autonomy for managing a community spread involving roughly 1,340 active COVID-19 cases.

- **Secondary Infrastructure Mapping: Floor plan for "Expansion Beds" in non-health facilities (hostels, auditoriums), ensuring they have separate entry/exit points for ambulances.**

- Key Site Layout & Ambulance Access**

A functional "drive-through" model ensures ambulances do not have to reverse, reducing turnaround time.

- **Ambulance Entry:** A dedicated, barrier-free entrance from a primary road.
- **Receiving/Triage Bay:** Direct access from the ambulance to a triaging area with a minimum 2.4 m corridor width to accommodate stretchers and staff.
- **Ambulance Exit:** A separate, clearly marked exit point to prevent congestion with incoming vehicles.
- **Turning Radius:** Ensure sufficient space for the 2.7m (min) length of standard ambulance compartments to maneuver.

- Internal Zoning (Auditoriums/Hostels)**

Adapting large open spaces requires clearly defined zones to maintain hygiene and safety.

- **Bed Spacing:** In general wards, 50 sq. ft. per bed with at least 3 feet distance between beds. In hostels, rooms ideally be limited to 2–4 beds for better ventilation and monitoring.
- **Flow Segregation:**
 - **Hot Zone:** Patient wards and treatment areas.
 - **Cold Zone:** Administrative, pharmacy, and PPE donning/doffing areas.
- **Sanitation:** Separate toilets for patients (male/female/accessible) and staff

Pandemic Management Plan

iii. Recommended Room Dimensions

Area Type	Minimum Dimensions / Requirements
General Bed Space	10' × 8' per patient
High Dependency Bed	12' × 8' with extra power points for equipment
Door Width	Minimum 1.2 m (4 feet) for stretcher clearance
Corridor Width	2.4 m in emergency/transit zones; 1.5 m in general areas
Nursing Station	One station per maximum 45 beds

iv. Conversion Checklist

- Electrical: High-wattage power backups for medical devices (ventilators, monitors).
 - Ventilation: High-ceiling spaces like auditoriums; ensure natural lighting and no dampness.
 - Security: Screen ambulance entrances from public view for patient privacy.
- Referral Transport Matrix: Vehicles - "Type A" (Basic) and "Type B" (Advanced Life Support/Oxygen)

Facility Name	Number of BLS Ambulance Functional	Number of ALS Ambulance Functional
DH Vatakara	2	
TH Kuttiady	1	
TH Perambra	1	
THQH Koyilandy	1	
TH Balussery	1	
TH Thamarassery	1	
TH Feroke	1	
W&C Hospital Kozhikode	1	1
GOVT. Mental Health Centre	1	
MCH Unit Cheroopa	1	
CHC thiruvallur	1	

Pandemic Management Plan

CHC Melady	1	
CHC olavanna	1	
CHC Thiruvangoor	1	
GGH	2	1
Malabar Medical College	3	1
ASTER MIMS, Calicut	2	2
Total	22	5

- Staff-to-Bed Ratio Analysis: "Surge Staffing" gap— extra nurses and respiratory therapists needed to manage the expansion beds.
 - Nurses (General FLTC Beds): Ideal ratio is 1:6 per shift. However, in a surge, this can be stretched to 1:10–1:15 depending on severity, with 45% additional staff for leave reserve.
 - Respiratory Therapists (RTs) (High Dependency/Low-level ICU): For beds requiring oxygenation or assisted ventilation, a ratio of 1 RT to 10–15 patients is typically required in a surge.

If the expansion plans involve adding 100 beds to a FLTC/CFLTC, the following staffing is required:

Role	Ratio	Shift (100 Beds)	24h Need (3 Shifts)	Total Surge Staff Needed (with 45% Relief)
Staff Nurses	01:10	10 Nurses	30 Nurses	~44-45 Staff Nurses
Resp. Therapists	01:20	5 RTs	15 RTs	~22 Respiratory Therapists

1. Standardize triage, cohorting, and IPC practices across levels using concise checklists and on-site mentoring

This ensures that the care provided is safe, standardized, and doesn't lead to "Super-Spreader" events within hospitals.

- Physical Cohorting Zones: Clearly demarcate healthcare facilities into "Green" (Non-COVID/Clean), "Yellow" (Suspected/Triage), and "Red" (Confirmed Infectious) zones.
- Triage "Door-to-Bed" Protocols: A concise 5-point checklist for the "Entry Gate" staff to sort patients by respiratory rate and oxygen saturation (SpO₂) within 3 minutes of arrival.
- On-Site Mentoring Roster: A schedule for "Shadow Training," where specialists from the District Hospital visit LSG clinics to provide hands-on training for ventilator use and PPE donning.
- IPC Compliance Checklists: A daily "Safety Walk" tool for supervisors to verify hand-hygiene stations, waste segregation, and environmental surface cleaning.

Pandemic Management Plan

- Healthcare Worker Prophylaxis: A formal system to monitor the health, vaccination status, and mental well-being of the medical staff to prevent "burnout-induced" IPC lapses.

SUPPLIES AND LOGISTICS

- Pre-position essential PPE, diagnostics, and medicines based on realistic consumption norms; include local production options where feasible (e.g., masks, sanitizers).
- Consolidated Consumption Norms: Establish a "Per-Patient, Per-Day" consumption rate for PPE, oxygen, and antibiotics to prevent over-stocking or under-stocking.
 - i. Personal Protective Equipment (PPE) Norms
 - Consumption is heavily dependent on the clinical setting (COVID ICU vs. Ward) and the aerosol-generating procedures (AGPs) performed.
 - High-Risk Area (ICU/Critical Care): ~30-50 pieces per patient per day (includes multiple gowns, gloves, mask changes, and head/shoe covers per shift).
 - Moderate Risk (General Covid Ward/Isolation): 10–15 pieces per patient per day.
 - Critical Item (N95 Masks): 1-2 per healthcare worker per shift (assuming sterilization protocols are in place).
 - ii. Oxygen Consumption Norms
 - Oxygen consumption is directly proportional to the surge of critical patients. Based on 2021 Kerala guidelines, 33% of patients may require oxygen.
 - ICU/Ventilator Case: 24,000–72,000 liters (24-72 m³) per patient/day (includes leakage and high tidal volume).
 - Non-ICU (HFNC/NIV) Case: 10,000–15,000 liters (10-15 m³) per patient/day.
 - Conservative Planning: 15 litres/min per case (avg. for ICU/severe).
 - iii. . Antibiotic Consumption Norms (PPPD)
 - Pandemic antibiotic use often shows heavy overuse (60-80% of patients), which should be addressed by strict Stewardship (AMS) protocols.
- Local MSME/Self-Help Group (SHG) Registry: to produce standardized masks and WHO-grade hand sanitizer.

During the COVID-19 pandemic, the Kozhikode Corporation Kudumbashree acted quickly to form 94 units (under "Fresh Bags") to produce "Fresh Masks" with a capacity of 35,000 per day. Similarly the Kudumpasree district mission will coordinate the production of standardized masks and WHO-grade hand sanitizer.
- Diagnostics "Cold-Chain" Audit: Verify the storage capacity (refrigerators/freezers) for diagnostic kits at the LSG level to ensure reagents remain viable.
- Kit-Based Distribution: Create pre-packed "Home-Care Kits" (basic meds, masks, instructions) that can be dispatched immediately to households with positive cases.
- Emergency Procurement By laws: Formalize the legal framework that allows the local body to purchase supplies from local vendors during a "State of Emergency" without traditional 30-day tenders.

MAP AND FORMALIZE SUPPLY CHAINS WITH CONTINGENCY ROUTES, FRAMEWORK AGREEMENTS, AND A SIMPLE INVENTORY TRACKING FORMAT.

- Contingency Routing Maps: Identify "Plan B" transport routes for medical supplies in case primary roads are blocked by lockdowns, floods, or protests.

Pandemic Management Plan

- Framework Agreements (Rate Contracts): Sign pre-fixed price agreements with vendors for the next 12–24 months to prevent "Price Gouging" during the height of a pandemic.
- Simplified Digital Ledger: Implement a "One-Page" inventory tracker (mobile-friendly) where local staff can log incoming and outgoing stock with a single click.
- Buffer Stock Trigger Points: Set "Re-Order Levels" (e.g., when stock hits 25% of 938347capacity) that automatically alert the District Health Emergency Operations Centre.
- Last-Mile Volunteer Network: Identify a "Bicycle/Two-Wheeler Brigade" capable of delivering life-saving medicines to remote or high-density areas where ambulances cannot enter.

PREPAREDNESS AND RESPONSE PROTOCOL AT DISTRICT LEVEL

This section describes the operational framework for the district once a pandemic is declared. It explains how the district and health system will move from routine data collection to active response, using a One Health approach.

CONSTITUTION OF ONE HEALTH COMMITTEE

The district shall constitute a One Health Committee comprising the district collector, Medical Officers (Modern Medicine, AYUSH, and Veterinary), the Health Inspector, and the Veterinary Surgeon.

Objective: The One Health Committee coordinates human, animal, and environmental health to prevent and control pandemics.

Sl No	Name	Designation	Department/Institution	Role in Committee
1	Snehil Kumar Singh	District collector	District administration	Chairperson
2	Dr. Rajaram Kizhakekandiyil	District Medical Officer(Health)	Health Dept	Member Secretary
3	Dr. Ramadevei	District Animal Husbandry Officer	Animal Husbandry	Member
4	Arun T	Joint Director, Panchayats	LSGI's	Member
5	Bindhu	District Agriculture Officer	Agriculture	Member
6	Sudheer Krishna	District Fisheries Officer	Fisheries	Member
7	Ashik Ali	District Forest Officer	Forest	Member

Pandemic Management Plan

Sl No	Name	Designation	Department/Institution	Role in Committee
8	Bibi Mathew	District Food Safety Officer	Food safety	Member
9	Dr. Lathika VR	District Surveillance Officer	Health Dept	Member
10	Dr. Akhilesh Kumar	District NKKP2 Nodal Officer (Convener)	Health Dept	Member
12	Kavitha	District coordinator	Kudumbasree	Member
13	Dr Sini	DMO	Ayurveda	Member
14	Dr Abdul Salam	DMO	Homoeo	Member
15	Dr Anina	DPM	AYUSH Mission	Member
16	Rakesh	District Nodal officer	Suchithwa mission	Member

KEY RESPONSIBILITIES:

- Review disease surveillance data (human + animal)
- Conduct ward-wise risk assessment and vulnerability mapping
- Approve quarantine/isolation centre locations
- Coordinate with district for resources (PPE, oxygen, ambulances)
- Periodically review health system surge capacity, including beds, oxygen, human resources, and ambulances.
- Approve and monitor risk communication and community engagement strategies, including rumour management.
- Ensure protection and service continuity for vulnerable groups (elderly, persons with disabilities, dialysis patients, coastal populations).
- Conduct quarterly mock drills
- Monitor equity measures for vulnerable groups

MEETING SCHEDULE:

Quarterly (normal times) | Weekly (outbreak alert) | Daily (pandemic phase)

PANDEMIC RESPONSE WORKFORCE

To ensure a coordinated and timely response during a pandemic, a dedicated Pandemic Response Workforce shall be constituted at the LSG level. The workforce will function under the overall supervision of the One Health Committee and in close coordination with the health authorities. Team-based deployment will enable efficient surveillance, case management, quarantine and isolation management, logistics support, and risk communication. Each team shall have a clearly designated team leader, defined roles, and

Pandemic Management Plan

an identified pool of personnel to allow rapid activation, rotation of duties, and continuity of services during prolonged emergencies.

Total Response Workforce Available

Team Name	Composition	Key Responsibilities	Team Leader
Surveillance and Contact Tracing Team	Epidemiologist, HI, JHI, data manager, JPHN, ASHAs and Volunteers	Case detection, contact listing, home visits, reporting	HI
Case Management Team	Doctors, Nurses, MLSP, Palliative Nurses	Patient care & referral	Medical officer
Quarantine & Isolation Team	district staff, Volunteers	Facility management	JHI
Psychosocial support	DMHP team	Counselling	Psychologist
Logistics & supply chain Team	district staff, Storekeepers, Drivers 3	Supplies & transport [PPE, medicines, oxygen, transport, waste management]	Ward Member
Communication Team	Ward members, Kudumbashree, Youth clubs, AWW workers and other self help groups	IEC, community meetings, countering misinformation	M.O in charge
Transportation	KSRTC, educational institutional buses	Transportation	M.O in charge

All teams shall be activated immediately upon outbreak alert or pandemic declaration and shall report daily to the LSG Incident Commander/Medical Officer, with consolidated reporting to the Block PHC. Duty rosters and alternate personnel shall be maintained to ensure uninterrupted services during staff shortages or prolonged response periods. Team composition and numbers may be revised based on the magnitude of the outbreak and availability of human resources.

Define governance, roles and structure

Clarify who leads what, from the district collector to the ward level volunteer, using existing disaster management and LSG structures.

District level:

- o Notify/strengthen a District Public Health Emergency & Pandemic Task Force under DDMA, integrating health, revenue, LSG, police, animal husbandry, ICDS, education and transport.
- o Define incident management: trigger points, activation of HEOC/control room, reporting lines, decision-making authority, and linkages to state IRT/HEOC.

Panchayat/ULB level:

Pandemic Management Plan

- o Re-activate or formalise Arogya Jagratha Samithis/health vigilance committees as the local pandemic committee, chaired by the LSG president, with the MO PHC as convener.
- o Micro define responsibilities: home isolation support, community surveillance, IEC, quarantine support, and essential services continuity.

ACTIVITIES AND MEASURES BEFORE AND DURING PANDEMIC

PHASE 1 - ALERT / PREPARATION

Surveillance and Reporting-Enhanced syndromic surveillance:

1. Data sources for surveillance: IHIP, rumour register, media reports etc
2. Event-based triggers (to be monitored and reported): clustering of cases to be monitored in coastal areas like Beypore for food borne outbreaks , kozhikode city for dengue outbreaks, Hepatitis A outbreak in areas like Kunnamangalam , Madavoor , Migrant clusters at construction sites in places like ramanattukara, feroke and olavanna for diseases like dengue,Malaria etc
3. Zoonotic and animal health surveillance : in coordination with veterinary, and forest department .
4. Event-based surveillance (EBS)

Early signals:

- o Unusual animal deaths (bats, pigs, cattle)
- o Clusters of fever/encephalitis, ARI cases

Community-based surveillance (CBS)

- local bodies trained to report:
 - o Dead animals/birds
 - o Sudden livestock illness

Animal health surveillance

- Regular veterinary monitoring:
 - a. Livestock diseases (rabies, brucellosis, leptospirosis)
 - b. Poultry surveillance (avian influenza)

Wildlife surveillance

Forest department monitors:

- c. Bat populations, forest fringe areas (Kuttyadi, Perambra, Kodenchery)
- d. Monkey deaths / abnormal behavior

Environmental surveillance of reservoirs

5. Logistics and Stock Preparedness

- Identify and empanel local vendors and define emergency procurement mechanisms in accordance with existing district and Health Department norms.
- Prepare and maintain an essential logistics checklist covering medical supplies, consumables, and support equipment.
- Pre-identify secure storage locations for emergency stocks and ensure maintenance of stock registers with regular updating.
- Finalise emergency transport arrangements, including availability of vehicles and identified drivers for rapid deployment during alerts.
- Designate a Nodal Officer (SVO) for Logistics to enable prompt decision-making, coordination, and communication during emergencies.
- Conduct rapid stock verification and ensure availability of minimum buffer stock, including:

Core components

Pandemic Management Plan

a) Essential medical supplies stockpile

- Pre-positioned stock at:
 - District warehouse (located at Karuvannur P.O., Naduvannur via, on the Kuttiady)
 - Taluk hospitals (Perambra , Koyilandy, Nadapura, Kuttiady, Balussery)
- Key items:
 - PPE kits - 665
 - N95 masks, gloves, gowns
 - Oxygen cylinders & concentrators
 - Essential drugs (antivirals, antibiotics, antipyretics)
 - IV fluids, emergency kits

b) Oxygen preparedness

- Strengthened after COVID:
 - Oxygen beds (~2500+), cylinders, pipelines
- PSA oxygen plants in major hospital- GGH
- Buffer stock maintained at district level

Cold chain & vaccine logistics

- ILR/Deep freezers at PHC/CHC level
- Vaccine carriers for field outreach
- Linked with Universal Immunization Programme (UIP) system

Supply chain management system

- Centralized procurement via KMSCL
- Digital tracking:
 - Stock registers (online/offline)
 - Real-time consumption monitoring
- Ensures no stock-out situation

IDENTIFICATION OF QUARANTINE AND ISOLATION FACILITIES

- Identify and list suitable buildings for quarantine and isolation (schools, hostels, community halls, etc.). The linelist is maintained at the health institution level.
- Categorise cases as per the severity and allocate to appropriate facilities (for instance, severe cases to classrooms, mild cases to an assembly hall in case of a school).
- Facility readiness checklist needed (beds, toilets, ventilation, etc).
- Find an alternate site if the primary sites are not available or not in use.
- Identify facility managers and support staff
- Prepare basic SOPs for:
 - Admission and discharge
 - Food, water, and sanitation
 - Infection prevention and waste disposal - SOP as per state guideline is following.
- Ensure availability of basic amenities: water, sanitation, electricity, ventilation, and waste disposal. Prepare a rapid activation plan for these facilities if case numbers increase.

RISK COMMUNICATION AND COMMUNITY PREPAREDNESS

Pandemic Management Plan

- Disseminate early warning messages on symptoms, preventive measures, and reporting mechanisms. Display IEC materials both in English and the local language in public places and ensure ward-level awareness.
- Sensitize elected representatives and community leaders on preparedness measures.
- Establish a rumour tracking and misinformation response mechanism to identify, verify, and promptly counter false or misleading information.
- Engage trusted local persons (ward members, ASHA workers, religious leaders, teachers, community volunteers) to communicate official public health messages and reinforce correct practices.
- Develop and deploy targeted IEC materials for:
 - Schools and educational institutions
 - Markets and commercial areas
 - Work sites and labour settings
- Conduct community sensitisation meetings at the ward level to promote preventive behaviours, address concerns, and strengthen community participation in preparedness and response.

PROTECTION OF VULNERABLE GROUPS

Vulnerable populations require priority protection through targeted line-listing, service continuity, and delivery mechanisms.

- Prepare and regularly update line-lists of vulnerable populations, including:
 - Elderly persons living alone - NCD cell
 - Persons with disabilities - DMO (H) under Deputy DMO
 - Pregnant women - RCH portal
 - Migrant workers - NVBDCP
 - Dialysis patients - NCD cell

The detailed line-lists are maintained as Annexure in the health institution level and updated periodically.

CLINICAL DEPENDENCY MAPPING

Ward-wise dependency and vulnerability maps are prepared and included in the LSGI wise PPP to identify households requiring regular support during emergencies. The continuity of essential health services for vulnerable groups will be ensured, including

- Dialysis services (facility mapping, transport arrangements, and scheduling)
- Continuity of treatment for TB, HIV, and other chronic conditions requiring uninterrupted medication
- Mental health and psychosocial support services - through DMHP

Delivery mechanisms for food, essential commodities, and medicines to vulnerable households through coordinated action involving ASHAs, JPHNs, Kudumbashree, volunteers, and local administration.

PHASE 2 - ACTIVE RESPONSE

1. CASE IDENTIFICATION AND CONTACT TRACING

Case detection and contact tracing activities will be carried out in coordination with the Health authorities, in accordance with disease-specific SOPs and IDSP guidelines.

Field Staff Involved

- Health Inspector (HI)
- Epidemiologist

Pandemic Management Plan

- Data manager
- Junior Health Inspector (JHI)
- Junior Public Health Nurse (JPHN)
- ASHAs and ASHA Supervisors
- Ward-level volunteers and Kudumbashree members (as required)

2. SCREENING CHECKPOINTS

Screening checkpoints at high-traffic locations (transport hubs, markets, religious gatherings) for early detection of symptomatic travellers and crowd screening during outbreaks. Potential locations include airport, railway station, bus stands, market entry points, and boat jetties, based on local context and risk assessment.

Screening activities will be carried out by trained personnel such as ASHAs, ward members, and volunteers, with support from Health Department staff. Necessary equipment, including non-contact thermometers and appropriate PPE, shall be ensured prior to activation.

Location	Type (Bus stand/Jetty/Market/Railway)	Staff Deployed (ASHAs/Volunteers)	Screening Method	Reporting authority
Bus stand	Transport hub	One JHI One ASHA One health Mentors	1.Swab Collection. 2. Blood smears collection (RDT) 3.Thermal Scanners	Surveillance Nodal Officer in control room
Market entry	Market	One JHI One ASHA Male health volunteers	1.Swab Collection. 2. Blood smears collection (RDT) 3.Thermal Scanners	Surveillance Nodal Officer in control room
Boat jetty	Water transport	One JHI One ASHA Male health volunteers	1.Swab Collection. 2. Blood smears collection (RDT) 3.Thermal Scanners	Surveillance Nodal Officer in control room

STANDARD SCREENING PROTOCOL

1. TEMPERATURE CHECK (Non-contact)	2. VISUAL SYMPTOMS (Cough/Fever/Breathless)	3. TRAVEL HISTORY (Last 14 days)
↓	↓	↓
4. QUICK RISK ASSESSMENT High Risk → Test/Quarantine Suspect → PHC Referral	5. ACTION TAKEN Normal → Allowed IEC + Mask provided	

The screening protocol shall include temperature screening, observation for visible symptoms, and inquiry regarding recent travel or exposure history. Individuals

Pandemic Management Plan

identified as suspects during screening shall be immediately referred to the nearest PHC/FHC for further evaluation, testing, and appropriate action as per prevailing guidelines.

3. PANDEMIC CONTROL ROOM

The Pandemic Control Room (PCR) serves as the central nerve center for real-time coordination, data aggregation, decision support, and communication during outbreaks. It consolidates information from all district teams, health facilities, and community sources to enable rapid decision-making.

CONTROL ROOM INFRASTRUCTURE AND LOCATION

Primary Location: Govt. Guest house, west hill

Backup Location: PWD rest house, west hill

HEALTH SYSTEM CONTROL ROOM FRAMEWORK

The PCR is organised into seven functional pillars to ensure no aspect of the response is overlooked:

1. Rapid Response Team (RRT)

- Provides immediate intervention during emergencies, clusters, and field alerts.
- Coordinates urgent actions such as case investigation, contact tracing, isolation, and inter-facility referrals.

2. Data Management & Analytics Team

- Collects, validates, and manages key health system indicators (cases, tests, beds, HR, supplies).
- Analyses data trends, generates projections, and supports evidence-based decision-making for local authorities.

3. Human Resource Deployment Team

- Allocates healthcare staff efficiently based on workload and need
- Ensures adequate and equitable workforce distribution across facilities

4. Laboratory Surveillance Team

- Oversees diagnostic testing coordination, sample transport, and timely reporting of results.
- Monitors lab indicators (testing volume, positivity rate, turnaround time) for early detection of outbreaks

5. Vaccination Cell (If Required)

- Plans and executes vaccination campaigns, including micro-planning and session scheduling.
- Tracks coverage, identifies gaps, and coordinates corrective actions with field teams and outreach services.

6. Infrastructure & Patient Occupancy Team

- Monitors facility capacity, earmarked beds, oxygen and critical care resources across all linked facilities.
- Ensures optimal patient distribution and referral management using updated bed status and resource data.
- BMWW- source segregation, disinfection, waste management

7. Communication team

- Develop and disseminate IEC materials in different languages
 - Check for mis information/ rumors
-

KEY CONTROL ROOM TEAM

The Control Room Team coordinates all pandemic response activities within the district and serves as the single command and communication hub during activation. It integrates information, field actions, logistics, and policy execution across all participating departments and health facilities.

Pandemic Management Plan

SOP for alert escalation/trigger point with mapping of responsibilities.

- The Control Room shall be staffed with a designated In-Charge, epidemiologists, data managers, data entry personnel, and communication staff with clearly defined roles and shift arrangements.
- It shall maintain updated records on daily monitoring indicators including new cases, persons under active quarantine, and hospital bed occupancy.
- All reports and situation updates shall be shared daily with the Block and District Surveillance Unit.
- The Control Room shall act as a single point of contact for coordination with response teams, health institutions, and other departments.
- Contact details of the Control Room shall be widely communicated to field staff and stakeholders during activation.

CONTROL ROOM MANDATES

- Control room will be operational 24*7 managed by floor managers in rotation
- Control room access is authorised only to those engaged in control room activities
- Identity proof is mandatory
- In and out movement is written in log logbook
- Food items are not permitted inside the control room
- Team members of different groups have to work in their assigned areas
- Review meetings will be held in the mornings and evenings
- Minimum two members from all groups will participate in review meetings
- Critical appraisal of group activity will be done in the meetings
- The documentation team will record minutes of all meetings
- Decisions taken in the meeting will be communicated to the respective groups
- Implementation status of the decisions taken will be monitored
- Emergency meetings will be informed by phone to the respective teams by the documentation team
- The single window communication system will be operated by the documentation team
- All sub-teams communicate with the control room via their own email ID.
- All communications between the teams were coordinated through the control room.
- All communications are well documented.
- Advances in information technology are well utilised for communication
- Communication to the media will be done only through the media management team
- Health bulletin release at 6 pm
- A departmental coordination meeting at 6 pm
- Press briefing at 7 pm

ACTIVITIES OF VARIOUS TEAMS

SURVEILLANCE TEAM

HOSPITAL SURVEILLANCE

- The condition of the Symptomatic patients admitted at isolation wards of hospitals will be closely scrutinized, and reports will be updated to surveillance team
- Analysis of the reports

Pandemic Management Plan

FIELD SURVEILLANCE

- Those patients discharged from hospitals will be monitored by field workers in their corresponding PHC area
- Those asymptomatic travellers/contacts in home isolation will also be monitored for 28 days by field workers, and reports will be sent to the DSO

LAB SURVEILLANCE

- The DSO and District nodal officers entrusted for sample collection will inform to the lab surveillance team before sample collection
- Sample requisition forms will be scrutinised before sending to National Institute of Virology Pune/Alappuzha/designated labs
- Liaison with districts and sample collection point
- Support and supervise Surveillance activities at district level
- Establishing a support system with SMO (WHO), a mechanism for strengthening the IDSP disease surveillance system.
- Daily LSG-wise monitoring from state level
- Detailed data monitoring at IDSP district unit.
- Identifying areas for inter-sectoral action & steps for the same.

24 X 7 CALL CENTRE MANAGEMENT TEAM

- **To Set-Up**
- A control room call centre shall be set up in the district (Gov. Rest house, west hill). The call centre is set up with 3 laptops and 3 mobile/landline telephone facilities. Each Call Centre Operator is assigned both a telephone and a computer. One outgoing mobile facility is also available for answering pending calls. Two WhatsApp numbers are also available in the disaster control management room. Depending on the configuration of the call center, each workstation has the following items:
- Headset for hands-free answering;
- Reference materials (issued upon activation of call center operations);
- Item to be used to request assistance from the supervisor (Paper and pen/pencil, register etc)
- All phone/computer banks are set up in close proximity to power, telephone, and data sockets/ports.
- Call Center Supervisors are to utilize a sign-in/sign-out sheet to keep track of Call Center Operators.

MANDATES FOR CALL CENTRE

- Maintenance of discipline
- Time management
- Call centre will be operational 24*7
- Documentation of all the activities happening in call centre
- Daily consolidation report at 4.30 pm.
- Establishing call centre with sufficient connectivity
- Linkage with DISHA system
- To answer medical queries, logistics and administrative issues regarding health and health related problems
- Daily maintenance of second and third level call referral.
- Compilation format as follows.

Total number of calls	No: of calls on the date--	Total	Case follow up till today	Case reported on --/-- /2020	Total fever
-----------------------	----------------------------	-------	---------------------------	------------------------------	-------------

Pandemic Management Plan

till today	/-- /2020				

- DISHA Calls

HR MANAGEMENT

- Human resource management mostly happens at the district level but at any point if the district needs any additional support the needs can be communicated to the state.
- The team should have a thorough knowledge of all district HR distribution.
- The team should also communicate with the district regarding the optimum redistribution policies according to the needs.
- HR details of the isolation facilities should be managed and timely decisions at state level if necessary should be taken from the control room.
- The HR data of isolation facilities/nodal centres should be compiled on a daily basis and ensure there is no shortage in any category.

TRAINING AND AWARENESS GENERATION

- The district should train all the necessary cohorts in a timely manner, and the data should be compiled at the state level. The state team has the responsibility for preparing the training materials according to the daily needs being discussed in the control room meetings. These training materials should be vetted by a group of experts and should be disseminated via control room mail id to all concerned (districts, agencies, groups, IMA, IAP etc)
- Identify the segments in the Government and Private sectors
- Prepare segment-specific relevant modules
- Preparation of training manuals
- Dissemination of the prepared IEC materials including audiovisual aids/training materials to health workers/volunteers/public/media
- Preparation of FAQ'S and its answers
- Online / Telephonic trainings for district level officers/health workers/volunteers as and when required
- Training to call centre duty staff
- Team of Master trainers
- Conduct of training and demonstration sessions

Training Monitoring Format

Sl No	Segment	Subject	Place	Date	Number of persons attended
	Govt sector				
	Doctors				
	Paramedical staff				
	Attendants				
	Private sector				
	Doctors				
	Paramedical Staff				
	Attendants				
	Others				
	ASHA				
	Line departments staff				

Pandemic Management Plan

- Verify and compile the needs of additional isolation place if the number is increasing in each district
- The data should be collected in the following format at the district level and compiled at the state level
- Monitoring Format
- **DATE**

Sl No		INSTITUTION Describe and give data
	Whether isolation ward identified and all required things are set up	
	Whether the specific teams have been identified and trained Number of Doctors Number of Paramedical staff Number of Attendants	
	Whether stand by team identified and trained Number of Doctors Number of Paramedical Staff Number of Attendants	
	Duty roster prepared	
	Whether all inventory is ensured	
	Number of beds	
	Number of Patients admitted and their details	
	Infection control measures taken Details	
	Bio medical waste disposal mechanism from Isolation ward	
	Institution requirements details	

MEDIA SURVEILLANCE TEAM

- Print, visual and social media surveillance with the support of the State and District team.
- Collection of information regarding demand and supply of logistics, Human resources etc. circulated in the media, and addressing the needs by bridging the gaps after validating the information.
- Surveillance of issues regarding 2019-nCoV disease circulating in the media.
- Validating the information collected from the media for negative outcomes and executing timely preventive and control measures.
- Reply queries to the general public regarding health related events and information through phone numbers circulated at the state level.
- District level compilation of media surveillance data should also happen timely
- Reporting format of cyber space monitoring

Sl no :	Description	Details
1	Whether any misinformation noticed	
2	Misinformation noticed Give details in brief	

Pandemic Management Plan

3	Whether reported to take action and case booked	
4	Cases booked today	
5	Total cases Booked till today	

SAMPLE TRACING TEAM

- The team should keep a watch on samples sent to each lab (VRDL KKD/NIV pune/Alappuzha) from the districts and answer all queries regarding the sending of samples in coordination with the PH lab.
- The team should hand hold the district in transportation of samples, filling formats, collecting reports and intimate the authorities regarding the status of results Monitor sample collection and facilitate
- All sample test results to be reported to the respective Superintendent of MCH, District Collector, DHS, DME, DMO and Principal Secretary on daily basis
- Sample Monitoring Format
- **DATE**

Sl No	Description	Number	Results received	Positive
1	Total Sample Collected Blood Urine Throat Swab			
2	Samples sent to Alpy NIV Blood Urine Throat swab			
3	Samples sent to Manipal Laboratory Blood Urine Throat swab CSF			
4	Samples sent to NIV Pune Blood Urine Throat Swab CSF			

IEC/BCC and Media Management team

- Preparation of IEC materials related to the preventive and promotive activities to be done at the field level to decrease the anxiety of the general public and to disseminate factual information regarding the disease
- Dissemination of same in PRD, TV channels , AIR , social media etc
- Timely updating of website with regard to IEC
- Preparation of daily reports for media

Pandemic Management Plan

- Arrangements of press conferences as per direction
- To act as media spokesperson for DHS
- Review format

Press note	
Press brief	
Social media dissemination content	

DOCUMENTATION TEAM

- Document all meetings related to pandemic management at Minister, Principal Secretary and DHS level
- Ensure proper communication of all decisions to district's and Public health institutions for implementation of the decisions made in meetings
- Proper communication to various teams of the control room regarding meetings, guidelines, SOPs, etc.
- Communication to the concerned teams for website and social media updates.
- Daily compilation of activity reports by various teams

Private hospital surveillance team

- The team should compile the data regarding the general public visiting private hospitals from all districts and suspect and identify any missed out contacts of contacts reaching the facilities.
- Good rapport should be ensured with the private hospitals/associations
- Reporting format

Item	Cumulative
Number of persons visited private hospitals	
Suspected cases/contacts identified from Jan 15 2020 onwards	

EXPERT STUDY COORDINATION TEAM

- They should work with NHM admin and arrange and facilitate the visits of expert agencies provided they are coming with
- Approval from the head of the institution
- Letter to the principal secretary, health and family welfare for the sanction of the same
- Their own logistical support
- Should be ready to give their input regarding the present scenario and work with the current state and district team
- The team should brief the principal secretary health and family welfare regarding the feasibility, pros and cons of approval in each case after studying their background.
- Reporting format

Sl no	Details
1	Expert / Expert Group Institution Govt or private
2	Names:
3	Activities undertaken

TRANSPORTATION AND AMBULANCE MANAGEMENT TEAM

- The teams should compile data on ambulance driver training, availability, and spacing, as well as on vehicles carrying patients from home isolation to hospital isolation facilities and back. It should be ensured that there should be continuous availability of vehicles 24 x 7 in the districts. The data should be compiled in the following format. All possible challenges at the district should be addressed there itself, and decisions taken could be compiled and addressed during the control room presentation.

Sl no	Vehicle number	Driver	From	To	Post trip sanitization

INTER DEPARTMENTAL AND COORDINATION TEAM

- There should be regular connections with all line departments like LSGI's, Animal husbandry, tourism , police, kudumbasree, Suchitwa mission etc

COMMUNITY LEVEL VOLUNTEER COORDINATION TEAM

- The field level activity monitoring should be done by this team.
- Grass route level support including food kit management when more people are at quarantine should also be done with the help of kudumbasree , and senior consultant ASHA program in NHM should review these activities and gaps on a daily basis and present it at control room meeting .
- Collect information of Contacts and addresses
- Prepare the food kits to provide to the Contacts in Home Quarantine
- Reporting format

Sl No	Description	Details
1	Number of Contacts under Home Quarantine	
2	Number of Kits prepared and provided to Homes where contact is quarantine	
3	Kits stock	
4	Kits distribution	
5	Kits balance	

PSYCHOLOGICAL SUPPORT TEAM

- The team should arrange a district /field team for managing posttraumatic stress-related events and stress during quarantine. The field-level activities should be compiled and presented during daily control room meetings. The DMHP team is entrusted for this.

DATA MANAGEMENT

- The statistical wing along with data managers should utilise all Google tools to compile all the above data formats and assist the presentation of teams in the daily control room meeting.
- The technical support of MIS manager NHM should be utilized in the same.
- For all these parameters district district-specific sheets with auto-consolidated compilation sheets should be made

Pandemic Management Plan

- The sheets should be dynamic, and compilation should be given access to all state team leaders, SMD and the principal secretary.
- Districts should be supported for a timely update in the sheet in the specified format

FINANCE AND BUDGETING TEAM

- The state team for finance should discuss and foresee various areas of fund requirement and pool resources for all possible needs arising from time to time.
- The decision regarding fund expenditure and necessary AS should be prepared timely so as not hinder any processes happening in the districts.

Sl no	Name of team	Team Leader	Members
1	Surveillance team	DSO	RCHO, Dy. DMO
2	Call Centre management team	HWC Nodal officer	NUHM -PRO
3	HR management	AA	SS, District PRO
4	Training and awareness generation	Prof. Microbiology GMC KKD	Asst. Surgeon, H&FWTC , Dist. Nursing Officer, DMO (H) KKD
5	Material management team	Manager, KMSCL	SVO
6	Infrastructure (isolation ward and facilities) management team	DPM NHM KKD	Supdt. GMC KKD, Ardran nodal officer
7	Sample Tracing team	HOD Microbiology, GMC KKD	Dist Lab Officer
8	Media Surveillance team	DMO	Dist. Education & Media officer
9	IEC/BCC and Media Management team	Dist. Education & Media officer	Deputy Education & Media officer, Consultant (D&C) NHM KKD
10	Documentation team	MO - FHC	Block Epidemiologist, data manager
11	Private hospital surveillance team	DPM NHM KKD	Dy. Supdt. Casualty GMC KKD
12	Expert study coordination team	Addl DMO	RCH Officer
13	Transportation and ambulance management team	JAMO	DTO, ARMO GGH KKD
14	Inter departmental and coordination team	DVBDCO	DD LSGD
15	Community level volunteer coordination team	TA DMO (H) KKD	Block Epidemiologist CHC Thiruvallur
16	Psychological support team	DMHP Nodal Officer	Counselors, DMHP

Pandemic Management Plan

Sl no	Name of team	Team Leader	Members
17	Data Compilation	DSO	District Epidemiologist, data manager
18	Budget and financing	DMO DPM	DSO, Ardrum nodal officer

DAILY MONITORING INDICATORS

To ensure timely decision-making and effective response, the following key indicators shall be monitored and updated on a daily basis by the Pandemic Control Room:

1. EPIDEMIOLOGICAL INDICATORS:

New cases reported today, Total active cases, Test Positivity Rate (TPR), Case Fatality Rate (CFR)

2. Surveillance Indicators:

Persons under home quarantine, High-risk contacts identified, Fever, ILI, SARI or other symptoms (syndromic surges), Travellers (symptomatic or high-risk arrivals), Animal husbandry surveillance (zoonotic alerts, unusual animal deaths, poultry/bird flu signals), Mortality surveillance (excess deaths, unexplained fatalities, verbal autopsy reports)

3. Logistics and Infrastructure Indicators:

Hospital / CFLTC beds occupied, Oxygen cylinders/concentrators available, Ambulances on standby

4. Alert Findings

The following table outlines category-specific **trigger points (red flags)** from surveillance indicators and corresponding immediate actions for the Pandemic Control Room. These enable rapid response to alert findings like testing anomalies, positive cases exceeding thresholds, clusters, and WGS reports.

Category	Trigger Point (Red Flag)	Immediate Action
Clusters	Geographical or facility-based: 5+ cases linked to one location (office, school, street).	Declare a micro-containment zone; perimeter control and active case finding.
Testing	Sudden drop in testing volume / delay in reporting / unusual testing trends	Review the sample collection process, address lab bottlenecks, deploy additional testing teams, and notify the District Lab.
Lab	Test Positivity rate increases	Increase testing sites in that ward.
Hospital	>80% Oxygen bed occupancy	Activate backup/CFLTC beds.

Pandemic Management Plan

Category	Trigger Point (Red Flag)	Immediate Action
Travel	Cluster of cases from a single flight/train or high-risk arrival group.	Trace all passengers in adjacent seats; implement mandatory institutional quarantine.
Animal	Mass poultry/wildlife death or unusual sickness	Notify Animal Husbandry, sample the area, and dispatch RRT for environmental sampling and zoonotic check.
Mortality	Sudden spike in home deaths or brought-in-dead (BID) cases	Audit the deaths and Active Case Search drive
Additional investigations like Whole Genome Sequencing (WGS)	Detection of a Variant of Concern (VOC) or Variant of Interest (VOI)	Implement strict micro-containment; update clinical protocols to match variant severity.

4. COMMUNICATION OF PUBLIC HEALTH INFORMATION

A Community Communication Hub shall be established to ensure the timely, accurate, and consistent dissemination of information during a pandemic. The Hub will operate under the coordination of the control room's Nodal officers and serve as the nodal point for public communication, risk messaging, and community engagement. It will support the dissemination of official advisories, promote preventive behaviours, address rumours and misinformation, and ensure that messages reach all sections of the population through trusted local channels and leaders.

KEY COMMUNICATORS

Channel	Responsible Person
District-level announcements	District Collector
Social media	District Education and Mass Media Officer
Local Cable TV/Radio	PRD

Pandemic Management Plan

- All messages disseminated through the Hub shall align with advisories issued by the Health Department and District authorities.
- Community leaders shall be sensitized to support behavior change, reduce stigma, and counter misinformation.
- Special efforts shall be made to reach vulnerable and hard-to-reach populations using locally appropriate communication methods.

Rumor Tracking: A designated volunteer will monitor local social media/WhatsApp groups daily to identify misinformation and issue official clarifications via the Communication Hub.

5. COORDINATION WITH DISTRICT/STATE AUTHORITIES & OTHER ORGANISATIONS

Effective coordination with Block, District, and State authorities is essential to ensure timely reporting, technical guidance, and uninterrupted supply of essential resources during a pandemic. The LSG shall establish clear communication channels, designate responsible officers, and adhere to prescribed reporting timelines to support coordinated public health action and efficient resource mobilisation.

KEY DETAILS:

- Nodal Officer for District level Reporting: DSO
- Contact Number: 98478 58421

Reporting Schedule and Protocols:

To Whom	What to Report	Frequency	Nodal Person
Block PHC	Complete Situation Report (Cases, Quarantine, Beds, Screening, Deaths)	Daily	Block MO
State IDSP Unit	Outbreaks/Clusters/Unusual Events (>5 cases same ward)	Daily	DSO
Veterinary Officer	Animal health events/Zoonotic alerts	Daily	Veterinary Officer
State Cell	Zoonotic cross-sector events	Daily	DSO

SUPPLY CHAIN COORDINATION

The LSG shall coordinate closely with Block, District, and State authorities (KMSCL) to ensure uninterrupted availability of essential goods, medical supplies, and logistics during a pandemic. Supply requirements shall be assessed regularly based on case load and communicated promptly to the appropriate authorities for timely replenishment.

Key Points:

Pandemic Management Plan

- Maintain updated contact details of District and Block nodal officers for health logistics, oxygen supply, ambulances, and essential medicines.
- Submit timely indent requests for PPE, testing kits, medicines, oxygen, and other critical supplies through prescribed channels.
- Monitor stock levels at district facilities, quarantine/isolation centres, and field teams through daily stock registers and dispensing logs to prevent shortages.
- Coordinate with District authorities, Karunya/Neethi medical shops, and local purchase committees for funds allocation and emergency procurement.
- Ensure regular monitoring of dispensing registers at all facilities to track usage, expiry, and pilferage—shortages being a perennial issue requiring proactive weekly audits.
- Activate surge procurement protocols during high caseloads, leveraging local purchase powers under district funds alongside state supplies.

Test Kits (RTPCR/Rapid)	KMSCL	9847174661

COLLABORATION WITH NGOS, PPP, AND CSR

To augment government efforts during a pandemic, the LSG shall collaborate with NGOs, voluntary organisations, and private sector partners through public–private partnerships and Corporate Social Responsibility (CSR) initiatives, in coordination with District authorities. The district administration already has an initiative called Compassionate Kozhikode- that creates a platform for citizens to voluntarily help the needy, including patients, the elderly, and children's homes. Many volunteers from college level are associated with this.

Key Points:

Pandemic Management Plan

- Engage NGOs and community-based organisations for community outreach, awareness, and support to vulnerable populations.
- Leverage CSR support for procurement of medical equipment, PPE, oxygen concentrators, food kits, and sanitation materials, as permitted.
- Ensure all collaborations align with government guidelines and are routed through approved administrative and financial procedures.
- Maintain transparency and documentation for all external support received and utilised.

Organization	Type	Support Offered	Contact Person
Compassionate Kozhikode	Initiative by the district administration	social welfare services	Nijeesh-9446477818

INTERDEPARTMENTAL COORDINATION

Coordination among departments during a pandemic shall be ensured through regular review meetings convened by the district President. These meetings will provide a structured platform for sharing situational updates, assessing resource availability, resolving operational gaps, and taking joint decisions to ensure a coordinated and timely response.

Department	Representative	Key Role	Contact
Health	DMO	Case management	99461 05491
Veterinary	District Veterinary Officer	Animal surveillance	9446311970
ICDS	Coordinator	Nutrition support	0495-2375760

Police	Superintendent	Containment enforcement	9497996989
Water Authority	Ex Engineer	Water supply	0471 2328486
District Engineer	Ex Engineer	Quarantine infrastructure	8086395186

Pandemic Management Plan

PHASE 3 - SURGE CAPACITY

Phase 3 is activated when there is a rapid increase in cases, high test positivity rates, or when existing health facilities and quarantine arrangements approach saturation. The focus of this phase is to expand isolation capacity, augment clinical care services, and mobilise additional resources through district and state support mechanisms.

CONVERSION OF COMMUNITY FACILITIES

To manage increased case load, the district shall activate additional isolation facilities by repurposing identified community infrastructure such as community halls, auditoriums, schools, hostels, or other suitable buildings.

RECOVERY AND REHABILITATION PHASE

The recovery and rehabilitation phase marks the transition from crisis response to long-term sustainability, guided by the District Health Administration and state-wide campaigns.

1. Impact Assessment & Service Restoration

- **Damage & Impact Assessment:** Integrated surveillance platforms like 'Epiform' under the K-CDC pool data to evaluate the pandemic's impact on vulnerable populations.
- **Restoration of Health Services:** Post-surge, facilities like Govt Medical College, Kozhikode resume elective procedures while newly created specialized centers, such as the Institute of Organ Transplantation, expand clinical capabilities.

2. Population Rehabilitation & Psychosocial Support

Pandemic Management Plan

- Rehabilitation: Vulnerable groups, particularly those in Vilangad receive targeted rehabilitation packages including housing and livelihood support.
- Mental Health Support: The DMHP manages post-pandemic psychological agonies through multidisciplinary mobile teams and community-based rehabilitation centers like Santhwanam.

3. Recovery Phase Surveillance & Sanitation

- Disease Surveillance: Daily communicable disease reports and sentinel surveillance systems continue to monitor for community transmission and potential new threats (e.g., Nipah).
- Environmental Cleanup: The 'Malinyamuktham Nava Keralam' campaign aims for a completely garbage-free state by mid-2025, deploying digital tools and Haritha Karma Senas for rigorous sanitation and waste management

4. Policy & Health System Strengthening

- Livelihood Restoration: Social Justice Department schemes provide financial assistance and subsidies for income-generating activities to help families rebuild economic stability.
- Documentation & Research: After-action reviews are conducted to institutionalize lessons learned from local outbreaks, such as the 2018 Nipah response, ensuring that preparedness enhancements are evidence-based. The Gov.MCH , calicut and the One health centre for Nipah gives technical support for research.

CONCLUSION

The district Pandemic Preparedness Plan is not merely a reactive document but a vital safeguard for the district's socio-economic and public health stability. Its primary importance lies in its ability to decentralize power, empowering Local Self-Governments (LSGs) to act as the first line of defense. By establishing clear triggers for action—ranging from surveillance at the panchayat level to the full activation of the Command & Control Centre—the plan ensures that the response is swift and evidence-based. This structured approach minimizes the chaos typically associated with emerging infectious diseases like Nipah or novel respiratory viruses, effectively protecting the district's high-density population from system-wide collapse.

The scope of this plan extends far beyond clinical settings, encompassing the entire lifecycle of a pandemic from early detection to long-term rehabilitation. It integrates sophisticated digital platforms like Epiform for predictive modeling. By addressing upstream supply chain resilience, standardized clinical protocols for home and hospital care, and stringent biomedical waste management, the plan creates a closed-loop system of safety. Furthermore, its inclusion of the all line departments ensures that marginalized groups are not left behind, making the plan's scope truly inclusive and socially responsible.

Ultimately, the conclusion of the 2026 plan signals a shift toward a "Ready State" rather than a "Response State." The emphasis on Health System Strengthening ensures that the lessons learned from previous outbreaks are institutionalized. By prioritizing mental health through the District Mental Health Programme and fostering community trust through transparency, the plan secures the "social capital" necessary for public cooperation during crises. This comprehensive strategy ensures that Kozhikode remains a global benchmark for pandemic management, capable of navigating future biological threats while continuously improving the daily health of its citizens.

RECOMMENDATIONS

1. STRENGTHENING HEALTHCARE INFRASTRUCTURE

- Establish a primary health response unit within the Panchayat with trained staff.
- Ensure availability of basic medical supplies (masks, sanitizers, PPE kits, oxygen cylinders).
- Create tie-ups with nearby hospitals for emergency referral and transport.

2. COMMUNITY AWARENESS & EDUCATION

- Conduct regular awareness campaigns on hygiene, vaccination, and preventive measures.
- Use local communication channels (community radio, WhatsApp groups, notice boards) to spread verified information.
- Train volunteers to act as health ambassadors in each ward.

3. EMERGENCY RESPONSE & COORDINATION

- Form a Pandemic Preparedness Committee at Panchayat level including health workers, ward members, and NGOs.
- Develop a clear action plan for lockdowns, quarantine, and distribution of essentials.
- Maintain a database of vulnerable groups (elderly, differently-abled, chronically ill) for targeted support.

4. SUPPLY CHAIN & FOOD SECURITY

- Identify and support local suppliers and farmers to ensure uninterrupted food supply.
- Create community kitchens during emergencies to serve vulnerable populations.

Pandemic Management Plan

- Stockpile essential commodities in Panchayat-run outlets for crisis periods.

5. DIGITAL PREPAREDNESS

- Promote digital platforms for telemedicine consultations.
- Use Panchayat's website/social media for real-time updates on health advisories.
- Encourage online grievance redressal to reduce crowding in offices.

6. TRAINING & CAPACITY BUILDING

- Organize mock drills for pandemic response in schools, offices, and public spaces.
- Train Panchayat staff and volunteers in first aid, infection control, and crowd management.
- Collaborate with NGOs and health departments for capacity-building workshops.

7. LONG-TERM RESILIENCE

- Integrate pandemic preparedness into the Panchayat Development Plan.
- Allocate a dedicated budget for health emergencies.
- Encourage community participation in planning and monitoring preparedness measures.

MOCKDRILL SCENARIOS

Periodic mock drills are being conducted in the district as per the central guidelines and the details of those are regularly updated in the IHIP portal.

COMMUNICATION

Effective communication plays a critical role during mock drills to ensure the timely dissemination of information, coordination among teams, and community awareness.

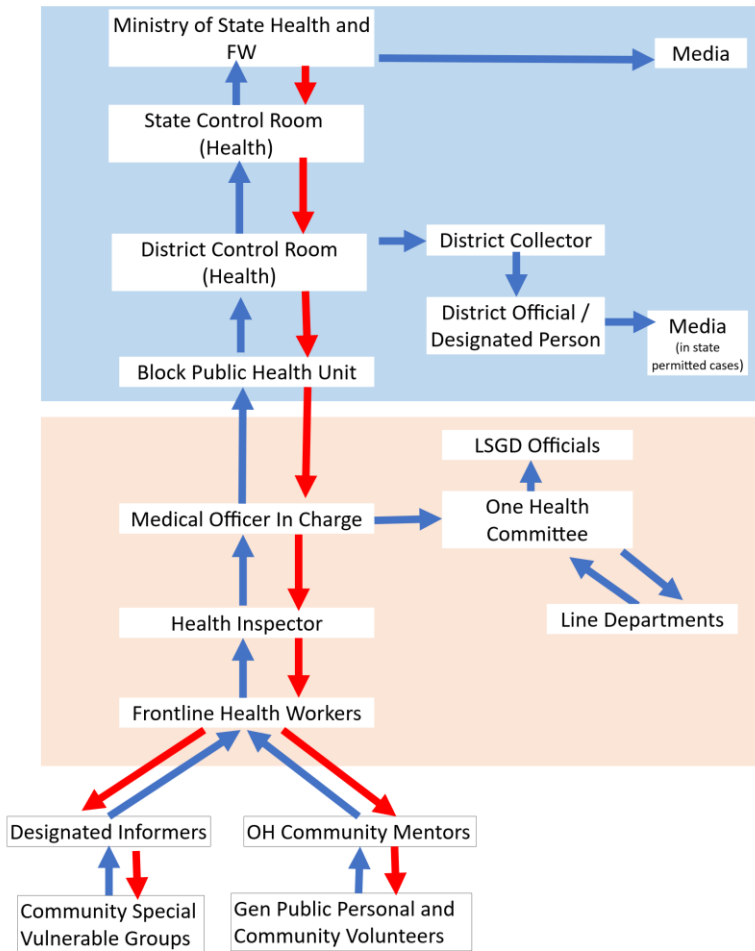

Communication Strategies

- Ward-level Rapid Response Teams (RRTs), Grama Sabhas, and vulnerability groups will actively participate in preparing and executing pandemic response plans to identify local issues related to prevention, preparedness, response, and recovery.
- Local community leaders will be involved in awareness and response activities to strengthen trust and community participation.
- Special trained informers within vulnerable groups will help identify suspected cases and report early warning signals.
- Multilingual workers will facilitate communication with migrant workers and linguistically diverse populations.
- NGOs and Resident Associations will assist in awareness generation, resource mobilisation, and community support.
- A simple reporting mechanism for the public will be promoted using platforms such as the Integrated Health Information Platform (IHIP) or mobile applications, enabling quick reporting through messages or snapshot-based alerts.
- Home isolation monitoring teams consisting of trained community volunteers will support health workers in monitoring individuals under home isolation.

These communication mechanisms will ensure that accurate information reaches the community quickly while minimising misinformation.

COMMUNICATION PLAN FLOW CHART

LSGD >>>>> INSTITUTION >>>>>>>

Benefits

- ▶ **Sustainability:** Solutions are more likely to last because they are locally owned.Faster
- ▶ **Response:** Local networks provide quicker initial responses.
- ▶ **Trust & Collaboration:** Builds bridges between communities and external agencies.

PANDEMIC PREPAREDNESS CAPACITY BUILDING & TRAINING PLAN

Background & Rationale

- Pandemics pose serious threats to public health, safety, and livelihoods.
- Preparedness requires skilled human resources across sectors.
- Capacity building ensures coordinated, timely, and effective response.
- District-level preparedness is critical for early containment.

Objectives of Capacity Building

- Strengthen readiness of health and allied sectors.
- Improve early detection, reporting, and response.

Pandemic Management Plan

- Ensure inter-departmental coordination.
- Protect frontline workers and the community.
- Maintain essential services during pandemics.

Target Groups for Training

Health Sector (Government & Private)

- Doctors (all specialties)
- Nurses & paramedical staff
- Laboratory technicians
- Public health staff
- ASHA workers & JPHNs
- Private hospital staff

Police & Emergency Services

- Kerala Police & Traffic Police
- Home Guards
- Fire & Rescue Services
- Ambulance drivers & EMTs
- Roles: crowd control, quarantine enforcement, emergency response

Local Administration & Governance

- District administration
- Municipalities & Panchayats
- Revenue Department
- Public Works Department
- Roles: logistics, containment zones, essential services

Education & Community Groups

- School & college teachers
- Students & NSS/NCC volunteers
- Kudumbashree units
- Community-based organizations
- Religious & community leaders

Modes and Methods of Training

Modes of Training

- Classroom/workshop-based training
- On-site/hands-on training
- Online & virtual training modules
- Simulation exercises & mock drills
- Peer learning & cascade training
- Awareness campaigns
- Online media and social groups

Training Methods

- Lectures & interactive sessions
- Demonstrations & skill stations
- Case studies & role plays
- Table-top exercises
- IEC material & SOP dissemination

Pandemic Management Plan

Key Training Topics

General Topics

- Disease surveillance & reporting
- Infection prevention & control (IPC)
- Use of personal protective equipment (PPE)
- Sample collection & transport
- Risk communication & community engagement

Advanced & Sector-Specific Topics

- Hospital surge capacity management
- Quarantine & isolation management
- Psychosocial care & stress management
- Waste management during pandemics
- Law & order and ethical issues

Institutional & Resource Support

- District Medical Office
- Kerala Health Services
- State Disaster Management Authority
- Medical colleges & training institutes
- Police Training College

Monitoring & Evaluation

- Pre- and post-training assessment
- Feedback mechanisms
- Periodic refresher trainings
- Mock drill evaluations
- Documentation & reporting

Training Schedule (by Quarter)

	Jan-Mar	Apr-Jun	Jul-Sept	Oct-Dec
Climate events	Cool	Hot	Rainy, Flood	Cold
Disease events	ILI	HRI, Hep A, ADD	Avian, Dengue	Lepto
Training for HCWs				
Training for Public				
Budgeting				
Monitoring & Evaluation				

- The schedule aligns training and preparedness activities with seasonal climate and disease patterns.

Expected Outcomes

- Improved district-level preparedness
- Skilled and confident workforce
- Effective inter-sectoral coordination

- Reduced morbidity and mortality

13. Conclusion

A comprehensive communication and capacity-building plan is vital for effective pandemic preparedness and response. Community engagement, targeted training, and continuous evaluation ensure resilience and sustainability in managing public health emergencies.

ANNEXURE

1. IMPORTANT PHONE NUMBERS

Phone numbers and particulars of persons responsible for providing guidance, assistance, and support for pandemic preparedness operations may be provided here in a manner that allows easy reference at a glance. The information recorded here could be exhibited elsewhere at the time of emergencies. LSG institutions shall give special attention to collect and record the above data of persons and institutions who/which are supposed to give technical and co-ordination support to reduce the impact of pandemic.

1.1. DETAILS OF LSGS

Sl.No	Name of the LSG	Name of the President
1	Naduvannur	Shaija Murali
2	Kottur	Sujatha Teacher
